**Reading for Our Lives** Maya Payne Smart,2022-08-02 An

award-winning journalist and literacy advocate provides a clear, step-by-step guide to helping your child thrive as a reader and a learner. When her child went off to school, Maya Smart was shocked to discover that a good education in America is a long shot, in ways that few parents fully appreciate. Our current approach to literacy offers too little, too late, and attempting to play catch-up when our kids get to kindergarten can no longer be our default strategy. We have to start at the top. The brain architecture for reading develops rapidly during infancy, and early language experiences are critical to building it. That means parents' work as children's first teachers begins from day one too—and we need deeper knowledge to play our positions. *Reading for Our Lives* challenges the bath-book-bed mantra and the idea that reading aloud to our kids is enough to ensure school readiness. Instead, it gives parents easy, immediate, and accessible ways to nurture language and literacy development from the start. Through personal stories, historical accounts, scholarly research, and practical tips, this book presents the life-and-death urgency of literacy, investigates inequity in reading achievement, and illuminates a path to a true, transformative education for all.

**Sputnik's Guide to Life on Earth Frank Cottrell**

Boyce, 2017-06-20 A one-of-a-kind story of heart, humor, and finding one's place in the universe. Prez knows that the best way to keep track of things is to make a list. That's important when you have a grandfather who is constantly forgetting. And it's even more important when your grandfather can't care for you anymore and you have to go live with a foster family out in the country. Prez is still learning to fit in at his new home when he answers the door to meet Sputnik—a kid who is more than a little strange. First, he can hear what Prez is thinking. Second, he looks like a dog to everyone except Prez. Third, he can manipulate the laws of space and time. Sputnik, it turns out is an alien, and he's got a mission that requires Prez's help: the Earth has been marked for destruction, and the only way they can stop it is to come up with ten reasons why the planet should be saved. Thus begins one of the most fun and eventful summers of Prez's life, as he and

Sputnik set out on a journey to compile the most important list Prez has ever made—and discover just what makes our world so remarkable.
