**Global Air Power** John Andreas Olsen, 2011 What influences have shaped air power since human flight became a reality more than a hundred years ago? Global Air Power provides insight into the evolution of air power theory and practice by examining the experience of six of the world's largest air forces--those of the United Kingdom, the United States, Israel, Russia, India, and China--and of representative smaller air forces in Pacific Asia, Latin America, and continental Europe. The chapters, written by highly regarded scholars and military leaders, explore how various nations have integrated air power into their armed forces and how they have applied air power in both regular and irregular warfare and in peacetime operations. They cover the organizational, professional, and doctrinal issues that air forces confronted in the past, the lessons learned from victory and defeat, and emerging challenges and opportunities. Further, Global Air Power supplements the traditional military perspective with examinations of the ideological, economic, and cultural factors that give air forces their distinctive characters. Chapters show how the interplay among these internal factors, together with external challenges, determines the structure, role, and effectiveness of air forces. Together, these chapters illuminate universal trends as well as similarities and differences among the world's air forces. Its combination of military history and sociopolitical analysis makes Global Air Power especially valuable to a broad range of historians, air power specialists, and general readers interested in national defense and international relations.

**The PLA's Unmanned Aerial Systems - New Capabilities for a New Era of Chinese Military Power** Elsa B. Kania, 2018-08-10 The Chinese People's Liberation Army (PLA) continues to work diligently on all aspects of their aerospace forces. This includes areas not only of traditional aircraft, but also in more modern, and some cutting edge, technologies. The UAV is one area in which the People's Republic of China, and the PLA in specific, has invested significant time and effort. While we recognize that the term unmanned is the common and official term, it is rather misleading in the fact that humans, at least up until today, still play a critical role in their operations. Nonetheless, we will not buck convention at this moment, and continue to use unmanned for the 'U' in UAV, for this paper. The PRC is the world's largest producer of UAVs at this time, and captures a vast portion of the commercial market, as well as the military one. While it is important to keep the commercial aspects in mind, this particular paper will focus on military UAVs, their development, deployments, and current and potential uses on the battlefield of today and tomorrow. The paper seeks to serve as a starting point to understand this growing field, and to give analysts a common baseline from which to work, and from which to judge growth, both rapidity and complexity, in the future.

**Brigadization of the PLA Air Force** Lawrence "Sid" Trevethan,2018-05 In 2016, China's People's Liberation Army (PLA) began to implement its 11th large-scale reorganization, including a 300,000-man force reduction. One key component of the reorganization was the PLA Air Force's (PLAAF) shift away from its traditional Division-Regiment system to a Base-Brigade structure for its fighter and ground attack aircraft. This transition originally began in 2011 but implementation was apparently delayed soon after it began and did not restart until 2017. This paper discusses the evolution of the PLAAF's fighter and ground attackcombat aircraft units and flight colleges to a brigade structure.

Modern Chinese Warplanes: Chinese Air Force - Combat Aircraft and Units Andreas Rupprecht,2018-12-19 In 2012 the original Modern Chinese Warplanes set the standard as a uniquely compact yet comprehensive directory of modern Chinese air power, combining magnificent illustrations and in-depth analysis. Now almost six years later, much of the fascination that Chinese military aviation holds for the analyst and enthusiast still stems from the thick veil of secrecy that surrounds it. However, in the time that has passed since the first edition a plethora of new types, systems and weapons has been revealed. What is more, the structure of the People's Liberation Army Air Force (PLAAF) has been completely revised by transforming the former Military Regions into Theatre Commands. In parallel, the general structure has been thoroughly modernized to cope with China's latest challenges. Consequently, this fully revised edition is organized in three parts: the most important military aircraft and their weapons found in service today; aircraft markings and serial number systems; and orders of battle for the PLAAF. The study includes the latest developments emerging from behind the 'Great Wall', including the J-20 stealth fighter program, Y-20 strategic transport and the latest developments in UAVs that are equipping a rapidly modernizing air arm. The centerpiece consists of almost 100 fully illustrated pages detailing the organizational structure of the air force, providing an easy-to-use review of all known flying units, their equipment and their markings. No other book has ever attempted to present this level of accuracy in this way: Modern Chinese Air Power portrays the PLAAF in a degree of detail that was previously unavailable.

7 Seconds to Die John F. Antal,2022-02-03 A military study of the 2020 war between Armenia

and Azerbaijan—the first war in history won primarily by unmanned systems. Fought over the course of forty-four days, the Second Nagorno-Karabakh war resulted in a decisive military victory for Azerbaijan. Armenia lost even though they controlled the high ground in a mountainous region that favored traditional defense. In *7 Seconds to Die*, military consultant and historian John Antal examines the decisive factors of the war and their implications for the future of armed conflict. The fact that Azerbaijan won the war is not extraordinary, considering the correlation of forces arrayed against Armenia. What is exceptional is that this was the first modern war primarily decided by unmanned weapons. The Turkish-made BAYRAKTAR TB2 Unmanned Air Combat Vehicle (UCAV) and the Israeli-made HAROP Loitering Munition (LM) dominated the fighting and provided Azerbaijan with a war-winning advantage.
