Chemical Warfare in World War I Charles E Heller, 2018-09-16 This Leavenworth Paper chronicles the introduction of chemical agents in World War I, the U.S. Army's tentative preparations for gas warfare prior to and after American entry into the war, and the AEF experience with gas on the Western Front. Chemical warfare affected tactics and almost changed the outcome of World War I. The overwhelming success of the first use of gas caught both sides by surprise. Fortunately, the pace of hostilities permitted the Allies to develop a suitable defense to German gas attacks and eventually to field a considerable offensive chemical capability. Nonetheless, from the introduction of chemical warfare in early 1915 until Armistice Day in November, 1918, the Allies were usually one step behind their German counterparts in the development of gas doctrine and the employment of gas tactics and procedures. In his final report to Congress on World War I, General John J. Pershing expressed the sentiment of contemporary senior officers when he said, Whether or not gas will be employed in future wars is a matter of conjecture, but the effect is so deadly to the unprepared that we can never afford to neglect the question. General Pershing was the last American field commander actually to confront chemical agents on the battlefield. Today, in light of a significant Soviet chemical threat and solid evidence of chemical warfare in Southeast and Southwest Asia, it is by no means certain he will retain that distinction. Over 50 percent of the

Total Army's Chemical Corps assets are located within the United States Army Reserve. This Leavenworth Paper was prepared by the USAA Staff Officer serving with the Combat Studies Institute, USACGSC, after a number of requests from USAA Chemical Corps officers for a historical study on the nature of chemical warfare in World War I. Despite originally being published in 1984, this Leavenworth Paper also meets the needs of the Total Army in its preparations to fight, if necessary, on a battlefield where chemical agents might be employed.

Twitter and Tear Gas Zeynep Tufekci, 2017-05-16 A firsthand account and incisive analysis of modern protest, revealing internet-fueled social movements' greatest strengths and frequent challenges To understand a thwarted Turkish coup, an anti-Wall Street encampment, and a packed Tahrir Square, we must first comprehend the power and the weaknesses of using new technologies to mobilize large numbers of people. An incisive observer, writer, and participant in today's social movements, Zeynep Tufekci explains in this accessible and compelling book the nuanced trajectories of modern protests—how they form, how they operate differently from past protests, and why they have difficulty persisting in their long-term quests for change. Tufekci speaks from direct experience, combining on-the-ground interviews with insightful analysis. She describes how the internet helped the Zapatista uprisings in Mexico, the necessity of remote Twitter users to organize medical supplies during Arab Spring, the refusal to use bullhorns in the

Occupy Movement that started in New York, and the empowering effect of tear gas in Istanbul's Gezi Park. These details from life inside social movements complete a moving investigation of authority, technology, and culture—and offer essential insights into the future of governance.

The Arctic and World Order Kristina Spohr, Daniel S. Hamilton, Jason C. Moyer, 2021-01-26 The Arctic, long described as the world's last frontier, is quickly becoming our first frontier—the front line in a world of more diffuse power, sharper geopolitical competition, and deepening interdependencies between people and nature. A space of often-bitter cold, the Arctic is the fastest-warming place on earth. It is humanity's canary in the coal mine—an early warning sign of the world's climate crisis. The Arctic “regime” has pioneered many innovative means of governance among often-contentious state and non-state actors. Instead of being the “last white dot on the map,” the Arctic is where the contours of our rapidly evolving world may first be glimpsed. In this book, scholars and practitioners—from Anchorage to Moscow, from Nuuk to Hong Kong—explore the huge political, legal, social, economic, geostrategic and environmental challenges confronting the Arctic regime, and what this means for the future of world order.

Russian Foreign Policy in Transition Andrew Melville, 2005-07-20 Through a compilation of foreign policy documents and statements, harnessed together by a section of analytic works, this book seeks to highlight the shift in Russian foreign policy at the beginning of the twenty-first century. This

compilation presents the work of formative scholars in this field who are concerned with the evolution of Russia Foreign policy thinking and behavior. This volume compiles critical documents and statements (treaties, addresses and articles) that deal with the formation of new conceptions of security in the New World order. The articles critically evaluate the implications of these new initiatives and lend insight to these documents and statements in practice. They address a wide range of topics from the crisis in Kosovo to domestic Russian policy, with an eye to the future of Russian policy.

The Political Economy of Gulf Defense Establishments Zoltan

Barany, 2021-02-18 The six monarchies on the Arabian Peninsula have devoted enormous sums to defense in past decades. Nevertheless, the gap between their expensive armaments and their capacity to deter aggression and/or project military strength has narrowed but little in that time. This Element takes a political economy approach and argues that structural factors inherent in the Gulf states' political systems prohibit civilian oversight of the defense sector and are responsible for this outcome. Lax restraints on military outlays, in turn, enable widespread corruption, lead to large-scale waste, and account for the purchasing of unneeded, unsuitable, and incompatible weapons systems. The Element explores the challenges caused by plummeting oil prices and the resulting budget cuts and considers the development of domestic defense industries in Saudi Arabia and the UAE, intended as a part

of their economic diversification program. The setbacks of the Saudi-led coalition's on-going war in Yemen starkly illustrate the narrative.

Putinomics Albrecht Rothacher, 2021-05-20 This book sheds new light on the political economy of Russia under Putin's rule. The author, a former EU diplomat, presents a historical review of the Russian economy and 60 years of state-communist mismanagement, followed by oligarchic privatization. The book offers profound insights into Putin's rule and the power mechanics of the state-dominated management of the Russian economy. It identifies and assesses the lack of rule of law, together with an arbitrary and often corrupt administration that systematically discourages entrepreneurship and the emergence of an independent middle class. Furthermore, the book discusses Russia's budgetary policy, its dependence on the export of natural resources, state-owned enterprises and their privileges, and Russia's external trade. This hard-hitting, substantial analysis debunks the myth of Russia's economic might and is a must read for anyone seeking to understand the economic realities of the Eurasian continent, or considering doing business with Russia.

Landscape as Infrastructure Pierre Belanger, 2016-11-10 As ecology becomes the new engineering, the projection of landscape as infrastructure—the contemporary alignment of the disciplines of landscape architecture, civil engineering, and urban planning—has become pressing. Predominant challenges facing urban regions and territories today—including shifting climates,

material flows, and population mobilities, are addressed and strategized here. Responding to the under-performance of master planning and over-exertion of technological systems at the end of twentieth century, this book argues for the strategic design of infrastructural ecologies, describing a synthetic landscape of living, biophysical systems that operate as urban infrastructures to shape and direct the future of urban economies and cultures into the 21st century. Pierre Bélanger is Associate Professor of Landscape Architecture and Co-Director of the Master in Design Studies Program at Harvard University's Graduate School of Design. As part of the Department of Landscape Architecture and the Advanced Studies Program, Bélanger teaches and coordinates graduate courses on the convergence of ecology, infrastructure and urbanism in the interrelated fields of design, planning and engineering. Dr. Bélanger is author of the 35th edition of the Pamphlet Architecture Series from Princeton Architectural Press, GOING LIVE: from States to Systems (pa35.net), co-editor with Jennifer Sigler of the 39th issue of Harvard Design Magazine, Wet Matter, and co-author of the forthcoming volume ECOLOGIES OF POWER: Mapping Military Geographies & Logistical Landscapes of the U.S. Department of Defense. As a landscape architect and urbanist, he is the recipient of the 2008 Canada Prix de Rome in Architecture and the Curator for the Canada Pavilion and Canadian Exhibition, EXTRACTION, at the 2016 Venice Architecture Biennale (extraction.ca).

State-Owned Enterprises in Middle East, North Africa, and Central Asia: Size, Costs, and Challenges Mr. Ernesto Ramirez Rigo, Christine J.

Richmond, Oluremi Akin Olugbade, Gareth Anderson, Maria Atamanchuk, Mr. Hatim Bukhari, Iacovos Ioannou, Deeksha Kale, Tannous Kass-Hanna, Mr. Maximilien Queyranne, Wei Shi, Joyce Wong, 2021-09-20 Prior to the COVID-19 shock, the key challenge facing policymakers in the Middle East, North Africa, and Central Asia region was how to generate strong, sustainable, job-rich, inclusive growth. Post-COVID-19, this challenge has only grown given the additional reduction in fiscal space due to the crisis and the increased need to support the recovery. The sizable state-owned enterprise (SOE) footprint in the region, together with its cost to the government, call for revisiting the SOE sector to help open fiscal space and look for growth opportunities.

National Oil Companies and Value Creation Silvana Tordo, 2011-07-13 National Oil Companies (NOCs) directly or indirectly control the majority of oil and gas reserves. As such, they are of great consequence to their country's economy, to importing countries' energy security, and to the stability of oil and gas markets. The paper analyzes the available evidence on the objectives, governance and performance of 20 NOCs from both net importing and net exporting countries, and draws conclusions about the design of policies and measures that are more likely to lead to social value creation. NOCs differ

from private companies on a number of very important variables, including the level of competition in the market in which they operate, their business profile along the sector value chain, and their degree of commercial orientation and internationalization. Most share some core characteristics: they are usually tied to the 'national purpose' and serve political and economic goals other than maximizing the firm's profits. This paper introduces a conceptual model to analyze value creation by NOCs that takes into consideration their complex objective function. Our analysis aims to answer the following questions: Are certain corporate governance arrangements more suited than others to promote value creation? Is good geology a pre-condition for NOC value creation? Are there benefits from exposing the NOC to competition from private oil companies? Does the development of forward and backward linkages hamper NOC value creation?

Natural Gas and Renewable Methane for Powertrains Richard van Basshuysen, 2016-02-04 This book focuses on natural gas and synthetic methane as contemporary and future energy sources. Following a historical overview, physical and chemical properties, occurrence, extraction, transportation and storage of natural gas are discussed. Sustainable production of natural gas and methane as well as production and storage of synthetic methane are scrutinized next. A substantial part of the book addresses construction of vehicles for natural and synthetic methane as well as large engines for industrial and maritime use. The last chapters present some perspectives on

further uses of renewable liquid fuels as well as natural gas for industrial engines and gas power plants.

T-34 Shock: The Soviet Legend in Pictures Francis Pulham, Will

Kerrs, 2021-07-11 The Soviet T-34 medium tank needs no introduction, being the most famous tank ever built especially as has seen service across the globe throughout the twentieth century's most brutal wars. However, despite this fame, little has been written about its design changes. While most tank enthusiasts can differentiate between the 'T-34/76' and the 'T-34-85', identifying different factory production batches has proven more elusive. Until now. With nearly six hundred photographs, mostly taken by soldiers who both operated and fought against the T-34, this book seeks to catalogue and contextualise even the subtlest details to create a true 'T-34 continuum'. The book begins with the antecedents of the T-34, the ill-fated BT 'fast tank' series and the influence of the traumatic Spanish Civil War before moving to an in-depth look at the T-34's prototypes. After this, every factory production change is catalogued and contextualised, with never-before-seen photographs and stunning technical drawings. Furthermore, four battle stories are also integrated to explain the changing battle context when major production changes take place. The production story is completed with sections on the T-34's post-war production (and modification) by Czechoslovakia, Poland, and the People's Republic of China, as well as T-34

variants.

Soft Computing Applications Valentina Emilia Balas, Lakhmi C. Jain, Marius Mircea Balas, Shahnaz N. Shahbazova, 2020-08-17 This book presents the proceedings of the 8th International Workshop on Soft Computing Applications, SOFA 2018, held on 13–15 September 2018 in Arad, Romania. The workshop was organized by Aurel Vlaicu University of Arad, in conjunction with the Institute of Computer Science, Iasi Branch of the Romanian Academy, IEEE Romanian Section, Romanian Society of Control Engineering and Technical Informatics – Arad Section, General Association of Engineers in Romania – Arad Section and BTM Resources Arad. The papers included in these proceedings, published post-conference, cover the research including Knowledge-Based Technologies for Web Applications, Cloud Computing, Security Algorithms and Computer Networks, Business Process Management, Computational Intelligence in Education and Modelling and Applications in Textiles and many other areas related to the Soft Computing. The book is directed to professors, researchers, and graduate students in area of soft computing techniques and applications.

Prospects for Hydrogen and Fuel Cells International Energy Agency, 2005

Energy security, economic prosperity and environmental protection are challenges for all countries. They are particularly pressing in the transportation sector which still relies almost exclusively on oil. The use of hydrogen as an energy carrier and fuel cells as motive devices in transportation and energy distribution systems are possible solutions. This book provides an analysis of policy responses and hurdles and business opportunities. Information regarding the latest R&D, policy initiatives and private sector plans are assessed from the perspective of the rapidly changing global energy system in the next half century.

Consumption and Violence Alexander Sedlmaier, 2014-10-13 Reveals the relationship between the rise of political violence in West Germany to the unprecedented growth of consumption

Automotive FDI in Emerging Europe A. J. Jacobs, 2017-06-19 This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-

run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.

numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Soviet GAZ 66 Off Road Military Truck Vehicle Paper Model.jpg has

democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Soviet GAZ 66 Off Road

Military Truck Vehicle Paper Model.jpg. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with

the world. However, it is essential to be cautious while downloading Soviet GAZ 66 Off Road Military Truck Vehicle Paper Model.jpg. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content.

When downloading Soviet GAZ 66 Off Road Military Truck Vehicle Paper Model.jpg, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In

conclusion, the ability to download Soviet GAZ 66 Off Road Military Truck Vehicle Paper Model.jpg has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals

can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.

web practice problems for final exam with solutions math 121a 1
find the maximum of the function $f(x, y) = x^2 + y^2$ at the region $x^2 + 2y^2 \leq 1$
solution first we look for critical points inside $f(x, y) = x^2 + y^2$
 $f_x = 2x = 0 \Rightarrow x = 0$
 $f_y = 2y = 0 \Rightarrow y = 0$
now we look for critical points on the boundary $x^2 + 2y^2 = 1$ one can use lagrange

in part i are 4 points
each use the de nition
of the derivative to
show that the derivative
of the function $f(x) = x^2$
is $f'(x) = 2x$ find the
derivative $f'(x)$ if $f(x) =$
