3D Laser Scanning for Heritage Clive Boardman,Paul Bryan,2018 The first edition of 3D Laser Scanning for Heritage was published in 2007 and originated from the Heritage3D project that in 2006 considered the development of professional guidance for laser scanning in archaeology and architecture. Publication of the second edition in 2011 continued the aims of the original document in providing updated guidance on the use of three-dimensional (3D) laser scanning across the heritage sector. By reflecting on the technological advances made since 2011, such as the speed, resolution, mobility and portability of modern laser scanning systems and their integration with other sensor solutions, the guidance presented in this third edition should assist archaeologists, conservators and other cultural heritage professionals unfamiliar with the approach in making the best possible use of this now highly developed technique.

International Communism and the Spanish Civil War Lisa A. Kirschenbaum,2015-07-28 International Communism and the Spanish Civil War provides an intimate picture of international communism in the Stalin era. Exploring the transnational exchanges that occurred in Soviet-structured spaces - from clandestine schools for training international revolutionaries in Moscow to the International Brigades in Spain - the book uncovers complex webs of interaction, at once personal and political, that linked international communists to one another and the Soviet Union. The Spanish Civil War, which coincided with the great purges in the Soviet Union, stands at the center of this grassroots history. For many international communists, the war came to define both their life histories and political commitments. In telling their individual stories, the book calls attention to a central paradox of Stalinism - the simultaneous celebration and suspicion of transnational interactions - and illuminates the appeal of a cause that promised solidarity even as it practiced terror.

One unlucky-lucky day, Raphael finds something very special and very mysterious. So mysterious that he decides to keep it, even when the city police offer a handsome reward for its return. That decision brings with it terrifying consequences, and soon the dumpsite boys must use all of their cunning and courage to stay ahead of their pursuers. It’s up to Raphael, Gardo, and Rat-boys who have no education, no parents, no homes, and no money—to solve the mystery and right a terrible wrong. Andy Mulligan has written a powerful story about unthinkable poverty—and the kind of hope and determination that can transcend it. Transcension Damien Broderick,2003-03-19 Damien Broderick has been a leading Australian SF writer since the ‘70s. His novel The Dreaming Dragons was listed in SF: the 100 best novels. His recent nonfiction book, The Spike, is a mind-stretching look at the wonders of the high-tech future. Now in Transcension he brings to life one of the futures he imagined in The Spike, a world pervaded by nanotechnology and governed by artificial intelligence. Transcension may be Broderick’s best book yet. Amanda is a brilliant violinist, a mathematical genius, and a rebel. Impatient for the adult status her society only grants at age thirty, but determined to have a real adventure first, she has repeatedly gotten into trouble and found herself in the courtroom of Magistrate Mohammed Abdel-Malik, the sole resurrectee from among those who were frozen in the early twenty-first century, the man whose mind was the seed for Aleph, the AI that rules this utopia. Mathewmark is a real adolescent, living in the last place where they still exist, the reservation known as the Valley of the God of One's Choice, where those who have chosen faith over technology are allowed to live out their simpler lives. When Amanda determines that access to the valley is the key to the daring stunt she plans, it is Mathewmark she will have to lead into temptation. But just as Amanda, Mathewmark, and Abdel-Malik are struggling to find themselves and achieve their potentials, so is Aleph, and the AI's success will be a challenge to them and all of humanity. The book will be of particular interest to students and scholars in museum studies, digital archaeology, heritage studies, architectural history and modelling, virtual environments.
