WW1 Aircraft Performance Anders F. Jonsson,2023 This is the first book to comprehensively cover WW1 fighter aircraft focusing on their relative flight performance utilizing modern computer simulations and if you want to get a better understanding of how they compared to each other, then this is the book for you. Based on the simulation results, a number of myths surrounding the modeled aircraft can be put to rest and in addition, they reveal some unexpected results that go against the grain of what has become generally accepted facts about these airplanes. While anecdotal evidence runs the risk of misremembering and embellishments, hard numbers based on computer simulations are more neutral and allow a more complete picture of these aircraft to emerge revealing their true strengths and weaknesses. Another first is the detailed analysis of how the aircraft compare in terms of acceleration, dive, and sustained and instantaneous turn performance done to a level previously not attempted in a book. The aircraft covered in this book are the Albatros D.Va, Fokker Dr.I, Fokker D.VIIF, Fokker E.V, Fokker D.VIII, Nieuport 28.C1, Pfalz D.III, Pfalz D.IIIa, Pfalz D.VIII, Siemens Schukert D.IV, Sopwith Camel, Sopwith Triplane, S.E.5a and SPAD XIII. As a background to the analysis of the results and the rationale for how the aircraft were modeled, the book also contains a brief summary of the state of the art in aerodynamics and aircraft design at the time. The latest version of the Spitfire, the Mark XVI, fitted with a Rolls Royce Merlin engine, is actually a Mk.

British Fighter Aircraft in World War I Mark C. Wilkins,2021-05-26 Go buy this book right now. It is rare that ISD gives an instant five-star rating to any new volume, but Mark C. Wilkins' British Fighter Aircraft in World War I is a rare book. – Indy Squadron Dispatch World War I witnessed unprecedented growth and innovation in aircraft design, construction, and as the war progressed—mass production. Each country generated its own innovations sometimes in surprising ways—Albatros Fokker, Pfalz, and Junkers in Germany and Nieuport, Spad, Sopwith and Bristol in France and Britain. This book focuses on the British approach to fighter design, construction, and mass production. Initially the French led the way in Allied fighter development with their Bleriot trainers then nimble Nieuport Scouts—culminating with the powerful, fast gun platforms as exemplified by the Spads. The Spads had a major drawback however, in that they were difficult and counter-intuitive to fix in the field. The British developed fighters in a very different way; Tommy Sopwith had a distinctive approach to fighter design that relied on lightly loaded wings and simple functional box-girder fuselages. His Camel was revolutionary as it combined all the weight well forward; enabling the Camel to turn very quickly—but also making it an unforgiving fighter for the inexperienced. The Royal Aircraft Factory's SE5a represented another leap forward with its comfortable cockpit, modern instrumentation, and inline engine—clearly influenced by both Spads and German aircraft. Each manufacturer and design team vied for the upper hand and deftly and quickly appropriated good ideas from other companies—be they friend or foe. Developments in tactics and deployment also influenced design—from the early reconnaissance planes, to turn fighters, finally planes that relied upon formation tactics, speed, and firepower. Advances were so great that the postwar industry seemed bland by comparison.

Herman Goring Fighter Ace Peter Kilduff,2010-06-01 Over the last 70 years, in countless books and essays, Hermann Goring has been defined by his crimes and excess during the Third Reich and the Second World War. But his activities as a young career military officer in World War I have invariably been glossed over – until now. 'Hermann Goring – Fighter Ace' is the first in-depth look at Goring's role as a military flyer and air combat leader from 1914 through the end of The Great War, and how those experiences shaped the personality that came to the world's attention in 1939

Immelmann Frantz Immelmann,2009-07-30 A biography of one of Germany’s pioneers in aerial combat: “a great read” (Internet Modeler). Max Immelmann was born in Dresden, the son of a container factory owner. When World War I started, Immelmann was recalled to active service, transferred to the Luftstreitkräfte, and sent for pilot training in November 1914. He was on his way to becoming a legendary flying ace. Initially stationed in northern France as a reconnaissance aviator, he was shot down by a French pilot but managed to land safely behind German lines. He was decorated with the Iron Cross, Second Class for preserving his aircraft. Later in 1915, he became one of the first German fighter pilots, quickly building an impressive score of victories as he became known as The Eagle of Lille, Der Adler von Lille. Known for the aerial combat maneuver that bears his name; for the use of a machine gun synchronized to fire forward through the propeller arc; and for his association with the Fokker Eindecker, Germany’s first fighter aircraft, Immelmann was the first pilot to be awarded the Pour le Mérite, Germany’s highest military honor—which became colloquially known as the “Blue Max” in the German Air Service. Along with Oswald Boelcke and other pilots, Immelmann was one of the main instigators of the Fokker Scourge, which inflicted heavy losses upon British and French aircrews during 1915. He was credited with fifteen victories—the final one coming on March 30, 1916. This Casemate edition of Max Immelmann’s biography does not change a word from the original 1930 edition, but for the first time, reworks the original type and page layout to provide a beautiful and highly readable new treatment to this classic of aviation literature.
