Modelling US World War II Armoured Fighting Vehicles Tom Cole, 2022-03-21 Aimed at military model makers and wargamers who are interested in the armoured fighting vehicles of the United States as used throughout World War II, this book follows on from *Modelling British World War II Armoured Vehicles* by the same author. The book places its emphasis on US Army and US Marine Corps AFVs modelled mainly in 1/72 and 1/48 scales, in a deliberate departure from the more popular 1/35 scale, to encourage and inspire model makers who are new to or less familiar with these scales. Illustrated with over 270 colour photos this book features every major US AFV used in World War II, with many models shown in various stages of construction and paintings. It presents step-by-step guides demonstrating the painting techniques appropriate for different scales and includes an additional section showing how to paint wargames models. There is also a review of how the USA developed tanks and other armoured vehicles from the interwar period through to the end of World War II. This fascinating story will help model makers and wargamers give the vehicles they build an historical context.

Basic Half-Track Vehicles M2, M3 Technical Manual War Department, 2011-09-01 Prior to the outbreak of WWII, the U.S. Army Ordnance Department began testing prototype half-track

vehicles, including a White Motor Co. design that combined an M3 Scout Car with a White chassis. With armored bodies, an armored radiator shutter and bulletproof glass windscreen, the half-track offered crew protection and endurance under fire, while its speed - up to 45 mph - added a new dimension to infantry mobility. After testing and acceptance, the White design was standardized and during the war built by White, Autocar and Diamond T as the M3 half-track. Nearly 41,000 would be produced during the war, along with an additional 13,500 units of the smaller M2. Variants included the M13, M15 and M16 gun motor carriage, the M21 mortar carrier, and the T19 and T30 Howitzer motor carriages. Created in 1944, this TM 9-710 technical manual includes many photos and over 350 pages of text that reveal a great deal about the weapon's design and capabilities. Intended as a manual for those charged with operation and maintenance, this manual shows many aspects of its engine, cooling, power train and other systems. Originally labeled restricted, this manual was declassified long ago and is here reprinted in book form. Care has been taken to preserve the integrity of the text.

Zajackowski, 2021-12-31 Junkers Ju 188 - German bomber during World War II, successor of the Ju 88, was flown in January 1943.

American Tanks & AFVs of World War II Michael Green, 2014-07-22 Stuart, Sherman, Lee, and Grant tanks dominated the US Army and Marine Corps armored warfare effort versus Nazi Germany and Tojo's Japan. This book details the full range of these vehicles, giving technical specifications and development features as well as describing how they were manned and fought in battle. The equipping of the United States military with the weapons it needed to prevail during World War II was an unparalleled example of America's

industrial might at the time. Among the many weapons produced by America's workers, tanks rate as an important example with 88,140 built between 1939 and 1945. This was almost twice what Germany and Great Britain built combined during the same period. These tanks not only equipped America's ground forces but saw service with many allied armies. In addition to the 18,620 tank-based variants, such as armored engineering vehicles, self-propelled artillery, armored recovery vehicles, and tank destroyers, American factories went on to design and build thousands of wheeled armored cars for reconnaissance purposes and armored half-tracks to transport the infantry into battle behind the tanks. Like the tanks, American armored half-tracks were modified to serve a wide variety of jobs including self-propelled artillery, tank destroyers and antiaircraft vehicles. So useful were these vehicles that they would remain in service with foreign armies for decades after World War II. To complement its inventory of tanks and armored fighting vehicles the American military industrial complex also designed and built over 18,000 amphibian tractors. Appearing in both unarmored and armored variants they went into combat with a wide variety of armaments. Referred to as the Landing Vehicle Tracked (LVT) they would serve not only with the U.S. Marine Corps who often called them Amtracs but the US Army who referred to them as the Water Buffalo. They would allow the American military to take the fight to the far flung Japanese Empire wherever it had established itself in the vast reaches of the Pacific Area of Operations. These same vehicles would also see service in the ETO with the US Army and allied forces when it came time to cross various water obstacles used by the German military as defensive barriers.

Tanks in the Great War, 1914-1918 J. F. C. Fuller, 2023-10-28 Tanks in the Great War,

1914-1918 by J. F. C. Fuller provides a comprehensive look at the role of tanks during World War I. Fuller's meticulous research and storytelling offer readers a detailed account of the development and deployment of tanks on the battlefield. This book is a valuable resource for history enthusiasts and those interested in the evolution of military technology during one of the most significant conflicts in history. It sheds light on the pivotal role that tanks played in shaping the outcome of the war.

Armored Thunderbolt Steve Zaloga, 2008 • Hundreds of photos, including many never published before with riveting accounts of armored warfare in World War II • Compares the Sherman to other tanks, including the Panther and Tiger • Author is a world-renowned expert on the Sherman tank and American armor Some tank crews referred to the American M4 Sherman tank as a death trap. Others, like Gen. George Patton, believed that the Sherman helped win World War II. So which was it: death trap or war winner? Armor expert Steven Zaloga answers that question by recounting the Sherman's combat history. Focusing on Northwest Europe (but also including a chapter on the Pacific), Zaloga follows the Sherman into action on D-Day, among the Normandy hedgerows, during Patton's race across France, in the great tank battle at Arracourt in September 1944, at the Battle of the Bulge, across the Rhine, and in the Ruhr pocket in 1945.

Papertoy Monsters Brian Castleforte, 2010-12-29 A breakthrough paper-folding book for kids—paper airplanes meet Origami meets Pokemon. Papertoys, the Internet phenomenon that's hot among graphic designers and illustrators around the world, now comes to kids in the coolest new book. Created and curated by Brian Castleforte, a graphic designer

and papertoy pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia, Chile, even Jackson, Tennessee), Papertoy Monsters offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful and hip, combining the edginess of anime with the goofy fun of Uglydolls and other collectibles. Plus each character comes with its own back-story. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask. Yucky Chuck, the lunchbox creature born in the deepest depths of your school bag. Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the hairy grandpa monster with his very own moustache collection.

World War II US Cavalry Groups Gordon L. Rottman, 2012-07-20 The cavalry regiments of the US Army were in the process of being transformed into a mechanized force when the USA entered World War II. While those cavalry regiments deployed to the Pacific to fight the Japanese were turned into infantry units, those sent to Europe were employed as light armor in the cavalry's traditional spearhead roles - reconnaissance, the screening of advances and flanks, and the pursuit of beaten enemy forces. Equipped with M8 Greyhound armored cars, M5 Stuart and M24 Chaffee light tanks, and halftracks, these units were designated cavalry groups (mechanized), each c. 1,700 strong and divided into two heavily armed squadrons. They were seldom attached to divisions, but to higher-level corps commands, meaning they could be

shifted around quickly and independently and be formed at need into flexible battle groups with armored, infantry, and other units, depending on the mission. Featuring specially drawn full-color illustrations depicting uniforms, insignia, armored vehicles, and tactical scenarios, this is the story of the US cavalry units that led the advance to victory in Europe during World War II.

Half-Track R. P. Hunnicutt, 2015-04-20 Featuring over a thousand photos from the National Archives, diagrams, and detailed specifications, Hunnicutt's Half-Track remains the definitive development history of half-track vehicles for the military historian, professional soldier, and tank restorer. In this ambitious work, Hunnicutt details the developmental history of half-tracks, examining its modifications and effectiveness. Products of a pre-war development program, half-track vehicles served in all theaters of operation from the first to the final days of WWII, and many models remained active long after the Korean War. The armored half-track was one of few vehicles available to equip the new divisions being formed just prior to WWII. Part I traces the early development beginning with the slow half-track of WWI to the faster vehicles developed after the evaluation of the French Citroen-Kegresse P17 in 1931. These vehicles were unarmored half-track cars and trucks intended for use as prime movers and reconnaissance vehicles. In 1938, the half-track suspension was installed on the M2A1 scout car, and the converted vehicle became the half-track personnel carrier T7. This was the first armored half-track, but tests showed that it was underpowered. Based upon the experience with the T7, a new vehicle was designed in 1939 and designated as the half-track scout car T14. Using the half-track suspension from the T7 and a more powerful engine, it became the prototype for all

of the half-tracks produced during WWII. In Part II, the development and production of half-tracks during WWII is described showing the many roles for which it was adapted. In addition to the original armored scout car, the basic chassis was adapted as a personnel carrier, mortar carrier, tank destroyer, self-propelled artillery, and other specialized applications. Some of these vehicles were temporary expedients, but others were so successful that they remained in use until long after WWII. Part III briefly describes some half-track operations during WWII and Korea. However, it is not intended to be an operational history, but to illustrate the effectiveness of the half-track in active service. The characteristics of the various half-track vehicles and the weapons with which some of them were armed are tabulated in the data sheets in Part IV. Richard Pearce Hunnicutt (1926-2011) enlisted in the 7th Infantry Division in 1944 and in 1945 was promoted to sergeant and awarded the Silver Star for his heroic actions. After WWII, Hunnicutt earned a Masters in engineering from Stanford University under the GI Bill. In addition to being one of the most respected metallurgists in California, Hunnicutt wrote the definitive 10-volume history of the development and employment of American armored vehicles. As a tank historian and leading expert in the field, Hunnicutt was one of the founders of the US Army Ordnance Museum at Aberdeen Proving Ground, MD and was a close friend and frequent contributor to the Patton Museum at Fort Knox, KY. Hunnicutt will also want to see: Abrams (ISBN: 9781626542556), Armored Car (ISBN: 9781626541559), Bradley (ISBN: 9781626542525), Patton (ISBN: 9781626548794), Pershing (ISBN: 9781626541672), Sheridan (ISBN: 9781626541542), Sherman (ISBN: 9781626548619), Stuart (History of the American Light Tank, Vol. 1) (ISBN:

T-34 In Action Artem Drabkin, Oleg Sheremet, 2006-04-01 The Soviet T-34 medium tank was one of the most famous and effective fighting vehicles of the Second World War. Along with the German Tiger and the American Sherman, it was a milestone in tank design that changed the course of the conflict. Much has been written about the technical history of the tank and the vital part it played in the huge tank battles on the Eastern Front, but less has been said about the men who went to war in the T-34 and lived, fought and sometimes died in these remarkable machines. This pioneering book, which is based on extensive interviews with tank crews, records their experiences and offers a compelling inside view of armored warfare in the mid-twentieth century.

Attu John Haile Cloe, United States. National Park Service, 2017 The Battle of Attu, which took place from 11-30 May 1943, was a battle fought between forces of the United States, aided by Canadian reconnaissance and fighter-bomber support, and the Empire of Japan on Attu Island off the coast of the Territory of Alaska as part of the Aleutian Islands Campaign during the American Theater and the Pacific Theater and was the only land battle of World War II fought on incorporated territory of the United States. It is also the only land battle in which Japanese and American forces fought in Arctic conditions. The more than two-week battle ended when most of the Japanese defenders were killed in brutal hand-to-hand combat after a final banzai charge broke through American lines.
