Modelling the late Panzerkampfwagen IV Ausf. J, II.Panzer-Division, Kotzing, Bavaria, 1945 Tom Cockle,Gary Edmundson,2012-06-20 The Panzerkampfwagen IV was the only German tank to have been produced continuously throughout the whole of World War II, going through several upgrades and improvements along the way. With the Panzerkampfwagen III, it provided the backbone of the Panzer Divisions over the years of both victory and defeat. This guide covers the Panzerkampfwagen IV Ausf. J, II.Panzer-Division, Kotzing, Bavaria, 1945. This guide also features a gallery of other Panzer IV modelling projects. Further information for the modeller including a list of museums and collections, further reading, websites and a comprehensive list of available aftermarket products and kits of all scales is also available. This guide forms part of Osprey Modelling 38 Modelling the Late Panzerkampfwagen IV ebook.

Panzerwrecks 22 Lee Archer,2018 A long time coming, Panzerwrecks presents its first book about the wrecks in the desert campaign: Panzerwrecks 22: Desert. Everything you have come to expect from Panzerwrecks - high production values, new photos and stunning original artwork from Felipe Rodna.

The Tank Book DK,2017-04-03 Pivotal to modern warfare, tanks have dominated the battlefield for over a century. Get up close to more than 400 military colossuses with this definitive visual guide to armoured vehicles. In 1916, the British built a vehicle that could pound the battlefield impervious to enemy fire, crushing obstacles and barbed wire in its path. The first tank, or Mother as it was known, had arrived. In The Tank Book you can view it in detail, along with other iconic models including the German Panzer, the legendary Tiger, the Vickers Medium Mark II, the Centurion, and the Hellcat - the fastest armoured fighting vehicle ever. This comprehensive volume takes you through the most exciting story in recent military history with the development of heavy artillery, anti-tank weaponry, and the men - such as Mikail Koshkin and Sir William Tritton - who designed these awe-inspiring beasts. Produced with The Tank Museum, The Tank Book traces the tank's development in response to two world wars, Korea, Vietnam, the Cold War and many other conflicts. It shows each model in detail, highlighting details such as their performance, specification, armour, weaponry, and much more. If you are interested in modern warfare, The Tank Book is truly unmissable reading.

Panzers in Berlin 1945 Lee Archer,Mario Lippert,Robert Kraska,2019-09-19 This 392-page book is lavishly illustrated with 360 mostly unpublished photographs that take the reader from the retreat at Seelow to collecting wrecks from central Berlin. Years of painstaking research and a network of like-minded researchers from across the globe have enabled the authors to piece together the who, where and why, including lists o

Panzer III Michael Hayton,Dick Taylor,2017-02-15 When Hitler unleashed Operation Barbarossa against the Soviet Union in June 1941, the 23-tonne Panzer III was in the vanguard of the German assault. The German Panzer III tank (official designation Panzerkampfwagen III, Sd Kfz 141, abbreviated to PzKpfw III) saw widespread use during the Second World War campaigns in Poland, France, the Soviet Union and the Balkans, and in North Africa with the famous Afrika Korps. A small number were still in use in Normandy (1944), at Anzio (1943), in Norway and Finland and in Operation Market Garden (1944). Some 5,774 were built between 1937 and 1943. Although the Panzer III was conceived to operate alongside the infantry-supporting Panzer IV to fight other tanks and armoured fighting vehicles, the roles were reversed when the German Army came up against the formidable Soviet T-34 tank. A tank with a more powerful anti-tank gun was needed so the Panzer IV with its larger turret ring and long-barrelled 7.5cm KwK 40 gun was used in tank-versus-tank battles, with the Panzer III being redeployed in the infantry support role. Production of the Panzer III ended in 1943, although its dependable chassis provided hulls for the Sturmgeschütz III (StuG III) assault gun, one of the most successful of the war, until the end of the war. Centrepiece of the Haynes Panzer III Tank Manual is the Bovington Tank Museum's PzKpfw III Ausf L, which has been restored to running condition. This tank belonged to the same battalion as the museum's famous Tiger I (the 501st (Heavy) Panzer Abteilung) and is an early production Ausf L, modified for tropical service. It was shipped via Naples to Benghazi in Libya in July 1942 and was issued to the 8th Panzer Regiment, part of the 15th Panzer Division and probably fought in the Battle of Alam Halfa. It was subsequently captured by the British Army and shipped to the UK.The Tank Museum has restored the tank to running order, has repainted it in its original camouflage and markings and is currently replacing many of the ancillary tools and equipment that it carried.

Designing the T-34 Peter Samsonov,2019-12-27 When the German army launched Operation Barbarossa – the invasion of the Soviet Union – on June 22, 1941, it was expecting to face and easily defeat outdated and obsolete tanks and for the most part it did, but it also received a nasty shock when it came up against the T-34. With its powerful gun and sloped armour, the T-34 was more than a match for the best German tanks at that time and the Germans regarded it with awe. German Field Marshal von Kleist, who commanded the latter stages of Barbarossa, called it “the finest tank in the world”. Using original wartime documents author and historian Peter Samsonov, creator of the Tank Archives blog, explains how the Soviets came to develop what was arguably the war’s most revolutionary tank design.

Panzer IV, Medium Tank Dennis Oliver,2022-03-18 A fully illustrated guide to Germany’s use of Panzer IV Tanks during the Normandy campaign, perfect for WWII buffs, modelers, and wargamers. When the Allied armies landed on the Normandy beaches on June 6, 1944, they met a reaction force anchored by 758 PzKpfw IV tanks. The first models of these tanks had entered service in 1937 and the original design remained in use, continually up-gunned and up-armored, throughout the conflict. Drawing on official documentation and unit histories, Dennis Oliver investigates the formations that operated these deservedly famous vehicles and uses archive photos and extensively researched color illustrations to examine the markings, camouflage, and technical aspects of the PzKpfw IV tanks that served on the Western Front during the critical summer of 1944. A key section of this book displays available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined, providing everything the modeler needs to recreate an accurate representation of these historic vehicles.

Panzer IV on the Battlefield Craig Ellis,2015-10-19 Often referred to as a workhorse the PzKpfw IV is certainly not a glamorous beast but from North Africa to the Eastern front it was a ubiquitous fixture on the various battlefields of WWII. Using archive and original photographs to lay down a visual time line for this Panzer's development, the book takes a historical overview of this strategically important tank. Description and definition of all the different Ausfs are included both within the introduction and captions. It applies recent findings to the analysis and commentary of the photographs. These include the authors own research into unit specific stowage and factory production differences, which feature for the first time within the context of a monograph looking at the vehicles overall evolution. Information that should be invaluable to both historians and modelers.

Panzerkampfwagen IV Ausf.G, H and J 1942-45 Tom Jentz,Hilary Doyle,2001-11-25 The Panzerkampfwagen IV was one of the most numerous and successful German tanks of World War II. Despite the introduction of the Panther and Tiger tanks, the PzKpfw IV remained the backbone of the German armoured units until the end of the war. This book details all of the variants of the Panzerkampfwagen IV with the long guns 7.5cm KwK 40 L/43 and L/48. Until 1942 armed with a short 7.5cm KwK L/24, it was used primarily in an infantry support role. However with the upgrading to the long 7.5cm it became the main battle tank of the Panzer Divisions.

Combat History of Sturmpanzer-Abteilung 217 TIMM. VOSTERS HAASLER (SIMON.),Simon Vosters,2020-06-15 Combat History of Sturmpanzer-Abteilung 217 tells the story of the only Sturmpanzer IV equipped unit to see action on the western front. Formed in May 1944, Stu.Pz.Abt.217 fought in Normandy, Belgium, Aachen and the Ardennes Offensive before finally perishing in Ruhr pocket in April 1945.Researched over more than twenty years using hundreds of German and American records, authors Timm Haasler and Simon Vosters have meticulously retraced the steps of the battalion to offer the reader the most comprehensive coverage to date.This 284-page book is illustrated with 183-large-format photographs, ten maps and seven specially commissioned artworks by Felipe Rodna, including interior views. QR-codes feature on a number of pages, just point your smartphone camera at them to see the scene today in Google Maps or Street View.

Sherman Tanks of the Red Army Peter Samsonov,2020-12-21 More than 4000 examples of the famous diesel-fueled M4A2 Sherman tank were

sent to the Soviet Union during the Second World War under the Lead-Lease program. These American-built vehicles were operated by Red Army crews against the Germans during some of the bitterest fighting on the Eastern Front - yet despite serving with distinction and being well-liked by their crews, relatively little has been written about these vehicles until now. Tank expert Peter Samsonov looks at the origins of the M4A2 in Soviet service and the machines that were received from the US as well as providing a detailed assessment of how they fared in combat on the front line.

Forgotten Archives 3 Darren Neely,2021-02-06 The search for and discovery of seldom seen and unpublished US Army Signal Corps photographs formed the backbone of the first two volumes of Forgotten Archives. In this third installment, author Darren Neely continues his search for new imagery in unknown archives, while broadening contact with veteran's families. This superbly produced 240-page book features 249 clear, high-quality photographs of US and German fighting vehicles, which are complemented by 8-pages of specially commissioned color artwork by Felipe Rodna. QR-codes are included on 31 pages; point your smartphone camera at them to see the scene in Google Maps or Street View.

Sturmpanzer IV Brummbär Lukasz Gladysiak,Samir Karmieh,Krzysztof Mucha,2015-04-02 Germans had been produced many specialistic armoured vehicles. Storm tanks are among them. They were used as infantry support heavy vehicles. They destroyed buildings, fortifications, barricades etc.STURMPANZER IV BRUMMBAR built on PANZER IV chassis was one of them. It was armed with 150 mm StuH storm howitzer. From 1943 till 1945 BRUMMBAR took part in fights on all fronts. The publication is illustrated with unique 3D renderings by Samir Karmieha that show a lot of detail not only the external details of the vehicle, but also its inside. The book was also enriched with excellent modeling plans by Krzysztofa Muchy that satisfy even the most demanding readers.

Panzerkampfwagen IV Ausf. H and Ausf. J Łukasz Gładysiak,2017-03-19 This publication's aim is to bring together current knowledge on Pz.Kpfw. IV Ausf. H and Ausf. J tanks. During his research, the author has used literature in Polish, German and English. In order to provide the reader with selected episodes from the frontline service of these vehicles, the author also referred to memoirs and other archive sources. Dozens of photographs complete the book, including many taken during active service of both variants of the tank or shortly after its completion. There are also many unpublished photographs of Pz.Kpfw. IV Ausf. J tanks used by troops of the 10th SS Panzer Division Frundsberg, found in April 2011 in Kluczewo near Stargard, currently undergoing a major renovation under the supervision of specialists from the Museum of Polish Arms (Muzeum Oręża Polskiego) in Kołobrzeg. These are supplemented by three-dimensional digital illustrations of complete vehicles and their details.

Last Panzer Battles in Hungary Norbert Számvéber,2024-04-30 In the last phase of the Second World War the Sixth Panzer Army was the last army available to the German military leadership which was more or less intact and was capable of launching a major offensive. After it had been withdrawn from the Western front in the aftermath of the failed Ardennes counter offensive, it was replenished with men and gears as fully as was possible in the given circumstances, and as a result it almost regained its 1944 autumn strength. It would not have been a surprise if it had been deployed on German territory against the Allied troops advancing to Rhine, or in Silesia or in the Baltics or even if it had been sent as a reinforcement to the Army Group Vistula to defend the distant approaches to Berlin against the advancing Soviet army - reinforcement and fresh troops capable of launching counter offensives were desperately needed everywhere. But it happened otherwise: the Sixth Army was deployed in Hungary and participated in the Operation Spring Awakening, launched in the western part of the country on 6th of March, 1945. This was the last German big offensive in the course of the Second World War. Several questions come to mind about the operation. What were the goals originally set to be achieved by this seemingly pointless attack? What role was assigned to the once formidable German Panzer Corps? Is it true that the Soviet command used the same defense directives as had been used during the battle of Kursk in 1943 because they had proved to be viable then? What types of tanks and armored vehicles fight in West Hungary and in what numbers? How did the American made M4A2 tanks manned by Soviet crews fare against the much heavier German Panther and Tiger B tanks on the Hungarian soil? What were the losses on both sides in tanks and armored vehicles? To what extent can be the prompt and powerful response of the Soviet side - the offensive towards Vienna - evaluated as being successful? How did the Germans, the Soviets, the Hungarians and the Bulgarians use their tanks and armored vehicles in this operation? Besides giving a detailed chronological description of the events, the book tries to find answers to these questions. The facts extracted from the operational documents of the fighting sides have been supplemented with excerpts from diaries and memoirs, and even the maps have been drawn on the basis of the original ones. The author has explored some new archival sources kept in Russian archives and also incorporated some published Russian materials into his research that was neglected up until now by other researchers, along with some newly published German memoirs - all this has made possible to create a narrative of the events related to us by the author in hitherto unprecedented detail.
