Sauber-Mercedes C9 Ian Bamsey,2007-02-01 The Mercedes sports-prototype of the late 1980s arguably came closer than any other car of the era to recapturing the spirit of the original 'Silver Arrows' of the 1930s. This stunning, fully enclosed, twin turbo, V8 sports-racing car took on the might of Porsche and Jaguar, and, notwithstanding opposition from the likes of Aston Martin, Nissan and Toyota, beat them all! This book is a detailed analysis of the famous C9 racing car, built by the Swiss firm of Sauber, which brought the might of Mercedes back into international motor racing for the first time in over thirty years. The author was present at the time and enjoyed the keen cooperation of the engineers at the heart of the project.

The last Shelby Cobra Chris Theodore,2021-09-15 Carroll Shelby, legendary driving ace, race team owner, and designer of Shelby Cobra, Daytona, and Mustang GT350 classics is revered by automotive enthusiasts, yet little has been written about the last quarter century of Carroll Shelby's life. During that time Chris Theodore, VP at Chrysler and Ford, developed a close personal friendship with Carroll. The Last Shelby Cobra chronicles the development of the many vehicles they worked on together (Viper, Ford GT, Shelby Cobra Concept, Shelby GR1, Shelby GT500 and others). It is an insider's story about how Shelby came back to the Ford family, and the intrigue behind the five-year journey to get a Shelby badge on a Ford Production Vehicle. The author provides fresh insight and new stories into Shelby's larger-than-life personality, energy, interests and the many unpublished projects Carroll was involved with, up to his passing. Finally, the book describes their unfinished project, the Super Snake II Cobra, and the serendipitous circumstances that allowed to the author to acquire 'Daisy,' the last Shelby Cobra. To his many fans, Carroll Shelby was truly 'the most interesting man in the world.'

Scalextric Roger Gillham,2009-02-15 First published in 1981, this book has long been recognized as the 'bible of Scalextric', providing a complete catalogue of the cars and equipment produced. Now, for this seventh edition, the book has undergone a transformation, with a complete redesign and masses of new information about cars, sets and accessories produced around the world. As well as extra detail about earlier periods, there is full coverage of all the new Scalextric products launched in the four years that have elapsed since the previous edition. Now containing nearly 1,000 photographs, this book has become an extraordinarily detailed summary of everything in the world of Scalextric, written by an author who has been captivated by the subject for nearly 50 years.

Grand Prix Cars Denis Jenkinson,2015-10-02 " In compiling this brief history of Grand Prix racing, along with descriptions of the more successful cars, I have limited myself to the period since World War II as the present day Grand Prix cars are mostly derived from the development and design of the early post war years. Although many ideas were taking shape in the period of the mid-thirties – such as the use of De Dion rear axle layouts, independent front suspension systems and hydraulic brakes – the main interest lay in engine design under a free ruling on capacity. It was not until about 1950 that a renaissance began in chassis design for Grand Prix cars and from then on a great deal of knowledge was gained; enough in fact, to enable roadholding to become a very exact science rather than a hit-and-miss affair. This development in the chassis and the search for improved road holding and higher cornering power was accentuated by the beginning of the era of unsupercharged racing, when power outputs were severely curtailed and speed had to be found by other means ..." Can-Am Cars in Detail Pete Lyons,2010 The original Canadian-American Challenge Cup series lasted only 8 1/2 seasons, from 1966 into 1974, but what ground-shaking, car-shaping years those were. With minimal rules and lavish prize money, the Can-Am attracted top-flight teams and superstar drivers. It also encouraged innovation, and racing's most inventive minds brought out novel and astounding ideas. Chaparral, Lola, McLaren, Porsche and Shadow are among 22 of these epic machines revisited through stunning studio photography by Peter Harholdt and vivid descriptions by Pete Lyons, long considered the dean of Can-Am journalists.--Publisher's description.
