David Hackett Fischer

Bell 47/H-13 Sioux Helicopter Wayne Mutza, 2017-08 Famously pictured in the opening credits of the popular television series M.A.S.H., Bell's Model 47 helicopter was the first helicopter certified for civilian use in March 1946 and went on to serve a wide variety of military and civilian applications. With its signature bubble canopy, the Model 47, and particularly its H-13 Sioux military variant, served in both Korea and Vietnam. It became a stalwart in civilian aviation with a variety of uses: agricultural aerial sprayer, aerial firefighting, police work, aerial oil exploration, medevac, news coverage, and mail service. More than 5,600 Model 47s were built, many under license in Japan, Italy, and the United Kingdom. The type retains its popularity in the civilian market to this day.

Loach! Wayne Mutza, 2005-01 Don't be fooled by the small size of the H-6/Model 500 helicopter. In the scout role in Vietnam, OH-6As and their aircrew became legends for their high-risk work in the low-level environment. Wayne Mutza presents the small, dynamic helicopter's story in this well-written, superbly detailed, and lavishly illustrated volume. Much of the OH-6A's combat record in Vietnam is told in firsthand accounts. Mutza offers fascinating insight to the helicopter's controversial beginning, its development, and its service with the Army National Guard, the Army's flight demonstration team, worldwide operators, and law enforcement agencies. In addition, the reader is treated to an entire chapter devoted to the Little Birds of Special Operations. Also included are appendices with factual data, and more than sixty emblems. It's all here in this highly readable volume.

Albion's Seed David Hackett Fischer, 1991-03-14 This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are Albion's Seed, no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

Pattern Recognition William Gibson, 2004-06-24 'Part-detective story, part-cultural snapshot . . . all bound by Gibson's pin-sharp prose' *Arena* ----- THE FIRST NOVEL IN THE BLUE ANTI-TRILIOGY - READ ZERO HISTORY AND SPOOK COUNTRY FOR MORE Cayce Pollard has a new job. She's been offered a special project: track down the makers of an addictive online film that's lighting up the internet. Hunting the source will take her to Tokyo and Moscow and put her in the sights of Japanese hackers and Russian Mafia. She's up against those who want to control the film, to own it - who figure breaking the law is just another business strategy. The kind of people who relish turning the hunter into the hunted . . . A gripping spy thriller by William Gibson, bestselling author of *Neuromancer*. Part prophesy, part satire, *Pattern Recognition* skewers the absurdity of modern life with the lightest and most engaging of touches. Readers of Neal Stephenson, Ray Bradbury and Iain M. Banks won't be able to put this book down. ----- 'Fast, witty and cleverly politicized' *Guardian* 'A big novel, full of bold ideas . . . races along like an expert thriller' *GQ* 'Dangerously hip. Its dialogue and characterization will amaze you. A wonderfully detailed, reckless journey of espionage and lies' *USA Today* 'A compelling, humane story with a sympathetic heroine searching for meaning and consolation in a post-everything world' *Daily Telegraph* 'Electric, profound. Gibson's descriptions of Tokyo, Russia and London are surreally spot-on' *Financial Times*

Lurps Robert C. Ankony, 2008-10-21 Lurps is the revised edition of the memoir of a juvenile delinquent who drops out of ninth grade to chase his dream of military service. After volunteering for Vietnam, he joins the elite U.S. Army LRRP/Rangers—small, heavily armed long-range reconnaissance teams that patrol deep in enemy-held territory. It is 1968, and the Lurps find themselves in some of the war's hairiest campaigns and battles, including Tet, Khe Sanh, and A Shau. Readers witness all the horrors, humor, adrenaline, and unexpected beauty through the eyes of a green young warrior. Gone are the heroic clichés and bravado as compelling narrative and realistic dialogue sweep the reader along with a powerful sense that this is actually happening. This poignant coming-of-age story explores the social background that shaped the protagonist's thinking, his uncertain quest for redemption through increased responsibility, the brotherhood of comrades in arms, women and sexual awakening, and the baffling randomness of who lives and who dies.

Instrument Procedures Handbook Federal Aviation Administration (FAA), 2016-10-24 This handbook supersedes FAA-H-8261 -16, Instrument Procedures Handbook, dated 2014. It is designed as a technical reference for all pilots who operate under instrument flight rules (IFR) in the National Airspace System (NAS). It expands and updates information contained in the FAA-H-8083-15B, Instrument Flying Handbook, and introduces advanced information for IFR operations. Instrument flight instructors, instrument pilots, and instrument students will also find this handbook a valuable resource since it is used as a reference for the Airline Transport Pilot and Instrument Knowledge Tests and for the Practical Test Standards. It also provides detailed coverage of instrument charts and procedures including IFR takeoff, departure, en route, arrival, approach, and landing. Safety information covering relevant subjects such as runway incursion, land and hold short operations, controlled flight into terrain, and human factors issues also are included.

Flying Light Helicopters with the Royal Marines Robert Wilsey, 2021-10-30 Little has been written about Royal Marines rotary aviation, the small and select unit which operated light helicopters between 1965 and 1995. Officer and senior non-commissioned officer pilots had the unique privilege of being both Commandos and aviators, flying from warships and operating ashore in support of the Royal Marines. Initially called Unit Air Troops, which then coalesced into 3 Commando Brigade Air Squadron Royal Marines, they operated in hostile environments, including the Arctic, mountains, jungles and deserts. Robert Wilsey served in the Royal Marines from 1969 to 2000. Having qualified as a pilot he served through much of the existence of the Royal Marines Air Squadron, from a junior pilot right up to becoming its commanding officer. In this unique book, the author tells of the evolution and technological advances of Royal Marines aviation, flying the Westland Sioux, Scout, Gazelle, and, ultimately, Lynx helicopters. He describes the rigorous training undertaken, including flying from ships at sea, and of operating globally from Malta, Northern Ireland, the jungles of Brunei, the Pyrenees, Arctic Norway and, in 1991, Northern Iraq, protecting the Kurds during Operation Haven. Colonel Wilsey also describes the challenges of the British military's basic and advanced rotary flying training, from both a student's and flying instructor's perspectives. He explains the pressures of leading a flying display team and relates stories of accidents and incidents, many amusing, several chaotic and some tragic, previously unknown to the general public. This is a vivid first-hand account of military rotary wing flying which will appeal to aircrew both civil and military, aviation enthusiasts and military historians.

Geospatial Technology for Earth Observation Deren Li, Jie Shan, Jianya Gong, 2009-09-18 Earth Observation interacts with space, remote sensing, communication, and information technologies, and plays an increasingly significant role in Earth related scientific studies, resource management, homeland security, topographic mapping, and development of a healthy, sustainable environment and community. *Geospatial Technology for Earth Observation* provides an in-depth and broad collection of recent progress in Earth observation. Contributed by leading experts in this field, the book covers satellite, airborne and ground remote sensing systems and system integration, sensor orientation, remote sensing physics, image classification and analysis, information extraction, geospatial service, and various application topics, including cadastral mapping, land use change evaluation, water environment monitoring, flood mapping, and decision making support. *Geospatial Technology for Earth Observation* serves as a valuable training source for researchers, developers, and practitioners in geospatial science and technology industry. It is also suitable as a reference book for upper level college students and graduate students in geospatial technology, geosciences, resource management, and informatics.

We Are 'Nature' Defending Itself Isabelle ; Jordan Fremeaux (Jay), Jay Jordan, 2021 In 2008, as the storms of the financial crash blew, Isabelle Fremeaux and Jay Jordan deserted the metropolis and their academic jobs, traveling across Europe in search of post-capitalist utopias. They wanted their art activism to no longer be uprooted. They arrived at a place French politicians had declared lost to the republic, otherwise known as the *zad* (the zone to defend): a messy but extraordinary canvas of commoning, illegally occupying 4,000 acres of wetlands where an international airport was planned. In 2018, the 40-year-long struggle snatched an incredible victory, defeating the airport expansion project through a powerful cocktail that merged creation and resistance. Fremeaux and Jordan blend rich eyewitness accounts with theory, inspired by a diverse array of approaches, from neo-animism to revolutionary biology, insurrectionary writings and radical art history--

Staying with the Trouble Donna J. Haraway, 2016-08-19 In the midst of spiraling ecological devastation, multispecies feminist theorist Donna J. Haraway offers provocative new ways to reconfigure our relations to the earth and all its inhabitants. She eschews referring to our current epoch as the Anthropocene, preferring to conceptualize it as what she calls the Chthulucene, as it more aptly and fully describes our epoch as one in which the human and nonhuman are inextricably linked in tentacular practices. The Chthulucene, Haraway explains, requires sym-poiesis, or making-with, rather than auto-poiesis, or self-making. Learning to stay with the trouble of living and dying together on a damaged earth will prove more conducive to the kind of thinking that would provide the means to building more livable futures. Theoretically and methodologically driven by the signifier SF—string figures, science fact, science fiction, speculative feminism, speculative fabulation, so far—*Staying with the Trouble* further cements Haraway's reputation as one of the most daring and original thinkers of our time.

Tex Johnston A. M. "Tex" Johnston, 2014-12-02 One of America's most daring and accomplished test pilots, Tex Johnston flew the first US jet airplanes and, in a career spanning the 1930s through the 1970s, helped create the jet age at such pioneering aerospace companies as Bell Aircraft and Boeing.

Low Level Hell Hugh L. Mills, Jr., 2009-01-16 The aeroscouts of the 1st Infantry Division had three words emblazoned on their unit patch: Low Level Hell. It was then and continues today as the perfect concise definition of what these intrepid aviators experienced as they ranged the skies of Vietnam from the Cambodian border to the Iron Triangle. The Outcasts, as they were known, flew low and slow, aerial eyes of the division in search of the enemy. Too often for longevity's sake they found the Viet Cong and the fight was on. These young pilots (19-22 years old) "invented" the book as they went along. Praise for Low Level Hell "An absolutely splendid and engrossing book. The most compelling part is the accounts of his many air-to-ground engagements. There were moments when I literally held my breath."—Dr. Charles H. Cureton, Chief Historian, U.S. Army Training and Doctrine (TRADOC) Command "Low Level Hell is the best 'bird's eye view' of the helicopter war in

Vietnam in print today. No volume better describes the feelings from the cockpit. Mills has captured the realities of a select group of aviators who shot craps with death on every mission.”—R.S.

The Sikorsky Legacy Sergei I. Sikorsky,The Igor I. Sikorsky Historical Archives,2007 This book traces the history of Sikorsky aviation and its founder, Igor I. Sikorsky, one of the most talented and versatile aeronautical pioneers in history. Sikorsky's aviation career spanned over 60 years and was highlighted by three major achievements: the creation of the world's first four-engine airliner; the record-breaking Clipper Ships, with which Pan American Airways explored transpacific and transatlantic airline service; and the development of the helicopter. Sikorsky then led his engineers out of the piston-engine era and into the jet age with the design and development of some of the most widely used turbine-powered helicopters in aviation history. More than 200 photographs, many from the Sikorsky family archives, document the genius of Sikorsky's intuitive engineering and his lifelong interest in the challenge of the helicopter, which many historians consider to be his crowning achievement.
