F1 Mavericks Pete Biro, George Levy, 2019-08-06 F1 Mavericks is the story of the grandest, most influential, and most fondly remembered era in Formula 1 racing as seen through the lens of master motorsports photographer, Pete Biro. The period from 1960 to 1982 saw the greatest technological changes in the history of Formula 1 racing: the transition from front engines to rear engines, narrow-treaded tires, massive racing slicks, zero downforce, and neck-wrenching ground effects—and, of course, a staggering increase in performance and reduction in lap times. In short, the period saw the creation of the modern Formula 1 car. This is also the time when legendary names who defined F1 were out in full force: Jim Clark, Jack Brabham, Dan Gurney, Sir Jackie Stewart, Graham Hill, Niki Lauda, James Hunt, Bruce McLaren, Jody Scheckter. We'll see and meet all of them. But F1 Mavericks also focuses on the designers and engineers behind the cars—men like Colin Chapman, Sir Patrick Head, Maurice Philippe, Franco Rocchi, Gordon Murray, and many others. We'll hear directly from many of them, including a foreword from 1978 F1 World Champion, Mario Andretti. Every chapter is a photographic account of key races throughout the period, supplemented with sidebars featuring key designers and technologies, like wings, ground effects, slick tires, turbochargers, and the Brabham “fan” suction car. F1 Mavericks is an international story, and includes loads of information on designs from Japan (Honda), Britain (McLaren, Tyrrell, Cooper, BRM) Italy (Ferrari, Maserati, Alfa Romeo), France (Matra, Ligier, Renault), Germany (Porsche, BMW) and the United States (Eagle, Shadow, Penske, Parnelli). Strap yourself in for the story of the greatest era in Formula 1 racing—it's all here in F1 Mavericks.

The Archaeological Automobile Miles C Collier, 2021-09-30 Miles C. Collier asks: should we really let go of the vast amounts of collective knowledge that resides in automobiles? If not, how can we hold on to it? ● Archaeology isn't just about digging in grubby trenches. It is a way of thinking about the past and applying our imagination to the future. Miles C. Collier's remarkable analysis applies this thought process to cars. ● Miles C. Collier brings an archaeological point of view to the pithy matter of deciding how we understand and treat our automobiles, and how we pass this knowledge to generations to come. ● This book combines scholarship, pertinent anecdotes, style, and experience to provide a stimulating account of why we should all be archaeologists now.

Niki Lauda Jon Saltinstall, 2020-02-11 This is the story of Niki Lauda's racing career. Climbing the ladder: starting against his family's wishes with a Mini in 1968, Niki Lauda drove a Formula Vee Kaimann in 1969 and had a disastrous Formula 3 season with McNamara in 1970 before switching to a Porsche sports car; with progress stalling, he took out a loan to buy a Formula 2 seat at March in 1971. Faltering in Formula 1: he debuted with March at the 1971 Austrian Grand Prix, then stayed with the team in 1972; he moved to BRM for 1973, still paying his way with further borrowing and some income from racing touring cars — but in all this time he had only one points-scoring Formula 1 finish. The Ferrari years: finally Lauda fulfilled his promise after receiving the call to Maranello, winning the World Championship twice in his four years there, in 1975 and 1977, but he left after tensions with the team arose in his final season. The Brabham years: Lauda famously won the 1978 Swedish Grand Prix in Brabham's 'fan car.' but thereafter the team's competitiveness declined and he retired at the end of 1979, tired of driving round in circles' and focused instead on his new airline, Lauda

Air. The McLaren years: tempted by a salary of unprecedented size, Lauda returned in 1982 after a two-year absence, silenced doubters by winning his third race, and in 1984 secured his third World Championship; at the end of 1985, with a career tally of 25 Grand Prix victories, he hung up his helmet for good.

Introducing New Materials in the Automotive Industry Fredrik Henriksson,2017-11-15 Passenger vehicles are central to Western society, and contribute to a significant part of our greenhouse gas emissions. In order to reduce emissions, the automotive industry as a whole is working to reduce mass in passenger vehicles in order to reduce energy consumption. One way to reduce mass is to introduce lightweight materials in the body of the vehicle. This research aims to explore the relationship between product and production system when introducing new materials. Besides a theoretical review and an industry-centered technological mapping, four case studies have been conducted during the course of this licentiate thesis. Two case studies were conducted with engineering design students working as development teams, one case study with the author as the developer and finally one case study in an industrial environment at a product owning company with in-house production. The goal of the case studies has been to increase the collective knowledge of how product development decisions affect production development decisions, and vice versa, when developing passenger vehicles in new materials. In the following analysis of case study outcomes, a number of factors important for introducing new materials are discussed. The relationship between product and production is investigated, both in terms of how the production system affects the product and how the product affects the production system. The outcome from this analysis is a mapping of important factors for automotive industry companies to understand and identify when looking at introducing new materials in existing production systems. Finally, a suggestion for future research efforts is presented.

The Customer Centric Enterprise Mitchell M. Tseng, Frank Piller,2011-06-27 Companies are being forced to react to the growing individualization of demand. At the same time, cost management remains of paramount importance due to the competitive pressure in global markets. Thus, making enterprises more customer centric efficiently is a top management priority in most industries. Mass customization and personalization are key strategies to meet this challenge. Companies like Procter&Gamble, Lego, Nike, Adidas, Land's End, BMW, or Levi Strauss, among others, have started large-scale mass customization programs. This book provides insight into the different aspects of building a customer centric enterprise. Following an interdisciplinary approach, leading scientists and practitioners share their findings, concepts, and strategies from the perspective of design, production engineering, logistics, technology and innovation management, customer behavior, as well as marketing.

Team Lotus Andrew Ferguson,2008 Team Lotus took the Indianapolis 500 race by storm between 1963 and 1969. In a race previously dominated by home-grown American cars and drivers, double Formula 1 World Champion Jim Clark scored a stunning victory in 1965, and twice finished second in his Lotus cars powered by Ford engines. Here is the definitive inside story of how – encouraged by the great Dan Gurney – the tiny British Lotus team, headed by Colin Chapman, took aim at an icon of American sporting life and rewrote motor racing history.
