Noel Merrill Wien Noel Merrill Wien,2016-04-19 Born into a family of aviators, Merrill Wien was destined to become a pilot. His father, Noel Wien, was one of the first pilots to fly in Alaska and his life was full of firsts, including making the first round-trip flight between Asia and North America in 1929. His mother played a big role in the founding and development of Wien Alaska Airlines, the second-oldest scheduled airline in the United States and territories. One of the most versatile and experienced pilots of his time, Merrill has flown just about every aircraft imaginable from DC-3s to Lockheed 1011s to historic military planes like the cargo C-46 and B-29 bomber to the Hiller UH-12E chopper. Although fundamentally modest by nature, family and friends encouraged Merrill to share his remarkable stories given his accomplishments and experiences with so many famous people and events. His tone is engagingly informal as he recounts crossing paths with such luminaries as Joe Crosson, Howard Hughes, Lowell Thomas Sr. and Lowell Thomas Jr., Sam White, Don Sheldon, Brad Washburn, Wally Schirra, and Bill Anders. He re-creates for readers his firsthand experiences flying top-secret missions for the Air Force, viewing the devastation of the Good Friday Earthquake in Anchorage, and the challenges of starting his own helicopter company, to name just a few. His fascinating narrative is complemented by photographs from his personal archives.

Four overarching themes provide a suitable setting to examine the critical insights presented in the 31 chapters: Mobile- and sensor-based solutions Opportunities to incorporate critical aspects of analytics to provide superior insights and thus support better decision-making Critical issues around aspects of IoT in healthcare contexts Applications of portals in healthcare contexts A comprehensive overview that introduces the critical issues regarding the role of IoT technologies for health, *Delivering Superior Health and Wellness Management with IoT and Analytics* paves the way for scholars, practitioners, students, and other stakeholders to understand how to substantially improve health and wellness management on a global scale.

Integrating Multiscale Observations of U.S. Waters National Research Council,Division on Earth and Life Studies,Water Science and Technology Board,Committee on Integrated Observations for Hydrologic and Related Sciences,2008-04-16 Water is essential to life for humans and their food crops, and for ecosystems. Effective water management requires tracking the inflow, outflow, quantity and quality of ground-water and surface water, much like balancing a bank account. Currently, networks of ground-based instruments measure these in individual locations, while airborne and satellite sensors measure them over larger areas. Recent technological innovations offer unprecedented possibilities to integrate space, air, and land observations to advance water science and guide management decisions. This book concludes that in order to realize the potential of integrated data, agencies, universities, and the private sector must work together to develop new kinds of sensors, test them in field studies, and help users to apply this information to real problems.

Space-Age Acronyms Reta C. Moser,2012-12-06 Acronym agglomeration is an affliction of the age, and there are acronym addicts who, in their weakness, find it impossible to resist them. More than once in recent months my peers have cautioned me about my apparent readiness to use not only acronyms, but abbreviations, foreign isms, codes, and other cryptic symbols rather than common, ordinary American words. Many among us, though, either have not received or have chosen to ignore such advice. As a consequence, what we write and speak is full of mystery and confusion. It is then for the reader and listener and for the writer and speaker that Reta C. Moser has compiled this guide. Its effective application to the art of communication is urged. Such use should help avoid many of the misunderstandings involving terminology which occur daily. Although such misunderstandings are certainly crucial in humanistic and social situations, they are often of immediate import and the trigger to disaster in scientific, technical, and political situations. Some 15,000 acronyms and 25,000 definitions are provided (a 50- and 47 -percent increase over the 1964 edition!), with due credit to Miss Moser's diligence in making the compilation and with the acknowledgment that the acronymical phenomenon is very much with us. This edition, like the first, is certain to be of value to writers, librarians, editors, and others who must identify and deal with acronyms.
