**Manifesto** Dale Vince,John Robb,2020-11-26 Revealing, inspiring and funny. This book is a joy to romp through, which is good, because its final chapter is the important truth we all need to hear and understand if we are to survive this mess we've made - Chris Packham I found Manifesto enthralling, thought-provoking and I learnt so much from it. Nor had I any idea that we had our own Archimedes living in The Cotswolds. - Jilly Cooper How one maverick entrepreneur took on UK energy... and won. Dale Vince never intended to start a business. Driven by a passion for sustainability, he left school aged 15 and became a New Age traveller, living for free in a wind-powered double decker bus. But after building his first wind turbine, he realised that to change the world he needed to be on the grid, not off it. In 1996 he founded green energy company Ecotricity based on principles of social, financial and environmental sustainability, and changed the landscape of UK energy forever. Since then, Dale has been appointed a UN ambassador for climate issues, become the owner of the first ever vegan football club, and amassed a fortune of over £120 million built on sustainability. He has also been a vocal supporter of Extinction Rebellion which, like Ecotricity, is based in Stroud. In this book, he shares his single-minded and uniquely purpose-orientated approach to business, with lessons learned from experience that will speak to any fledgling entrepreneur. This is the story of a man whose unwavering mission to help save the environment has driven him all the way to the top, and a powerful manifesto for anyone who wants to change the world.

**Technologies and Approaches to Reducing the Fuel Consumption of Medium- and Heavy-Duty Vehicles** National Research Council,Transportation Research Board,Division on Engineering and Physical Sciences,Board on Energy and Environmental Systems,Committee to Assess Fuel Economy Technologies for Medium- and Heavy-Duty Vehicles,2010-08-30 Technologies and Approaches to Reducing the Fuel Consumption of Medium- and Heavy-Duty Vehicles evaluates various technologies and methods that could improve the fuel economy of medium- and heavy-duty vehicles, such as tractor-trailers, transit buses, and work trucks. The book also recommends approaches that federal agencies could use to regulate these vehicles' fuel

consumption. Currently there are no fuel consumption standards for such vehicles, which account for about 26 percent of the transportation fuel used in the U.S. The miles-per-gallon measure used to regulate the fuel economy of passenger cars. is not appropriate for medium- and heavy-duty vehicles, which are designed above all to carry loads efficiently. Instead, any regulation of medium- and heavy-duty vehicles should use a metric that reflects the efficiency with which a vehicle moves goods or passengers, such as gallons per ton-mile, a unit that reflects the amount of fuel a vehicle would use to carry a ton of goods one mile. This is called load-specific fuel consumption (LSFC). The book estimates the improvements that various technologies could achieve over the next decade in seven vehicle types. For example, using advanced diesel engines in tractor-trailers could lower their fuel consumption by up to 20 percent by 2020, and improved aerodynamics could yield an 11 percent reduction. Hybrid powertrains could lower the fuel consumption of vehicles that stop frequently, such as garbage trucks and transit buses, by as much 35 percent in the same time frame.

You don't need the deftness of a surgeon or the vocabulary of an old salt to build a model. What you need is an understanding coach. Mastini leads readers from the mysteries of choosing a kit and setting up a workshop through deciphering complicated instructions and on to painting, decorating, and displaying finished models--with patience and clarity, not condescension. He reveals dozens of shortcuts: How to plank a hull egg-shell tight; how to build and rig complicated mast assmeblies without profanity; how to create sails that look like sails. . . . And along the way he points out things that beginners usually do wrong--beforehand, not after they've taken hammers to their projects.
