T-62 Main Battle Tank 1965-2005 Steven J. Zaloga, 2011-03-15 The Soviet Army hastily developed the T-62 in a struggle to compete against the rapid proliferation of NATO tanks in the 1960s. It was essentially a modification of the widely-manufactured T-55 tank with the addition of a new 115mm gun. Within the USSR itself, the T-62 was quickly superseded, but it was widely exported, becoming a critical component of the Egyptian and Syrian armies in the 1973 Yom Kippur conflict and heavily influenced later designs of the M1 Abrams and Challenger tanks. In the first English-language history of this tank, Steven Zaloga examines the development of the T-62 using detailed combat descriptions to bring to life the operational history of this tank from the deserts of the Sinai to the harsh terrain of Afghanistan.

Red Armor: a History Paul Hofrichter, 2013-03-19 Merriam Press Military Monograph 163. Fifth Edition (March 2013). History of Soviet main battle tanks, primarily concerned with the T-34 of World War II, plus the T-44, T-54/55, T-62, T-64, T-72, T-80, and FST models. Coverage of the development history and technical aspects, as well as operational usage by the Soviets and many other countries. Performance characteristics as well as what the future held in terms of trends and models (such as the FST) prior to the Soviet Union's collapse. 196 photos and illustrations.

Soviet Cold War Weaponry Anthony Tucker-Jones, 2015-05-20 The T-54, T-62 and T-72 main battle tanks along with the personnel carriers, assault guns, self-propelled guns and anti-tank missiles that are illustrated in this photographic history represent the high point in the design and manufacture of armoured vehicles by the Soviet Union during the Cold War. Although the

superpowers never came to blows, the 'Cold War' was far from cold, as numerous 'hot' proxy wars were fought in Africa and the Middle East, and these conflicts employed the Soviet weaponry that is shown in action in the colour and black-and-white photographs selected for this book. Between the 1950s and 1980s Soviet and Warsaw Pact countries produced thousands of tanks and armoured vehicles ready for the Third World War. They embarked on a technological arms race with the NATO allies in an attempt to counter each new piece of equipment as it appeared in service. Much of this Soviet weaponry has achieved almost iconic status and, despite its age, remains in service with armies, guerrilla forces and terrorist organizations around the world today. It is also of enduring interest to collectors, re-enactors and modellers who are fascinated by the military equipment of the late twentieth century.

Soviet T-54 Main Battle Tank James Kinnear, Stephen Sewell, 2018-11-29 The menacing silhouette of the T-54 tank prowling down streets of Eastern European capitals or roaring across fields in massive exercises remains one of the most enduring images of Soviet power in the early years of the Cold War. Its sleek and unmistakable shape was a warning to any nation that wanted to stand against the USSR. Yet all of this masked a flawed, outdated design, and when T-54s began to clash with the Western armoured vehicles in proxy wars in Southeast Asia and the Middle East, they were found to be on the losing side of many of the battles. Containing over 500 stunning contemporary and modern photographs, and written by two experts on Soviet armour, this authoritative book tells the complete story of the T-54, one of the most widely produced tanks of all time, including many previously unheard of variants.

Soviet T-10 Heavy Tank and Variants James Kinnear, Stephen Sewell, 2017-06-29 When it was

introduced into service in 1953, the T-10 represented a return to the "classic" Soviet heavy tank. Although considered a major threat to NATO tank forces, it also represented the end of an era. All gun heavy tanks like the T-10 would eventually be made effectively redundant by later models like the T-62 which had powerful next generation armament and new ammunition types. The tank was gradually withdrawn from service in the 1970s, though the last tanks would only leave Russian service, by decree of the President of the Russian Federation, in 1997. As such the T-10 outlived the Soviet state that had created it. Never exported outside of the Soviet Union and rarely used in combat, the T-10 has remained a mysterious tank, with many of its variants unknown in the West until very recently. This study, written from original Russian and Ukrainian primary source documents that have only recently been made available, uncovers the history of this enigmatic tank using 130 stunning contemporary and modern photographs of the T-10 as well as full colour side-view artwork.

T-54/55 Anthony Tucker-Jones, 2017-10 The Soviet T-54/55 is probably the best-known tank of the Cold War, and it was produced in greater numbers than any other tank in history. It first went into service just after the Second World War and over 70,000 were made, and its design was so successful that it even outlasted its successor the T-62. For a generation it formed the backbone of the armored forces of the Warsaw Pact and it was exported all over the world, remaining in the front-line until the 1990s. This photographic history in the Images of War series by Anthony Tucker-Jones is the ideal introduction to it. In over 150 archive photographs and a detailed analytical text, he traces the design and development of the T-54/55 and records its operational history. He describes how it was conceived as a main battle tank, an

all-rounder, contrasting with the light, medium and heavy tanks produced in the past, and it proved to be extraordinarily effective. It was as adaptable as it was long-lasting, different versions being produced by China, Czechoslovakia, Poland and Romania. Its relatively simple design also meant it was easy to maintain even in difficult conditions and it was used by armies across the Third World, in particular in wars in Angola, Ethiopia, Mozambique and Somalia. Anthony Tucker-Jones's history of this remarkable armored vehicle will be absorbing reading for tank enthusiasts and a valuable source for modelers.

Kinnear, Stephen Sewell, 2019-09-19 The T-55 is one of the most iconic weapons created by the Soviets during the Cold War and also one of the most widely deployed weapons in history. Like its younger brother, the T-54, the T-55 enjoyed a long career in the Red Army and even into the early days of the reformed Russian Army. Under their control it saw very little combat use or deployments, but it was widely sold to other nations and participated in many of the wars and combat operations from the mid-1960s to the present. The T-55 has been employed in almost every conflict in the Middle East and Africa from its introduction into service. Even today the tank is still employed by both sides in the Syrian Civil War, and they are also in service with Kurdish forces in the struggle against ISIS in the northern part of Iraq. Containing more than 400 stunning contemporary and modern photographs, and written by two experts on Soviet armour, this authoritative book tells the complete story of the T-55, one of the most widely produced tanks of all time.

Russian Tanks of World War II Tim Bean, Will Fowler, 2002 At the start of the campaign on the Eastern Front, in the earliest days of Operation

Barbarossa, it was the German armour that swept all in front of it as the Wehrmacht drove eastwards in an unrelenting advance on Leningrad, Moscow and Stalingrad. The ill-prepared and under-resourced Russian forces were forced to retreat. Gradually, the balance of the war swung in favour of the Russian forces, whose strength both in numbers and equipment proved decisive in the ultimate defeat of the German forces in the east. Critical in the Soviet victory was its armour; tanks such as the T-34 proving the equal, if not better than, some of the tanks available to the Germans. This authoritative history of the Soviet forces before and during World War 2, reveals the development of their tactics in the early post-revolutionary era right through to the ultimate victory in Berlin in May 1945. The dramatic struggle of the tank crews against the German advance is told through some 200 contemporary photographs, many of which have never been seen before. The photographs include images of tank training in the 1920s and 1930s, on active service, and many compelling pictures from some of the major tank battles of the day. Over the past five years, aided by the opening up of archives in Russia previously closed to western experts, there has been a massive growth in interest in the events that occurred on the Eastern Front. Russian Tanks is an important addition to the literature currently available, exploring as it does, the vitally important Soviet armour of the period.

Soviet Tank Company Tactics Defense Intelligence Agency, 2019-07-25 Soviet Tank Company Tactics, May 1976 We were surprised to find there were no clean copies in print so we decided to reconstitute the report as best we could. Unfortunately, the photos are not very good and the originals are nowhere to be found, so we did not replace them. Rather than change the document, we decided to add a new document at the end that would show current (2019) Russian tanks and include what little information is available. As far as tactics go, not really sure how the new tanks, such as the T-14 will cause changes to Russian tank tactics but some of the information is still valid today, such as the use of snorkel, night vision and the effects of poor weather conditions. You will note that we added some additional information regarding Russian New Generation Warfare (RNGW), 4th Generation Warfare, Hybrid War, and new Russian weapons at the end including: - 1K17 Szhatie (1K17 Сжатие) Russian Stiletto Laser Tank - Combat Laser System (Peresvet) Russian Laser Cannon - T-14 Armata Main Battle Tank - T-15 Heavy Infantry Combat Vehicle - Kurganets-25 Light Tracked Armored Vehicle - 2S35 Koalitsiya-SV 152-mm Self-Propelled Howitzer - VPK-7829 Bumerang Modular Infantry Wheeled Fighting Vehicle Why buy a book you can download for free? We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the

latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright material. T-72 Soviet Main Battle Tank Steven J. Zaloga, 1990-01-01

T-64/T64a Albert Osiński, 2009-12-15 * Includes free decals and masking foil * Packed with color photos The T-64 is a Soviet main battle tank, introduced in the early 1960s. It was used solely by the Soviet Army in its front-line divisions and was a more advanced counterpart to the T-62. Although the T-62 and the famed T-72 would see much wider use and generally more development, it was the T-64 that formed the basis of more modern Soviet tank designs like the T-80. A revolutionary feature of the T-64 is the incorporation of an automatic loader for its 115-mm gun, allowing a crew member's position to be omitted, and helping to keep the size and weight of the tank down. The T-64 also pioneered other Soviet tank technology, starting when the T-64A model of 1967 introduced the 125-mm smoothbore gun. This album of detailed photographs is invaluable for the modeler or

enthusiast alike. All photo captions are in English with a Polish summary provided. About the Series This is a classic series of highly illustrated books on the best machines of war, with several hundred photographs of each aircraft or vehicle. With close-up views of the key features of each machine, including its variations, markings and modifications, customizing and creating a model has never been easier. Includes extra features such as decals and masking foil.

T-54/55 Robert Jackson, 2019-02-20 During the Cold War, the T-54/55 series of tanks represented the most serious threat to Nato land forces in Europe. Available in huge quantities, it formed the core of the Warsaw Pact armored warfare doctrine, which envisaged massed tank attacks against the weakest point in Nato's front-line defenses. Yet the T-54/55 could be stopped by smaller numbers of tanks which had the benefit of better technology and training, as was demonstrated during the Yom Kippur War of 1973 when Israeli tanks dealt out appalling punishment to T-55s of the Syrian army. Despite these limitations, the T-54/55 was one of the most successful tanks ever produced, and this volume in the TankCraft series by Robert Jackson is the ideal introduction to it. As well as tracing the history of the T-54/55, his book is an excellent source of reference for the modeler, providing details of available kits and photographs of award-winning models, together with artworks showing the color schemes applied to these tanks. Each section of the book is supported by a wealth of archive photographs.

Light Tanks Mikhail Baryatinskiy, 2006 It is one of the ironies of Soviet tank development that a country opposed to free enterprise and capitalism was largely reliant on influences from Britain and the USA for many of its early designs. However, unhindered by many of the tactical constraints that affected tank development in the West, the Red Army was able to acquire and develop technology that was under-rated in both Britain and the USA. From Britain, the famous manufacturer Vickers produced a Six-Ton light tank; effectively rejected by the War Office, one example was acquired by the Russians and this formed the basis of the Russian T-26 of 1931. Further British designs also influenced the later light tanks, equipment which was pivotal to the Red Army during its campaigns in Manchuria, Finland and against the initial German assault in 1941. In the USA, Walter Christie was also largely ignored as a designer but, as with Vickers, his designs came to be highly important. His influence was seen in the 'BT' - short for 'Bystrochodri' or 'Fast Tank' - series of light-medium tanks that was first introduced in 1932. The BT series saw service in Spain, Manchuria, Finland and in the defense of Russia itself in 1941. The critical aspect of the Christie design was that the vehicles were capable of operating both with nor without tracks; in the latter case eight road wheels carried the weight of the vehicle, with steering being achieved via a steering wheel acting in conjunction with the clutch/brake system. In the second of the new 'Soviet Tanks' series, Mikhail Baryatinsky provides the reader with a comprehensive account

of the development and operational record of Soviet light tanks. Utilizing photographs, line drawings and specially prepared artworks, he provides a detailed portrait of these highly successful tanks. Aimed at the modeler, military historian and war gamer, the new 'Soviet Tanks' series is designed to provide, probably for the first time in the English language, authoritative information on the classic Soviet tank designs of the 20th century. The series will be required reading for all those interested in the development of armored warfare over the past 100 years.

Soviet Night Operations in World War II Claude R. Sasso, 1982

The Dynamics of Doctrine Timothy T. Lupfer, 1981 This paper is a case study in the wartime evolution of tactical doctrine. Besides providing a summary of German Infantry tactics of the First World War, this study offers insight into the crucial role of leadership in facilitating

doctrinal change during battle. It reminds us that success in war demands extensive and vigorous training calculated to insure that field commanders understand and apply sound tactical principles as guidelines for action and not as a substitute for good judgment. It points out the need for a timely effort in collecting and evaluating doctrinal lessons from battlefield experience. --Abstract.
