*Achtung-Panzer!* Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

"Although a large number of technical books deal with certain aspects of the internal combustion engine, there has been no publication until now that covers all of the major aspects of diesel and SI engines." Dr.-Ing. E. h. Richard van Basshuysen and Professor Dr.-Ing. Fred Schäfer, the editors, "Internal Combustion Engines Handbook: Basics, Components, Systems, and Perspectives"

Transition to Hydrogen Fuel Cell Vehicles Selim Koca,2010 Achieving a successful transition to hydrogen-powered vehicles in the U.S. automotive market will require strong and sustained commitment by hydrogen producers, vehicle manufacturers, transporters and retailers, consumers and governments. The interaction of these agents in the marketplace will determine the real costs and benefits of early market transformation policies, and ultimately the success of the transition itself. Furthermore, the transition to hydrogen-powered transportation faces imposing economic barriers. The authors of this book analyse the hydrogen infrastructure analysis and deployment scenarios, policy options for supporting hydrogen energy infrastructure and vehicle developments during the transition to they hydrogen fuel cell vehicles, and the costs of implementing selected policy options to encourage the transition to hydrogen. This book consists of public documents which have been located, gathered, combined, reformatted, and enhanced with a subject index, selectively edited and bound to provide easy access.

*Emerging-market Multinational Enterprises in East Central Europe* Ágnes Szunomár,2021-12-08 The rise of multinational enterprises (MNEs) from emerging markets is topical, important and poses a number of questions and challenges that require considerable attention in the future from academia as well as business management. The recent takeovers of high-profile companies in developed or developing countries by non-European emerging-market MNEs (EMNEs) – such as Lenovo, Wanhua (China), Hindalco (India), CVRD (Brazil), Cemex (Mexico), Lukoil (Russia), etc. – as well as the greenfield or brownfield investments of emerging companies (such as Huawei, ZTE, Tata, Pepco, etc.) show a new trend where new kind of firms become major players globally. EMNEs have become important players in several regions around the globe, ranging from the least developed countries of Africa through the developing markets in Latin America and Asia to the developed countries of the United States or the European Union, including East Central European (ECE) countries. EMNEs presence on the global level has resulted in numerous studies in the international literature but those research results barely cover EMNEs' activities in the ECE region (in the East Central European EU member countries, including the Czech Republic, Hungary, Poland, Slovakia and Slovenia). The existing books typically focus on the investment activity of a single country or region (such as China or East Asia) but a comprehensive analysis is still missing in this regard. The novelty of this edited volume is that it aims at exploring EMNEs location determinants, strategies, activities and challenges in East Central Europe by discussing its anomalies to the traditional theories as well as to other types of MNEs in the ECE region. The authors focus on EMNEs not only from China but from other important emerging countries, too, such as Russia, India, South Korea, Taiwan, Turkey, Brazil or South Africa.
