Kawasaki Ki-61 Hien / Ki-100 Leszek A. Wieliczko,2015-01-22 The Kawasaki Ki-61 Hien or Type 3 Fighter remains to this day one of the most recognizable Japanese fighters of the World War II era. What makes Hien unique is the powerplant - it was the only mass-produced Japanese fighter powered by an inline, liquid cooled engine. The Ki-61 began to arrive at the frontlines in large numbers in the summer of 1943 and took part in battles over New Guinea and later over the Philippines and Okinawa, as well as in the defense of the Japanese Home Islands. In total over 3,000 examples of various Ki-61 variants and derivatives were built. The Ki-100, a Ki-61-II Kai airframe mated to the Mitsubishi Ha-112-II radial engine, entered service towards the end of the war.

Ki-61 and Ki-100 Aces Nicholas Millman,2015-11-20 This is the story of the elite Japanese Army Air force (JAAF) aces that flew the Kawasaki Ki-61 Hien (Swallow), and the Ki-100 Goshikisen in the Pacific Theatre of World War 2. The former, codenamed 'Tony' by the allies, was a technically excellent aircraft, possessing power, stability and a good rate of climb - differing radically from the usual Japanese philosophy of building light, ultra-maneuvrable fighters. Its pilots soon realised, however, that the type was plagued by a number of dangerous mechanical issues. Then as the war moved relentlessly closer to Japan's doorstep, a desperate, expedient innovation to the Ki-61 airframe by fitting it with a radial instead of inline engine resulted in one of the finest fighters of World War 2 - the Ki-100. This book uses the latest findings to provide a gripping account of some of the most remarkable and hard-pressed fighter pilots of the war. It reveals how these men, unlike so many of their unfortunate late-war colleagues, could surprise Allied aircraft in high-performance fighters and claim successes in the face of enormous odds.

You Suck at Racing Ian Korf,2016-05-12 A lot of books on driving are written by professional racers who assume you too want to be a professional racer. Not this book. It's written by a hobbyist who suggests you keep your day job. Besides, it's much more fun being an enthusiastic amateur than a jaded professional (just ask someone in the sex industry). This book is designed to help the average driver make the transition from commuter to safe road racer in as few pages as possible. I wrote this book because it's what I would have wanted to read when I first became interested in track driving: succinct, nerdy, practical, and occasionally diverting. It is not intended as a definitive tome or a work of art. It's more like a sandwich: convenient and nourishing.

Bombers Over Japan Keith Wheeler,Time-Life Books,1998 Profusely illustrated text documents the decisive part played by bombers in bringing about the ultimate capitulation of Japan in World War II.

Japanese Army Air Force Units and Their Aces, 1931-1945 Ikuhiko Hata,Yasuho Izawa,Christopher Shores,2009-04-21 An extensive guide to Japan's Army Air Force Units and their ace pilots during conflicts in the 1930s and '40s, now in English. Commencing with a detailed study of the development, equipment, and operations flown by this force since its inception immediately after the end of World War I, until the catastrophic conclusion of World War II, the initial section deals with the wars in China and Manchuria, as well as the Pacific War of 1941-1945. The second section explores the history of each unit, listing the types of aircraft used, the bases from which they flew, and the unit and formation commanders. Notable mission details are also included. Finally, the third section offers biographical notes for notable fighter pilots and features supporting listings and a glossary of Japanese terms. Photographs of pilots and aircraft are also included, along with line drawings indicating the unit markings carried. This revised edition is a companion volume to Japanese Naval Air Force Fighter Units and Their Aces, 1932-1945.

China's Wings Gregory Crouch,2012-02-28 From the acclaimed author of *Enduring Patagonia* comes a dazzling tale of aerial adventure set against the roiling backdrop of war in Asia. The incredible real-life saga of the flying band of brothers who opened the skies over China in the years leading up to World War II—and boldly safeguarded them during that conflict—China's Wings is one of the most exhilarating untold chapters in the annals of flight. At the center of the maelstrom is the book's courtly, laconic protagonist, American aviation executive William Langhorne Bond. In search of adventure, he arrives in Nationalist China in 1931, charged with turning around the turbulent nation's flagging airline business, the China National Aviation Corporation (CNAC). The mission will take him to the wild and lawless frontiers of commercial aviation: into cockpits with daredevil pilots flying—sometimes literally—on a wing and a prayer; into the dangerous maze of Chinese politics, where scheming warlords and volatile military officers jockey for advantage; and into the boardrooms, backrooms, and corridors of power inhabited by such outsized figures as Generalissimo and Madame Chiang Kai-shek; President Franklin Delano Roosevelt; foreign minister T. V. Soong; Generals Arnold, Stilwell, and Marshall; and legendary Pan American Airways founder Juan Trippe. With the outbreak of full-scale war in 1941, Bond and CNAC are transformed from uneasy spectators to active participants in the struggle against Axis imperialism. Drawing on meticulous research, primary sources, and extensive personal interviews with participants, Gregory Crouch offers harrowing accounts of brutal bombing runs and heroic evacuations, as the fight to keep one airline flying becomes part of the larger struggle for China's survival. He plunges us into a world of perilous night flights, emergency water landings, and the constant threat of predatory Japanese warplanes. When Japanese forces capture Burma and blockade China's only overland supply route, Bond and his pilots must battle shortages of airplanes, personnel, and spare parts to airlift supplies over an untried five-hundred-mile-long aerial gauntlet high above the Himalayas—the infamous “Hump”—pioneering one of the most celebrated endeavors in aviation history. A hero's-eye view of history in the grand tradition of Lynne Olson's *Citizens of London*, China's Wings takes readers on a mesmerizing journey to a time and place that reshaped the modern world.

The B-29 Superfortress Chronology, 1934-1960 Robert A. Mann,2010-01-19 The Boeing B-29 Superfortress lived an operational life of only 26 years, but what a life it was. The introduction to this book provides basic information on the physical plane: dimensions, specs, leading particulars and operational usages. Then an exhaustive day-by-day chronology of the B-29 is presented—from the earliest designs in 1934 through thousands of missions and aircraft events in World War II and Korea to the 1960 retirement of the last operational B-29. The book also includes an extensive glossary and three appendices, which provide a discussion of the general anatomy of a mission, a sample of operational voice or radio codes used in 1945, and a guide to (very unofficial) aircraft names.

The Illustrated Encyclopedia of Combat Aircraft of World War II Bill Gunston,1978 Contains more than seven hundred illustrations of military aircraft of World War II used by both Allied and Axis Countries, together with capsule specifications and history

B-29 Hunters of the JAAF Koji Takaki,Henry Sakaida,2012-10-20 B-29! No other term struck such terror in the hearts of the Japanese public during World War 2 than this single, most-hated name. It was then only natural that the pilots who attempted to shoot these high-flying Boeing bombers out of the skies over Tokyo, Nagasaki, Hiroshima and Kobe should become known as the elite of the Japanese Army Air Force. This book details the exploits of the 'Dragon Slayers' who, flying the very latest singleand twin-engined fighters, exacted a heavy toll on the AAF Boeing bombers using a range of tactics including ramming.

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World

War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Kamikaze, Cherry Blossoms, and Nationalisms Emiko Ohnuki-Tierney,2010-10-01 Why did almost one thousand highly educated student soldiers volunteer to serve in Japan's tokkotai (kamikaze) operations near the end of World War II, even though Japan was losing the war? In this fascinating study of the role of symbolism and aesthetics in totalitarian ideology, Emiko Ohnuki-Tierney shows how the state manipulated the time-honored Japanese symbol of the cherry blossom to convince people that it was their honor to die like beautiful falling cherry petals for the emperor. Drawing on diaries never before published in English, Ohnuki-Tierney describes these young men's agonies and even defiance against the imperial ideology. Passionately devoted to cosmopolitan intellectual traditions, the pilots saw the cherry blossom not in militaristic terms, but as a symbol of the painful beauty and unresolved ambiguities of their tragically brief lives. Using Japan as an example, the author breaks new ground in the understanding of symbolic communication, nationalism, and totalitarian ideologies and their execution.

Twelve Years a Slave Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US,on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Japanese Anti-Submarine Aircraft in the Pacific War Ryusuke Ishiguro,2018 Japanese Anti-Submarine aircraft are not well known, and not very well covered in the literature. This book is the first in English on this subject. Details are provided of a wide selection of historic machines and fascinating color schemes, as well as full technical details. Described aircraft: * Aichi E13A Reisu (Jake) * Aichi H9A * Kawanishi E7K (Alf) * Kawanishi H6K (Mavis/Tillie) * Kawanishi H8K (Emilly) * Mitsubishi G3M (Nell) * Mitsubishi G4M (Betty) * Nakajima B5N (Kate) * Nakajima B6N Tenzan (Jill) * Kyushu Q1W Tokai (Lorna) * Q1W1-K Tokai Ren * Mitsubishi Q2M Taiyo * Kyushu K11W Shiragiku * Kyushu Q3W Nankai * Kayaba Ka-Go * Kokusai Ki-76 (Stella) * Kobeseiko Te-Go * Mitsubishi Ki-51 (Sonia) * Nakajima Ki-49 Donryu (Helen) * Tachikawa Ki-36 (Ida) * Tachikawa Ki-54 (Hickory)

Japanese Air Forces Over the NWA 1942-1945 Robert Neville Alford,2011-01

Japanese Aero-Engines 1910-1945 Mike Goodwin,2017 In this book the authors have endeavored to remedy the notable lack of comprehensive coverage. The development of all the many engines produced by Japanese aero-engine manufacturing companies from 1912 to 1945 is explored in detail, including a full explanation of the different systems used to identify them. Furthermore, the developments are related to the aircraft in which the various engines were used, including prototypes, flying test-beds, and changes in the make or type of engine during an aircraft's operational service. In other words aircraft evolution in Japan is viewed in snapshots as it happened from the aero-engine aspect and not from the complete aircraft aspect as is featured in most publications. Unfortunately this approach necessitates numerous cross-references in the text where several different engines are associated with a particular aircraft, for which the authors can only apologize. Lastly, to illustrate the industrial background, the origin and development of each of the aero-engine manufacturing companies is also outlined briefly
