**Macchi C. 202 Folgore** Davide F. Jabes, Alessandro Romanello, Niccolo Tognarini, 2022-02-03 The Macchi C.202 was probably the most successful Italian fighter in WW2, the aircraft of almost all Italian top scoring aces. Mc.202 was fast and manoeuvrable, on par with, or better than the allied fighters of the same period. However, there were too few machines to exert a determinant role during the war due to inadequate planning and resources.

*Macchi C.202 Folgore* Davide F. Jabes, Alessandro Romanello, Niccolò Tognarini, 2021-12-02 The Macchi C.202 was probably the most successful Italian fighter during the Second World War. It is generally agreed that the performance of the Macchi was superior to both the Hawker Hurricane and the Curtiss P-40 Kittyhawk and on a par with the Supermarine Spitfire Mk. V. It is not by chance that virtually all the Italian top scoring aces flew this plane either with the Regia Aeronautica or the Aeronautica Nazionale Repubblicana. At the same time, the Mc.202 is the symbol of the dysfunctions in the Italian military-industrial complex: the lack of sound industrial planning resulting in orders from the Regia Aeronautica for an exaggerated number of different aircraft; the lack of the development of adequate engines limiting aircraft performance and reducing capacity to house weapons with a proper punch; the corruption of politics and the culpable connivance of the high military spheres. The Mc.202 was therefore produced in limited numbers, while there is consensus that air war, especially in the African theatre, would have been different had the aircraft been adopted before.

Macchi C. 202 Folgore 3rd Edition Przemyslaw Skulski, 2020-11-15 Third edition, revised and extended. The development of the most famous Italian WWII fighter is described and illustrated. Combining the agility and

excellent flying characteristics of the earlier MC.200 with a powerful German aero-engine, the Folgore was the best Italian fighter in large-scale service. It served with the Regia Aeronautica and other forces, including the Croatian air arm. This book describes the design, development and operations of this elegant and effective fighter. This expanded 3rd edition contains: scale plans, photos and drawings from Technical Manuals, superb colour illustrations of camouflage and markings, and rare b&w archive photographs. Colour photos of the preserved aircraft illustrate all aspects of the airframe. Essential reading for aviation enthusiasts & scale aeromodellers.

*Macchi C.202/C.205V Units in Combat* Marco Mattioli, 2022-05-26 A study of the Macchi Folgore and Veltro, the most successful Italian fighters in World War II. With specially commissioned profiles, the book examines how these fighters were conceived, their performance and the fascinating stories of their pilots. Italian fighters, such as the Fiat G.50 and Macchi C.200, had always struggled with their straight-line speed and restricted armament when engaging their Allied counterparts. To solve these problems, Macchi initially designed the C.202 Folgore using German engines, which contributed to create a faster aircraft, with a superior rate of climb and reachable altitude. Folgore's success in various North African engagements then paved the way for the development of Macchi's most successful fighter, the C.205V Veltro, which managed to combine increased speed and increased power. Packed with specially commissioned artwork and original photos, and written by Italian military aviation specialist Marco Mattioli, this fascinating book explores how the premier Italian fighter of the war came to life and the historical circumstances that prevented it from becoming one of the most dreaded aircraft in the Mediterranean.

**Macchi MC.202 Folgore** Przemyslaw Skulski, 2012-12-24 second edition, revised and extended. The development of the most famous Italian WWII fighter is described and illustrated. Combining the agility and excellent flying characteristics of the earlier MC.200 with a powerful German aero-engine, the Folgore was the best Italian fighter in large-scale service. It served with the Regia Aeronautica and other forces, including the Croatian air arm. This book describes the design, development and operations of this elegant and effective fighter. This expanded 2nd edition contains: scale plans, photos and drawings from Technical Manuals, superb color illustrations of camouflage and markings, and rare b/w archive photographs. Color photos of the preserved aircraft illustrate all aspects of the airframe. Essential reading for aviation enthusiasts & scale aeromodelers.

**Macchi C.200 Saetta** Jose Fernandez, 2012-10-01 The Macchi C.200 Saetta (also variously identified as the MC.200) was a WWII fighter aircraft built by Aeronautica Macchi in Italy, and used in various forms throughout the Regia Aeronautica (Italian Air Force). The C.200 had excellent maneuverability and the general flying characteristics left little to be desired. The design, development and operations of these aircraft is told in detail, illustrated with many previously unpublished photos. Color schemes and markings are described and illustrated. Scale plans in 1/72nd and 1/48th. The author is a renowned aviation historian, with many books in both French and English to his name.

**Spitfire V vs C.202 Folgore** Donald Nijboer, 2014-04-20 The inability of the Italians and Germans to invade Malta proved decisive for Allied victory in the Mediterranean during World War II, as the islands provided the Allies

with a base from which to project air power. Early Italian efforts to pound the islands into submission were supplemented by major German forces from January 1942 and in a few weeks the situation for the defenders reached a critical stage; in response, in March 1942 the first Spitfires were delivered to Malta. Throughout the summer C.202s fought over Malta, escorting tiny formations of Cant Z.1007s, SM.79s and Ju 88s. The fighting subsided in August and September, but grew in strength with the arrival of more C.202s. In October the Regia Aeronautica could muster three Gruppi with a total of 74 C.202s. For ten days the Italians pressed a relentless attack before attrition brought the offensive to a halt. Throughout the bombing campaign the British were able to supply Malta with ever increasing numbers of Spitfires.

*You Suck at Racing* Ian Korf,2016-05-12 A lot of books on driving are written by professional racers who assume you too want to be a professional racer. Not this book. It's written by a hobbyist who suggests you keep your day job. Besides, it's much more fun being an enthusiastic amateur than a jaded professional (just ask someone in the sex industry). This book is designed to help the average driver make the transition from commuter to safe road racer in as few pages as possible. I wrote this book because it's what I would have wanted to read when I first became interested in track driving: succinct, nerdy, practical, and occasionally diverting. It is not intended as a definitive tome or a work of art. It's more like a sandwich: convenient and nourishing.

*Japanese Battleships* Robert Brown,2016-10-10 This fully illustrated guide offers historical context and step-by-step instruction for building and

modifying Japanese battleship models. This volume in the ShipCraft series covers the two related classes of Japanese 14in-gunned battleships, originally built during the First World War but subsequently reconstructed. These ships are famous for their towering forward superstructure, usually described as a pagoda bridge, that they featured when rebuilt. The Ise-class ships underwent further reconstruction during the Second World War to emerge as a unique hybrid of battleship and aircraft carrier to compensate for fleet carriers sunk earlier in the war. This lavishly illustrated guide takes readers through a brief history of the Fuso-class and Ise-class ships, highlighting differences between sisterships and changes in their appearance over their careers. It features color profiles of paint schemes as well as detailed line drawings and scale plans. The modelling section reviews the strengths and weaknesses of available kits, lists commercial accessory sets for super-detailing, and provides hints on modifying and improving the basic kit. This volume also includes a photographic survey of selected high-quality models in a variety of scales and a section on further research references

Italian Aces of World War 2 Giorgio Apostolo, 2012-12-20 Flying aircraft such as the Macchi 200-202, Fiat G.50 and biplane Fiat CR.42, the Italian fighter pilots were recognised by their Allied counterparts as brave opponents blessed with sound flying abilities, but employing under-gunned and underpowered equipment. Following the Italian surrender in September 1943, a number of aces continued to take the fight to the Allies as part of the Luftwaffe-run ANR, which was equipped with far more potent equipment such as the Bf 109G, Macchi 205V and Fiat G.55. Flying these types, the handful of ANR squadrons continued to oppose Allied bombing raids on northern Italy until VE-Day.

**Fiat CR.32 Aces of the Spanish Civil War** Alfredo Logoluso, 2013-02-20 The CR.32 Falco was a handsome and highly manoeuvrable biplane fighter. During General Franco's fight with the Republicans for the control of Spain from 1936 - 39, no fewer than 477 CR.32s were involved, with an astounding 709 confirmed aerial victories, and an additional 320 kills claimed, for just 62 losses. As these statistics reveal, the CR.32 was the unrivalled master of the skies over Spain. By the war's end, the five leading aces of the conflict were all Spanish CR.32 pilots. Their exploits, and those of the other leading CR.32 aces, are examined for the first time in English in this exciting volume.

**Fiat G.55 Centauro** Eduardo Manuel Gil Martínez, 2021-03-23 The Hungarian Army made serious efforts to build up an independent, national war industry, which was able to supply the Army with modern armaments and equipment during the war.

**P-38 Lightning Aces of the 82nd Fighter Group** Steve Blake, 2012-07-20 When the 82nd Fighter Group was organized in March 1942, most of its initial pilot cadre was comprised of newly graduated staff sergeant pilots of Class 42-C - enlisted men! They learned to fly the P-38 at Muroc, in California's Mojave Desert, and then moved to the Los Angeles area to continue their training and to serve as part of its air defence. In September 1942 the group was transported to the East Coast, from where it shipped out to Ireland on the Queen Mary. By this time all its remaining sergeant pilots had been commissioned. As of VE-Day the 82nd Fighter Group's score of confirmed aerial victories stood at 548 aircraft shot down, plus a huge amount of enemy materiel - including aircraft - destroyed on the ground and the sea. It had been awarded three Distinguished Unit Citations. The cost of this success was

high, however, for around 250 of the group's pilots had either been killed in action or captured.

*Defying Hitler* Gordon Thomas,Greg Lewis,2019 Nazi Germany is remembered as a nation of willing fanatics, but countless Germans actively resisted Hitler. No matter how small the act, the danger was the same: any display of defiance was met with arrest, interrogation, torture, and even death. Thomas and Lewis follow the underground network of Germans who believed standing against the Fuhrer to be more important than their own survival. Their bravery is astonishing, and the authors illuminate their struggles, yielding an accessible narrative history with the pace and excitement of a thriller. -- adapted from jacket.

**Topgun Days** Dave Baranek,2012-10-01 The fascinating history of one man's rise from naval flight officer toHollywood hero.

StuG III Brigade 191, 1940-1945 Bruno Bork,2021-12-08 An illustrated history of one brigade of German World War II armored fighting vehicles and the action they saw along the Eastern Front. Based on their experiences during the First World War, the Reichswehr decided that the infantry support gun of the future should be an armored, motorized vehicle with an effective caliber of cannon: the Sturmgeschütz III. The weapon was used in the “fire brigade role” at hotspots along the Front, where it was much feared by enemy forces. This illustrated volume tells the tale of Brigade 191, aka the

"Buffalo Brigade," who used the Sturmgeschütz III as they took part in Operation Barbarossa in the Ukraine, saw action during the fight for Greece in 1941 and were deployed to the areas of heaviest fighting in the campaign against the Soviet Union. This began with the infantry advance from Ukraine to Moscow (1941): then to Voronezh, Kursk, the Caucasus, and Kuban (1942), then the Kertsch Peninsula and the Crimea (1943-1944), before they were finally evacuated from Sevastopol into Romania by naval lighters. On the South-east Front (the retreat through the Balkans), the Brigade fought its way into Austria and was still fighting on the last day of the war to keep a corridor open. Keen to write an account recording the tactical significance of the Sturmgeschütz III, while surviving members of Brigade 191 also wished for a cohesive documentary record of the war, Bork set about gathering military records and literature, as well as interviewing as many ex-Brigade men as possible, in order to bring this detailed account into being. Praise for StuG III Brigade 191, 1940-1945 "Author Bruno Bork not only offers a tactical unit history, but also another German "blood and guts" ground-level views of Hitler's retreats and defeats on the Eastern Front. This is also a truly riveting read." -ARGunners.com "Upon finishing this book the reader will doubtlessly better realize what a useful and versatile armored fighting vehicle the Sturmgeschütz III really was to the German armed forces." -Globe at War "As a unit history, the scenarios come a poppin on page after page." -Historical Miniatures Gaming Society "Highly recommended for beginner to advanced builders and historians interested in the StuG actions on the Eastern Front." -AMPS
