Dennis R. Jenkins, Tony R. Landis

Curtiss Ascender Xp-55 Gerald Balzer,2014-02-04 The Curtiss XP-55 Ascender was a tailless swept-wing WWII pusher fighter design born out by the USAAC 1940 fighter competition. The USAAC was looking for a fighter to counter the threat of the German Bf-109 and the Japanese Zero and replace the obsolete P-35s, P-36s and the front line P-40s just entering service. From this competition three unusual pusher prototypes were ordered, the Consolidated XP-54, Curtiss XP-55, and the Northrop XP-56. A low powered full scale flying model (model CW 24B) was built out of wood and cloth to substantiate the flying qualities, and was first flown on December 2, 1941. The XP-55 mock-up was completed in August 1942, and the first of three XP-55s was completed on June 26,1943 with its first flight being conducted on July 13, 1943. The first aircraft was destroyed on November 15, 1943. Changes deemed necessary were incorporated in the second airframe in which performance testing began on September 16, 1944. Although the much more capable P-38, P-47, and P-51 had entered service, research into the XP-55s unusual design continued. The third XP-55 had entered flight testing

in April 1944 and was used at Eglin Field for armament tests before being lost during a war bond rally display on May 27, 1945. By then, the program had been terminated. Today, the second XP-55 presides in restored condition at the Kalamazoo Air Museum.

Modelling the Rare Curtiss Fighters Jim Norfolk, 1999-05-01 The second in a series of model aircraft plans books, this book tells the story of the successful and not so good aircraft that Curtiss Wright Aircraft Corp developed shortly before WW2. They started off well with the P -36, a breakthrough in fighter design and carried on with the famous P -40. They then tried to keep it going with various experimentals; the P 37, the P 42, P 46 and P 53, then finishing off with a near hit in the P 60 which turned out to be too little too late. These aircraft are designed for free flight powered with a rubber band but could be adapted to a small gas or electric motor. These models are around 1/24 th scale. The Book contains a brief description of the aircraft, design, construction and trimming and flying instructions. The book is well illustrated with photos showing each step of the way to successfully building the model. This book has been reviewed in several model magazines including

Cartens Publications FLYING MODELS, MODEL FLYER (Br), Model Airplane News and MAAC Magazine.

*American Secret Pusher Fighters of World War II* Gerald Balzer, 2008 *American Secret Pusher Fighters of World War II* analyzes the state of military aircraft procurement just prior to the start of World War II. It provides insight into the difficulties encountered by America's air services in dealing with an isolationist Congress and a limited mindset in the Army, which was seemingly indifferent to the aeronautical progress being made in Europe by the British and Germans. The book then focuses on the three winners of the 1940 fighter competition - the Vultee XP-54, the Curtiss XP-55, and the Northrop XP-56. Each of these radical designs - engine in the back (aka Pusher) using small canards in front, or, in the case of the XP-56, essentially a flying wing, used non-strategic materials and were developed in secret. At the time, the aerodynamics of these aircraft far outpaced engine development. In addition, this book details the technical difficulties of mating an advanced aircraft design with inadequate engine development.

**Experimental & Prototype U.S. Air Force Jet Fighters** Dennis R. Jenkins,Tony R. Landis,2008

Experimental and Prototype U.S. Air Force Jet Fighters examines the development of fighter airframes and engines since the end of World War II. The book covers each design that reached the hardware development stage and received an XF or YF designation from the Air Force. Sometimes the airframe/engine combination worked, as it did in the North American F-86 Sabre. Other times, technology failed, as it did in the Convair XP-92 ducted-rocket interceptor. In addition to the changing aerodynamic technologies, the evolution of offensive weapons for each evolution of fighter is also reviewed. Much of the data used in the book came from previously classified Air Force program documents. Dozens of never-before-seen photos highlight this review of Air Force fighter aircraft.

**The Dare** Harley Laroux,2023-10-31 Jessica Martin is not a nice girl. As Prom Queen and Captain of the cheer squad, she'd ruled her school mercilessly, looking down her nose at everyone she deemed unworthy. The most unworthy of them all? The freak, Manson Reed: her favorite victim. But a lot changes after high school. A freak like him never should have ended up at the same Halloween party as her. He never should have been able to beat her at a game of Drink or Dare. He never

should have been able to humiliate her in front of everyone. Losing the game means taking the dare: a dare to serve Manson for the entire night as his slave. It's a dare that Jessica's pride - and curiosity - won't allow her to refuse. What ensues is a dark game of pleasure and pain, fear and desire. Is it only a game? Only revenge? Only a dare? Or is it something more? The Dare is an 18+ erotic romance novella and a prequel to the Losers Duet. Reader discretion is strongly advised. This book contains graphic sexual scenes, intense scenes of BDSM, and strong language. A full content note can be found in the front matter of the book.

**The Panzer Grenadier Division "Grossdeutschland" and Panzer-Korps Grossdeutschland, Panzer Division Brandenburg, Führer Begleit Division, Panzer Division Kurmark Horst Scheibert, 1977**

Streamlined Malte Jürgens, 2014 In 2009, the Automuseum 'Prototyp' in Hamburg, Germany, organized a special exhibit in Germany or anywhere else in the world: For two months, 23 streamlined automobiles, the body of a record-setting car, and a revolutionary model wind tunnel, all had their aerodynamic rendezvous there. . . . Naturally, so many streamlined cars together were electrifying.

Patricia Scholten, daughter of Paul Pietsch, and the Stuttgart Motorbuch-Verlag which she runs, commissioned the Zurich photographer Michel Zumbrunn, who specializes in classic cars, to photograph this unique exhibition of never-before-shown-together streamlined works of art in his own unique style. . . . This history of the streamlined automobile is not illustrated with the black and white photos of former times, used in the relevant books again and again due to the lack of new images; it is illustrated with a portfolio of photographic art by Zumbrunn and his co-photographer Urs Schmid.--Pages 14-15.

Boas and Pythons of the World Mark O'Shea,2011 Renowned snake expert Mark O'Shea takes readers on an exciting continent-by-continent journey to look at these snakes in their native habitats. Stunning color photographs and intriguing stories from O'Shea's encounters with these snakes in the wild bring these reptiles to life -- from cover.

Tornado Kimble D. McCutcheon,2001 In the 1930s, when gas turbines were practically unknown, engine designers worldwide struggled to create a new and more powerful generation of aircraft

engines. It was hoped these engines would push aircraft to speeds of more than 500 miles per hour. One such engine, the Tornado, was a remarkable 42-cylinder liquid-cooled radial conceived by the Wright Aeronautical Corporation.--Page 4 of cover.
