Mangrove Ecosystems of Asia I. Faridah-Hanum,A. Latiff,Khalid Rehman Hakeem,Munir Ozturk,2013-11-01 The book provides an up-to-date account of mangrove forests from Asia, together with restoration techniques, and the management requirements of these ecosystems to ensure their sustainability and conservation. All aspects of mangroves and their conservation are critically re-examined. The book is divided into three sections presenting the distribution and status of mangrove ecosystems in Asia, the challenges they are facing, their issues and opportunities, and the management strategies for their conservation.

Alliance Capitalism Michael L. Gerlach,2023-04-28 Business practices in Japan inspire fierce and even acrimonious debate, especially when they are compared to American practices. This book attempts to explain the remarkable economic success of Japan in the postwar period—a success it is crucial for us to understand in a time marked by controversial trade imbalances and concerns over competitive industrial performance. Gerlach focuses on what he calls the intercorporate alliance, the innovative and increasingly pervasive practice of bringing together a cluster of affiliated companies that extends across a broad range of markets. The best known of these alliances are the keiretsu, or enterprise groups, which include both diversified families of firms located around major banks and trading companies and vertical families of suppliers and distributors linked to prominent manufacturers in the automobile, electronics, and other industries. In providing a key link between isolated local firms and extended international markets, the intercorporate alliance has had profound effects on the industrial and social organization of Japanese businesses. Gerlach casts his net widely. He not only provides a rigorous analysis of intercorporate capitalism in Japan, making useful distinctions between Japanese and American practices, but he also develops a broad theoretical context for understanding Japan's business networks. Addressing economists, sociologists, and other social scientists, he argues that the intercorporate alliance is as much a result of overlapping political, economic, and social forces as are such traditional Western economic institutions as the public corporation and the stock market. Most compellingly, Alliance Capitalism raises important questions about the best method of exchange in any economy. It identifies situations where cooperation among companies is an effective way of channeling corporate activities in a world marked by complexity and rapid change, and considers in detail alternatives to hostile takeovers and other characteristic features of American capitalism. The book also points to the broader challenges facing Japan and its trading partners as they seek to coordinate their distinctive forms of economic organization.

Assessing Forest Ecosystem Health in the Inland West R Neil Sampson,David L Adams,1994-10-26 Assessing Forest Ecosystem Health in the Inland West is a thorough reference for policymakers, resource managers, environmentalists, students, and anyone interested in using ecosystem management as a tool to address forest health problems in the Inland West. The book provides the reader with a survey of current conditions in the Inland West, their historical origins, assessments of available management tools, and analyses of the various choices available to policymakers. Its goal is to help people understand the Inland West forests so that public policies can reflect a constructive and realistic framework in which forests can be managed for sustained health. This resource is the product of a scientific workshop where 35 participants, including scientists, resource managers, administrators, and environmentalists, addressed the forest health problem in the Inland West. Synthesis chapters integrate the diverse knowledge and experience which participants brought to the workshop. They identify and link together many of the ecological, social, and administrative conditions which have created the forest health problem in the West. The book is unique in that it reflects a process that fostered the use of academic research, field realities, and industrial knowledge to define an interdisciplinary problem, establish rational policy objectives, and set-up “do-able” management approaches. The following topics are analyzed: Assessing forest ecosystem health in the Inland West Historical and anticipated changes in forest ecosystems in the Inland West Defining and measuring forest health Historical range of variability as a tool for evaluating ecosystem change Administrative barriers to implementing forest health problems Economic and social dimensions of the forest health problem Fire management Ecosystem and landscape management Assessing Forest Ecosystem Health in the Inland West will help facilitate sound resource planning because it brings together the problems facing the Inland West from an interdisciplinary perspective. This approach allows resource managers and policymakers creativity in planning and implementing strategies to confront forest health problems in the Inland West ecosystems.

Learn to Play Therapy. Principles, Process and Practical Activities Karen Stagnitti,2021-01-11 This book provides the background, theoretical underpinnings and the process and principles of Learn to Play Therapy. Learn to Play Therapy has been developed and refined for over 25 years. This book is written for therapists who work with children aged 12 months to 8 years. It is a therapeutic approach for children with autism spectrum disorder, developmental difficulties, and children who find playing spontaneously, perplexing. Learn to Play Therapy focusses on building a child's ability to self-initiate spontaneous pretend play ability. Pretend play is associated with social competence, narrative, language, self-regulation, creativity and problem solving. The book is a complete revision of the first edition Learn to Play book which was published by Co-ordinates Publications. The second edition is 314 pages and includes 114 play activities, parent handouts, and a Play Background Checklist. A USB is provided with the book and contains the printable pages. Play assessment is the first step in Learn to Play Therapy as an understanding of a child's self-initiated pretend play ability informs which play activities to choose to begin the therapeutic process. The Pretend Play Enjoyment Developmental Checklist (Stagnitti, 2017) and the Child-Initiated Pretend Play Assessment 2 (Stagnitti, 2019) are recommended to be used with Learn to Play Therapy. The theoretical underpinnings of Learn to Play Therapy are informed by Axline, Vygotsky, and the neurobiology of play. The process and principles are explained in depth with Chapters 1 to 3 providing an unfolding explanation, starting with an overview and becoming more detailed across the three Chapters. This second edition also has a chapter on working with parents, questions and answers, and case studies. The play skills cover: engaging activities for those children who show no enjoyment or understanding of play; pre-pretend play activities for children who require therapy to begin on the very early levels of play; and the pretend play skills of sequences of play action, describing and explaining, object substitution, doll/teddy play, play scripts, role play, social pretend play, attributing properties and absent objects, problems in the play and predicting what will happen next. An extensive reference list is included.

Advances in the Study of Genetic Disorders Kenji Ikehara,2011-11-21 The studies on genetic disorders have been rapidly advancing in recent years as to be able to understand the reasons why genetic disorders are caused. The first Section of this volume provides readers with background and several methodologies for understanding genetic disorders. Genetic defects, diagnoses and treatments of the respective unifactorial and multifactorial genetic disorders are reviewed in the second and third Sections. Certainly, it is quite difficult or almost impossible to cure a genetic disorder fundamentally at the present time. However, our knowledge of genetic functions has rapidly accumulated since the double-stranded structure of DNA was discovered by Watson and Crick in 1956. Therefore, nowadays it is possible to understand the reasons why genetic disorders are caused. It is probable that the knowledge of genetic disorders described in this book will lead to the discovery of an epoch of new medical treatment and relieve human beings from the genetic disorders of the future.

Civilization, Nation and Modernity in East Asia Chih-Yu Shih,2012-06-25 This book explores the crisis of cultural identity which has assaulted Asian countries since Western countries began to have a profound impact on Asia in the nineteenth century. Confronted by Western 'civilization' and by 'modernity', Asian countries have been compelled to rethink their identity, and to consider how they should relate to Western 'civilization' and 'modernity'. The result, the author argues, has been a redefining by Asian countries of their own character as nations, and an adaptation of 'civilization' and 'modernity' to their own special conditions. Asian nations, the author contends, have thereby engaged with the West and with modernity, but on their own terms, occasionally, and in various inconsistent ways in which they could assert a sense of difference, forcing changes in the Western concept of civilization. Drawing on postmodern theory, the Kyoto School, Confucian and other traditional Asian thought, and the actual experiences of Asian countries, especially China and Japan, the author demonstrates that Asian countries' redefining of the concept of civilization in the course of their quest for an appropriate postmodern national identity is every bit as key a part of 'the rise of Asia' as economic growth or

greater international political activity.

Italy Revisited Mary Melfi,2009 Drawing out her mother's childhood memories of life in southern Italy at the dawn of the twentieth century, Mary Melfi takes an unconventional approach to autobiographical writing. *Italy Revisited* serves as a double memoir, told in dialogue between a mother and a daughter. The conversation takes the reader to a medieval town high up in the mountains where time is told by the shadow the sun casts, where wheat and olive oil are the currency of choice (barter is in use), and where marriage is as much about property as it is about love. As they re-create that vanished world, the pair finds greater understanding of the tumultuous relationships that sometimes exist between immigrant mothers and their children.
