**Mermaid Moon** Susann Cokal,2020-03-03 An award-winning author tells of a mermaid who leaves the sea in search of her landish mother in a captivating tale spun with beautiful prose, lush descriptions, empathy, and keen wit. Blood calls to blood; charm calls to charm. It is the way of the world. Come close and tell us your dreams. Sanna is a mermaid — but she is only half seavish. The night of her birth, a sea-witch cast a spell that made Sanna’s people, including her landish mother, forget how and where she was born. Now Sanna is sixteen and an outsider in the seavish matriarchy, and she is determined to find her mother and learn who she is. She apprentices herself to the witch to learn the magic of making and unmaking, and with a new pair of legs and a quest to complete for her teacher, she follows a clue that leads her ashore on the Thirty-Seven Dark Islands. There, as her fellow mermaids wait in the sea, Sanna stumbles into a wall of white roses thirsty for blood, a hardscrabble people hungry for miracles, and a baroness who will do anything to live forever. From the author of the Michael L. Printz Honor Book *The Kingdom of Little Wounds* comes a gorgeously told tale of belonging, sacrifice, fear, hope, and mortality.

**A Day with Picasso** Billy Kluver,1999-02-18 In 1978, while collecting documentary photographs of the artists' community in Montparnasse from the first decades of the century, Billy Klüver discovered that some previously unassociated photographs fell into significant groupings. One group in particular, showing Picasso, Max Jacob, Moïse Kisling, Modigliani, and others at the Café de la Rotonde and on Boulevard du Montparnasse, all seemed to have been taken on the same day. The people were wearing the same clothes in each shot and had the same accessories. Their ties were knotted the same way and their collars had the same wrinkles. A total of twenty-four photographs—four rolls of film with six photographs each—were eventually found. With the challenge of identifying the date, photographer, and circumstances, Klüver embarked on an inquiry that would illuminate the minute texture of that time and place. Biographical research into the subjects' lives led Klüver to focus on the summer of 1916 as the likely time the photos were taken. He then measured buildings and plotted angles and lengths of shadows in the photographs to narrow the time frame to a spread of three weeks. Further investigation eventually allowed Klüver to identify the photographer as Jean Cocteau and to determine the day that Cocteau had taken the photographs: August 12, 1916. A computer printout of the sun's positions on that date, obtained from the Bureau des Longitudes, together with the length of the shadows, enabled Klver to calculate the time of day of each photograph, and thus to put them in proper sequence. In a tour de force of art historical research, Klüver then reconstructed a scenario of the events of the four hours depicted in the photographs. With evocative attention to detail—noting when Picasso is no longer carrying an envelope or Max Jacob has acquired a decoration in his lapel—Klüver recreates a single afternoon in the lives of Picasso and friends, a group of remarkable people in early twentieth-century Paris. Besides the central portfolio of photographs by Cocteau, the book contains additional photographs and drawings, short biographies of all the subjects, and a historical section on the events and activities in the Paris art world at the time.

**Model-making** David Neat,2013-12-21 Model-making: Materials and Methods focuses primarily on the wide variety of materials that can be employed to make models; those which have been favoured for a while and those which are relatively new. The book looks at how these materials behave and how to get the best out of them, then illustrates a range of relatively simple methods of building, shaping, modelling, surfacing and painting with them. Useful features of the book include: the different uses of models in various disciplines; the sequence of making; planning and construction, creating surfaces, painting and finishing; methods of casting, modelling and working with metals; step-by-step accounts of the making of specially selected examples; simple techniques without the need for expensive tools or workshop facilities; a 'Directory' of a full range of materials, together with an extensive list of suppliers. This book is intended for students of theatre production, art & architecture, animation and theatre/television set designers where accurate scale models are necessary, and is also of interest to anyone involved with the process of making forms in 3D and the challenge of making small-scale forms in general. Superbly illustrated with 185 colour photographs.

**One-Hour Wargames** Neil Thomas,2014-09-03 A fun and practical new approach to wargaming that lets you complete a game in about an hour—includes rule sets and scenarios for most popular periods. One of the biggest problems facing wargamers is finding the time to actually play. Most commercially available games require several hours to set up and see to a conclusion; some can even take a whole day or weekend to complete. Apart from time, lack of space can also keep wargamers from enjoying their favorite pastime. In One-hour Wargames, veteran gamer and rule-writer Neil Thomas has addressed both problems. Now it is practical to play a satisfying game in around an hour on a normal dining table or living room floor. The book contains 8 all-new sets of very simple rules for various periods—from Ancient to WW2—and thirty stimulating scenarios which can be played using any of them. All the rules and scenarios are intended to be played on a 3ft x 3ft battlefield. The rules only require a small number of miniatures, so this really is an ideal way for new gamers, or veterans trying a new period, to get started with minimal investment of time and money. Also ideal for a quick game in the evening with a friend. Also included are sections on campaigns and solo games.

**Make This Medieval Village** Iain Ashman,2009 Each page contains pieces which children can cut-out and glue to create a medieval village complete with an inn, medieval houses and a village fair, as well as the inhabitants including the Lord of the Manor, innkeeper and pedlars.

**The Pikeman’s Lament** Daniel Mersey,Michael Leck,2017-01-26 Recreate the action and drama of 17th Century warfare on your tabletop with *The Pikeman's Lament*. Start by creating your Officer – is he a natural leader raised from the ranks, the youngest son of a noble family, or an old veteran who has seen too many battles? As you campaign, your Officer will win honour and gain promotion, acquiring traits that may help lead his men to victory. Before each skirmish, your Officer must raise his Company from a wide range of unit options – should he lean towards hard-hitting heavy cavalry or favour solid, defensively minded infantry? Companies are typically formed from 6–8 units, each made up of either 6 or 12 figures, and quick, decisive, and dramatic games are the order of the day. With core mechanics based on Daniel Mersey's popular *Lion Rampant* rules, *The Pikeman's Lament* captures the military flavour of the 17th Century, and allows you to recreate skirmishes and raids from conflicts such as the Thirty Years' War, the English Civil Wars, and the Great Northern War.

**Drawing Futures** Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 *Drawing Futures* brings together international designers and artists for speculations in contemporary drawing for art and architecture.Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. *Drawing Futures* will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie.*Drawing Futures* focuses on the discussion of

how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.
