British Battle Tanks David Fletcher, 2017-08-24 Plagued by unreliable vehicles and poorly thought-out doctrine, the early years of World War II were years of struggle for Britain's tank corps. Relying on tanks built in the late 1930s, and those designed and built with limited resources in the opening years of the war, they battled valiantly against an opponent well versed in the arts of armoured warfare. This book is the second of a multi-volume history of British tanks by renowned British armour expert David Fletcher MBE. It covers the development and use of the Matilda, Crusader, and Valentine tanks that pushed back the Axis in North Africa, the much-improved Churchill that fought with distinction from North Africa to Normandy, and the excellent Cromwell tank of 1944-45. It also looks at Britain's super-heavy tank projects, the TOG1 and TOG2, and the Tortoise heavy assault tank, designed to smash through the toughest of battlefield conditions, but never put into production.

The Tanks of Tog Andrew Hills, 2017-09-29 The previously untold story of the Special Vehicle Development Committee, better known as 'The Old Gang' or by the abbreviation 'TOG'. These were the men who were mainly responsible for the creation of the British tanks in WW1. Men like Sir Albert Stern, Sir William Tritton, Sir Harry Ricardo, and Major Walter Wilson. At the outbreak of WW2, they were given a new task, that of breaching the heaviest German defences, with a heavily armoured tank able to cross the worst mud soaked ground of Flanders. The SVDC managed in very short time to design more than one vehicle to accomplish this seemingly impossible task and built tanks bearing their acronym as TOG-1 and TOG-2. This book covers the development of both vehicles as well as several variations and other work such as an underwater tank and connections to the gigantic Cultivator machines of the Naval Land Equipment division. The work of the SVDC was conducted in secrecy with documents, photographs, and blueprints sent to various companies and people. Places where sadly since the war so much has been lost. This book was the culmination of several years of research by the author. A search which brought together archival information from as far afield as Canada, the USA, Australia, and the UK to tell the story of these incredible men and their incredible machines.

British Battle Tanks David Fletcher, 2016-08-25 A highly illustrated history of the development and operation of the first British tanks, published to coincide with the 100th anniversary of their introduction in World War I. When British soldiers charged across the Somme in September 1916 they were accompanied by a new and astonishing weapon – the tank. After a stuttering start armoured behemoths such as the Mark IV, Mark V and Whippet played a crucial role in bringing World War I to an end. Marking the centenary of their battlefield debut, this comprehensive volume traces the design and development of the famous British invention during World War I and the increasingly tense years of the 1920s and 30s, from the first crude but revolutionary prototype to the ever-more sophisticated designs of later years. Bolstered by historic photographs and stunning illustrations, author David Fletcher brings us the thrilling history behind the early British battle tanks.

Desert Olive Oil Cultivation Zeev Wiesman, 2009-06-24 Due to the adverse stress conditions typical of olive cultivation in desert conditions, the olive tree is responding with production of high levels of antioxidant substances. Among these substances are polyphenols, tocopherols, and phytosterols. Studies have shown that saline irrigated varieties of olives have demonstrated advantages over those irrigated with tap water. This is just one of the aspects of desert cultivation of olives that is covered in *Desert Olive Oil Advanced Biotechnologies*. Based on 20 years of research, the book expounds on the appropriate selection of olive varieties with high productivity and oil quality, the impact of foliar nutrition on decreasing alternate bearing and increasing fruit quality, improving

efficiency of mechanical harvesting, and increasing efficiency of oil extraction and oil quality regulating analysis. Addresses olive cultivation methods for semi-arid environments Focuses on intensive cultivation using saline and municipal waste recycled irrigation water and their significant impact on the production and nutritional value of olive oil Integrated and multidisciplinary approaches providing a comprehensive view of the desert olive industry Provides key considerations including ecological, biotechnological, agricultural and political impacts

Winter Warfare Richard N. Armstrong,Joseph G. Welsh,2014-06-03 Based on German and Soviet military archival material, this book provides an insight into the tactics and planning for combat in a winter climate. It also studies the mechanisms for change in an army during the course of battle. The first part of the book looks at the tactical pamphlet 'People's Commissar for Defence Order No. 109', as passed by Red Army units on 4 March 1941, which provided regulations for combat in Winter. The second part of the book, using material from the Soviet military archives, reveals Red Army General Staff supplements to the winter regulation.

Forgotten Tanks and Guns of the 1920s, 1930s and 1940s David Lister,Paul Charlton,2018-10-30 History forgets. Files are lost and mislaid. But this book seeks to shine a light, offering a collection of cutting edge pieces of historical research detailing some of the most fascinating arms and armament projects from the 1920s to the end of the 1940s, nearly all of which had previously been lost to history.Included here are records from the UKs MI10 (the forerunner of GCHQ) which tell the story of the mighty Japanese heavy tanks and their service during the Second World War. Other chapters expand on the development of British armour, including the story of infantry tanks from the 1920s right through to the end of the Second World War and beyond.Other items placed beneath the microscope in this fascinating history include a wide variety of guns, rocket launchers, super heavy tanks and countless pieces of specialised armour. Previously overlooked, hidden under layers of dust in archives up and down the country, the histories of these objects has finally been uncovered.

Dirty Little Secrets of World War II James F. Dunnigan,1996-03-14 Dirty Little Secrets of World War II exposes the dark, irreverent, misunderstood, and often tragicomic aspects of military operations during World War II, many of them virtually unknown even to military buffs. Like its successful predecessor, Dirty Little Secrets, Dunnigan and Nofi's new book vividly brings to life all theaters and participants of the war. Revelations include: - The real death count for the war, and why it has never been previously released. - The new age general who refused to smoke or drink, who lived on a vitamin-enriched diet, who opposed animal experimentation, and who regularly consulted his astrologer. - How equipment developed for the war led to such modern high-tech innovations as smart bombs, electronic warfare, and nuclear missiles. - The lackadaisical relationship between Germany and Japan throughout the war. - Tricky bits of information about the lingering effects of the war -- like the thousands of live shells and mines that are still buried in Europe and off the East Coast of America.

The Woman from Bratislava Leif Davidsen,2014-09-15 In Bratislava, Teddy Pedersen, a middle-aged, Danish university lecturer, receives a visit from an Eastern European woman who turns out to be his half-sister. Father to both of them was a Danish SS officer who had officially been declared dead in 1952, but had in fact lived on in Yugoslavia for many years. In Copenhagen, Teddy's older sister is arrested on suspicion of being a Stasi agent, and a murder leads Teddy - and the Danish intelligence service - to investigate the

relationship between these two - the woman in Denmark and the woman in Bratislava. The link between them proves to have far-reaching personal and political consequences.

Tanks Richard Ogorkiewicz, 2015-02-20 From an internationally acclaimed expert in the field comes a detailed, analytical and comprehensive account of the worldwide evolution of tanks, from their inception a century ago to the present day. With new ideas stemming from the latest academic research, this study presents a reappraisal of the development of tanks and their evolution during World War I and how the surge in technological development during World War II and the subsequent Cold War drove developments in armour in Europe and America, transforming tanks into fast, resilient and powerful fighting machines. From the primitive, bizarre-looking Mark V to the Matilda and from the menacing King Tiger to the superlative M1 Abrams, Professor Ogorkiewicz shows how tanks gradually acquired the enhanced capabilities that enabled them to become what they are today – the core of combined-arms, mechanized warfare.

Who Grew My Soup? Tom Darbyshire, 2012 Young Phineas Quinn is suspicious of the vegetable soup his mom serves for lunch. Phin declares he won't slurp a single spoonful until he knows where his soup comes from! Much to Phin's surprise, a man in a flying tomato balloon shows up to answer this stirring question!

Flight Artworks Gary Eason, 2015-09-18 Collected in book form for the first time – and also available as an ebook – are some of Gary Eason's acclaimed Flight Artworks: carefully researched and crafted photorealistic pictures of historical air combat. This first volume presents images of WWII scenes, selected from artworks created since 2011. From my point of view as a pilot for the last 43 years and an RAF fighter pilot for 30 years, the realism he captures is uncanny - Squadron Leader Clive Rowley MBE RAF (Retd) Third edition, September 2015

The Time Machine and the War of the Worlds H. G. Wells, 2013-07-09 Contents: The Time Machine War of the Worlds The Time Traveller (for so it will be convenient to speak of him) was expounding a recondite matter to us. His grey eyes shone and twinkled, and his usually pale face was flushed and animated. The fire burned brightly, and the soft radiance of the incandescent lights in the lilies of silver caught the bubbles that flashed and passed in our glasses. Our chairs, being his patents, embraced and caressed us rather than submitted to be sat upon, and there was that luxurious after-dinner atmosphere when thought roams gracefully free of the trammels of precision. And he put it to us in this way—marking the points with a lean forefinger—as we sat and lazily admired his earnestness over this new paradox (as we thought it) and his fecundity.

The Encyclopedia of French Tanks and Armoured Fighting Vehicles François Vauvillier, 2014 France, alongside Great Britain, was the birthplace of a new weapon which was to revolutionise warfare: the tank. Preceding the arrival of the tank the turn of the twentieth-century saw the earliest development of armoured weapons with the invention of the armoured cars and armoured fighting vehicles. Covering the period of the Great War to the beginning of the Second World War this fully comprehensive encyclopaedia includes: the hundred principal types of tanks and armoured cars and over 200 variants such as troop transports, poseur de pont (don't know the English technical term, if there is one - J.-M.), bomb-disposal vehicles (ditto the above), etc.. The concise text, precise genealogical tables, technical data on the most important machines, copious illustrations (including contemporary photographs and superb colour profiles) render this volume an indispensable work of reference for the tank fan. AUTHOR: Francois Vauvillier, editor of war magazine Guerre, Blindes et Materiel, is the recognised expert in engine the French army. SELLING POINTS: * An indispensable work of reference

for all tank fans, filled with numerous illustrations, photographs, and colour profiles. 300 photographs

Pruning and Training Systems for Modern Olive Growing Riccardo Gucci, Claudio Cantini, 2000 Summarizes the information available on current pruning techniques and training systems. It specifically addresses the problems faced by growers, professionals and students who are new to olive growing.

The Return of the Mother Andrew Harvey, 2013-08-20 Adapted from a series of lectures on the historical basis and current resurgence of the sacred feminine, given by Andrew Harvey at the California Institute of Integral Studies in Spring 1994, *The Return of the Mother* is a profound journey into the heart of the Divine Mother. In this comprehensive and groundbreaking work, mystical scholar Andrew Harvey unearths traces of the sacred feminine in major world religions—Hinduism, Islam (Sufism), Buddhism, Taoism, and Christianity—and in aboriginal and indigenous wisdom traditions. Harvey presents a scathing critique of the patriarchal distortions in religious history and doctrine that have obscured full knowledge of the Divine Mother, and shows how to reintegrate this vital aspect into the spiritual consciousness of humankind. *The Return of the Mother* offers a radical new perspective, balancing the historical overemphasis on transcendence by honoring the immanence of the divine in passionate engagement in the world. Only by cultivating a direct, respectful relationship with the transformative power of the sacred feminine can we alter our disastrous attitude of dissociation from nature, the body, sexuality, and the details of human life, and generate the energy and compassion needed to reverse the course of destruction we have set the planet—and all of life—hurtling toward. In lively question-and-answer sections, Harvey further illuminates these vital issues and takes a strong stand against our dependence on “gurus” and “masters,” proposing instead an egalitarian model of spiritual community based on intimate groups of mutually supportive guides and friends. *The Return of the Mother* is an eloquent and passionate call for all of us to rediscover and reclaim an authentic and empowering relationship to the divine, and recreate a sacred life-in-the-world.

British Armour in the Normandy Campaign John Buckley, 2004-07-22 The popular perception of the performance of British armour in the Normandy campaign of 1944 is one of failure and frustration. Despite overwhelming superiority in numbers, Montgomery's repeated efforts to employ his armour in an offensive manner ended in a disappointing stalemate.

Sun Bread Elisa Kleven, 2004-03-30 Winter's gray chill has set in and everyone misses the sun—especially the baker. So she decides to bring some warmth to the town by making sun bread. And as the bread bakes, rising hot and delicious, everyone comes out to share in its goodness. Everyone, including the sun itself. With a lilting, rhyming text, colorful illustrations, and a recipe for baking your own sun

bread, this tasty treat from the illustrator of the best-selling Abuela is just right for all ages to enjoy.
