When Google Met Wikileaks Julian Assange, 2016-10-11 In June 2011, Julian Assange received an unusual visitor: the chairman of Google, Eric Schmidt, arrived from America at Ellingham Hall, the country residence in Norfolk, England where Assange was living under house arrest. For several hours the besieged leader of the world's most famous insurgent publishing organization and the billionaire head of the world's largest information empire locked horns. The two men debated the political problems faced by society, and the technological solutions engendered by the global network--from the Arab Spring to Bitcoin. They outlined radically opposing perspectives: for Assange, the liberating power of the Internet is based on its freedom and statelessness. For Schmidt, emancipation is at one with US foreign policy objectives and is driven by connecting non-Western countries to American companies and markets. These differences embodied a tug-of-war over the Internet's future that has only gathered force subsequently. When Google Met Wikileaks presents the story of Assange and Schmidt's encounter. Both fascinating and alarming, it contains an edited transcript of their conversation and extensive, new material, written by Assange specifically for this book, providing the best available summary of his vision for the future of the Internet.

How to Be a High School Superstar Cal Newport, 2010-07-27 Do Less, Live More, Get Accepted What if getting into your reach schools didn't require four years of excessive A.P. classes, overwhelming activity schedules, and constant stress? In *How to Be a High School Superstar*, Cal Newport explores the world of relaxed superstars--students who scored spots at the nation's top colleges by leading uncluttered, low stress, and authentic lives. Drawing from extensive interviews and cutting-edge science, Newport explains the surprising truths behind these superstars' mixture of happiness and admissions success, including:

- Why doing less is the foundation for becoming more impressive.
- Why demonstrating passion is meaningless, but being interesting is crucial.
- Why accomplishments that are hard to explain are better than accomplishments that are hard to do.

These insights are accompanied by step-by-step instructions to help any student adopt the relaxed superstar lifestyle--proving that getting into college doesn't have to be a chore to survive, but instead can be the reward for living a genuinely interesting life.

Hong Kong Barricades Lele Saveri, Joshua Wong, 2019 In October 2014, Lele Saveri was in Hong Kong when thousands of people, guided by a group of students, took to the streets to demonstrate against electoral reform: what would go down in history as the 'Umbrella Revolution' was underway. Saveri was there by chance, but he immediately realised that he was standing before a historic event. He moves through the streets, coming into contact with people, shooting photographs. The barricades, put up using temporary fencing and various objects, strike him in particular by virtue of their structure: they are the symbol of the determination and resistance of the demonstrators, the image of a protest which does not burn out in a single season but which is still alive today. Along with the text by Joshua Wong (leader of the movement, shortlisted for the Nobel Peace Prize 2017), the photographs gathered in this volume tell of the genesis of a struggle for democratisation and emancipation, and more in general, against oppression.

The Mystery of Love Marc Gafni, 2004-03 Addresses the issues of love,

passion, and sexuality, drawing on traditional Kabbalist texts to reveal ten spiritual guides to the creation of a loving and passionate existence.

Soul Prints Marc Gafni, 2002 Soul Prints speaks to all listeners, regardless of religious beliefs or practices. Using the power of myth--Biblical and folk--and drawing on his own personal highs and lows, Gafni offers advice on how to form bonds based in truth and love.

The Art of Protest gestalten, Robert Klanten, Lincoln Dexter, Francesca Gavin, Alain Bieber, 2021-06 Thanks to art's ability to communicate and influence, it has always had a charged relationship with activism and politics. And, given the tumultuous times in which we live, with traditional democracies being challenged from all sides, the changing climate, global movements for social justice, and political upheaval causing millions to search for a better life abroad, this relationship has never been more important. The Art of Protest will explore the connection between art, politics, and activism today, revealing how, over the past decade, artists have been engaging with political and social issues of all kinds, through different artistic mediums.

CYPHERPUNK REVOLUTIONARY ROBERT. MANNE, 2019

Cypherpunks Julian Assange, 2016-10 The Internet has led to revolutions across the world but a crackdown is now in full swing. As whole societies move online, mass surveillance programs are being deployed globally. Our civilization has reached a crossroads. In one direction lies a future promoting privacy for the weak and transparency for the powerful; in the other is an internet that transfers power over entire populations to an unaccountable complex of spy agencies and their trans-national corporate allies. Cypherpunks are activists who advocate the mass use of strong cryptography as a way protecting our basic freedoms against this onslaught. Julian Assange, the editor-in-chief of an visionary behind Wikileaks, has been a leading voice in the cypherpunk movement since the 1990s. Now, in a timely and important new book, Assange brings together a group of rebel thinkers and activists from the front line of the battle for cyberspace to discuss whether the internet will emancipate or enslave all of us.--

The Truth That Lies Within Jonathan Marte', 2018-10 It is a nonfiction Christian book that captures the essence of truth and lies through the world of introspection. I evoke the reader into thinking more about their life when it comes to their own belief system by illustrating lessons that I have learned throughout my journey - a life filled with such raw emotions and upheaval. This is a story that captures the essence of that journey through the eyes of my own perspective. As I desperately try to figure out the cause of my condition, and the source of my calamity. I asked myself and the reader a series of questions throughout the book. How can this be and what void are you trying to fill? I am driven by a series of tragic events that leads the reader down the path towards redemption. As I search for answers from God in my darkest moments in life, I'm reminded that I am not alone and begin the journey of self-discovery through the process of introspection.

Myoclonic Epilepsies Antonio V. Delgado-Escueta, 2005 This volume is the first comprehensive text and clinical reference on idiopathic myoclonic epilepsies of infancy, childhood, adolescence, and adulthood. The world's foremost experts describe the phenotypes and subtypes of myoclonic epilepsies and the underlying molecular defects and summarize cutting-edge advances in molecular genetics that shed new light on the etiologies of these syndromes.

The book offers clinicians much-needed assistance in recognizing and diagnosing idiopathic myoclonic epilepsies and selecting appropriate treatment. Each chapter includes diagnostic and treatment algorithms to guide practitioners in clinical decision making.

Love & Company (Limited) John Wernberny, 1897

Odyssey of an Eavesdropper Martin L. Kaiser, III, 2006-10 Martin Kaiser is a legend within the nation's covert electronic surveillance fraternity. Kaiser built devices that could bring down a head of state or provide blackmail for a government agency to smear a well-known civil rights leader. In *Odyssey of an Eavesdropper*, he tells his own story -- from an abusive childhood in a Pennsylvania coal-mining town to icon status in the black-ops world of U.S. spy operations as the premier producer of electronic surveillance gadgets and dirty tricks, and then his battle for professional and emotional survival, with the FBI bent on his destruction. Kaiser's clients included the FBI, CIA, DEA, Secret Service, Army, Navy, and Air Force Intelligence as well as intelligence services of Egypt, Argentina, and Canada. However, after his testimony before the National Wiretap Commission in 1975, the FBI embarked on a vendetta against Kaiser, nearly driving him into bankruptcy and resulting in his indictment on charges of illegal wiretapping, conspiracy, and transporting an illegal eavesdropping device across state lines. Acquitted of all charges, and after reinventing himself, Kaiser tells his personal tale while discussing historic moments in U.S. espionage and the future of privacy and surveillance in America.

Spyworld Mike Frost, Michel Gratton, 1994 For twenty years Canada has been spying on other nations. Outside public scrutiny or Parliamentary review and frequently acting at the behest of U.S. and U.K. intelligence agencies. Canada has been spying electronically from its embassies in capitals as far-flung as Moscow, New Delhi, Bucharest, Rabat and Caracas. It has then shared the results with its allies. There is every reason to believe Canada is still doing embassy collection today. Techniques developed during the Cold War have been honed for political and economic espionage in the nineties. The agency responsible is the top-secret Communications Security Establishment (CSE) of whose existence most Canadians are unaware. CSE has also used sophisticated equipment, much of it provided by the U.S., to listen in on Canadian and on American citizens, raising vital questions about civil liberties and the invasion of privacy. It has intercepted communications from the Soviet embassy in Ottawa; from British cabinet ministers; from the governments of France and Quebec; from suspected Sikh terrorists in India; and from the Kremlin. Its record is impressive: if it wants to, it can intercept almost any phone, fax or radiowave transmission. How do we know all this? Because one man, Mike Frost, a communications officer at CSE for nineteen years, has decided that in the post-Cold War era it is time for the Canadian public to be told what its government has been doing and for a public debate to ensue. As he tells the story of his career, he paints a remarkable picture of the Security Establishments of Canada, the U.S. and the U.K. The Americans in particular are revealed as possessing high-tech wizardry that they use for political and economic spying - including, according to Frost, highly controversial spying on the Canadian government. Much of Canada's spying from 1972 to 1990 was undertaken for the Americans. Frost and his immediate boss were at the centre of the embassy-collection scheme, which was code-named

Project Pilgrim. The story of how Pilgrim grew by trial and error into a highly successful operation is full of drama, comedy, triumphs and frustrations. Frost is proud of the achievements, but the questionable aspects of CSE's activities have led him to go public on both CSE's successes and its excesses. While scrupulously careful about not jeopardizing national security or endangering the lives of agents in the field, he nonetheless reveals an institution whose powers are potentially so great that they need to be subject to Parliamentary control and public scrutiny. Spyworld will undoubtedly spur debate and controversy.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

The International Trust David J. Hayton,2011 The International Trust presents an in-depth analysis of a range of highly topical issues of great significance in the area of international trust law. Under the editorship of a leading trust law specialist, a team of eminent contributors have applied their expertise to addressing a range of subjects at the cutting edge of thinking in this area. Part I of the book contains the indispensable conflict of laws chapters, each now extensively updated by its original author. Part II covers a wide variety of issues crucial to trust advisers, each updated to take in the latest developments in areas including trusts and finance law, money laundering and trusts, protectors and purpose trusts. Part III contains chapters on Italy and China - jurisdictions in which recent trust law developments have generated considerable international interest. Part IV contains Professor Donovan Waters' notable chapter on the future of the trust fully updated by the author.

Trial by Internet Avery Elizabeth Hurt,2017-07-15 The relative anonymity the Internet provides allows us to assert our knowledge like a professor, show off our seemingly perfect lives, and judge like we're presiding over a court of law. The problem with this relatively new phenomenon is that we often make snap judgments about other people's actions or statements without knowing all of the facts, and without giving others the benefit of the doubt. This volume dives deep into the realities of the Internet age: Do we become different people when we're on the Internet? What responsibility do we have in our treatment of others in this new society? Is it our place to be virtual judge and jury?

A History of Britain in 21 Women Jenni Murray,2016-10-06 From the bestselling author of A History of the World in 21 Women They were famous queens, unrecognised visionaries, great artists and trailblazing politicians. They all pushed back boundaries and revolutionised our world. Jenni Murray presents the history of Britain as you've never seen it before, through the lives of twenty-one women who refused to succumb to the established laws of society, whose lives embodied hope and change, and who still have the power to inspire us today.
