Xinjiang and the Chinese State Debasish Chaudhuri,2017-08-18 This book focuses on the nature of ethno-national conflicts and impacts of ideological orientation of the Communist Party of China (CPC) towards the national question in the context of Han nationalism and political, economic and security policies towards Xinjiang. Violence in Xinjiang since the mid-1990s is projected as one of the major national security challenges for China, along with issues pertaining to Tibet and Taiwan. The author argues that the post-Mao reformist model may have been a beneficial economic and political innovation, but failed in dealing with regional conflicts and unrests arising out of the demands for independence, freedom, greater autonomy and assertion of democratic and civic rights. The book discusses Chinese nationalism and the construction of Uyghur national identity, consequences of economic modernisation in the region, ethnic conflicts and coercive measures, the security and social stability situation in Xinjiang, intensification of violence in Xinjiang under the new leadership, vision of the 'Chinese dream', key policies and programmes, post-riot fallouts and social contradictions manifest in discourses surrounding development, separatist violence, religious fundamentalism and international terrorism. With its in-depth, accessible and comprehensive analyses, this book will be a valuable addition to scholars and

researchers of Chinese studies, politics and international relations, security and strategic studies, sociology, social anthropology and ethnic studies.

Photo Poetics Shengqing Wu, 2020-12-08 Chinese poetry has a long history of interaction with the visual arts. Classical aesthetic thought held that painting, calligraphy, and poetry were cross-fertilizing and mutually enriching. What happened when the Chinese poetic tradition encountered photography, a transformative technology and presumably realistic medium that reshaped seeing and representing the world? Shengqing Wu explores how the new medium of photography was transformed by Chinese aesthetic culture. She details the complex negotiations between poetry and photography in the late Qing and early Republican eras, examining the ways traditional textual forms collaborated with the new visual culture. Drawing on extensive archival research into illustrated magazines, poetry collections, and vintage photographs, Photo Poetics analyzes a wide range of practices and genres, including self-representation in portrait photography; gifts of inscribed photographs; mass-media circulation of images of beautiful women; and photography of ghosts, immortals, and imagined landscapes. Wu argues that the Chinese lyrical tradition provided rich resources for artistic creativity, self-expression, and embodied experience in the face of an increasingly technological and image-oriented society. An interdisciplinary study spanning literary studies, visual culture, and media history, Photo Poetics is an original account of media culture in early twentieth-century China and the formation of Chinese literary and visual modernities.

Comprehensive Sampling and Sample Preparation Josep M. Bayona, Paola Dugo, X. Chris Le, Hian Kee Lee, Xing-Fang Li, Heather Lord, 2012-12-31 Comprehensive Sampling and Sample Preparation is a complete treatment of the theory and methodology of sampling in all physical phases and the theory of sample preparation for all major extraction techniques. It is the perfect starting point for researchers and students to design and implement their experiments and support those experiments with quality-reviewed background information. In its four volumes, fundamentals of sampling and sample preparation are reinforced through broad and detailed sections dealing with Biological and Medical, Environmental and Forensic, and Food and Beverage applications. The contributions are organized to reflect the way in which analytical chemists approach a problem. It is intended for a broad audience of analytical chemists, both educators and practitioners of the art and can assist in the preparation of courses as well in the selection of sampling and sample preparation techniques to address the challenges at hand. Above all, it is designed to be helpful in learning more about these topics, as well as to encourage an interest in sampling and sample preparation by outlining the present practice of the technology and by indicating research opportunities. Sampling and Sample preparation is a large and well-defined field in Analytical Chemistry, relevant for many application areas such as medicine, environmental science, biochemistry, pharmacology, geology, and food science. This work covers all these aspects and will be extremely useful to researchers and students, who can use it as a starting point to design and implement their experiments and for quality-reviewed background information. There are limited resources that Educators can use to effectively teach the fundamental aspects of modern sample preparation technology. Comprehensive Sampling and Sample Preparation addresses this need, but focuses on the common principles of new developments in extraction technologies rather than the differences between techniques thus facilitating a more thorough understanding. Provides a complete overview of the field. Not only will help to save time, it will also help to make correct assessments and avoid costly mistakes in sampling in the process. Sample and sample preparation are integral parts of the analytical process but are often less considered and sometimes even completely disregarded in the available literature. To fill this gap, leading scientists have contributed 130 chapters, organized in 4 volumes, covering all modern aspects of sampling and liquid, solid phase and membrane extractions, as well as the challenges associated with different types of matrices in relevant application areas.
