Modelling German World War I Aircraft Dave Hooper,2021-06-28 Suitable for both those starting out in this hobby and more experienced modellers alike, this book is a one-stop guide to the creation of realistic models of German military aircraft of World War I. Examples of injection-moulded plastic, resin, vac-form, multi-media and limited-run plastic kits are included, as well as scratch-built enhancements. With over 300 colour photographs, this book includes: useful historical background to provide context and achieve realistic effects; how to choose the right kit; a list of essential workshop tools and materials and there are step-by-step instructions for the creation of a Fokker Eindecker in 1/48, an Albatros D-type in 1/32, a Rumpler C-type in 1/32 and a Gotha G-type in 1/72. There is a chapter on how to achieve accurate colours and markings, including lozenge types, with paint, airbrushing and decals. Finally, special focus on fine details, such as rigging, engines, interiors and ordinance is given.

Fokker E.V/ Tomasz J. Kowalski,2010-01-01 Includes a free decal sheet in 1:72, 1:48 and 1:32 The German Fokker E.V was a parasol-monoplane fighter aircraft, designed by Reinhold Platz. It entered into service with the Luftstreitkräfte in the last few months of World War I, yet after several fatal accidents due to wing failures, the E.V. was modified and re-designated as the Fokker D.VIII. Dubbed the Flying Razor by Allied pilots, the D.VIII had the distinction of scoring the last aerial victory of the war. This is a detailed, illustrated review of both aircraft, covering all modifications and includes color artwork profiles and a decal sheet in three scales: 1:72, 1:48 and 1:32. About the Series Famous Airplanes focuses on the great aircraft of history and their combat history, featuring color profiles and photographs of the premier planes from a particular unit, theater or service. With detailed development history, profiles of the men who flew them and strategic and tactical analysis, these books provide a wealth of information for any aviation enthusiast.

British Fighter Aircraft in World War I Mark C. Wilkins,2021-05-26 Go buy this book right now. It is rare that ISD gives an instant five-star rating to any new volume, but Mark C. Wilkins' British Fighter Aircraft in World War I is a rare book. — Indy Squadron Dispatch World War I witnessed unprecedented growth and innovation in aircraft design, construction, and as the war progressed—mass production. Each country generated its own innovations sometimes in surprising ways—Albatros Fokker, Pfalz, and Junkers in Germany and Nieuport, Spad, Sopwith and Bristol in France and Britain. This book focuses on the British approach to fighter design, construction, and mass production. Initially the French led the way in Allied fighter development with their Bleriot trainers then nimble Nieuport Scouts—culminating with the powerful, fast gun platforms as exemplified by the Spads. The Spads had a major drawback however, in that they were difficult and counter-intuitive to fix in the field. The British developed fighters in a very different way; Tommy Sopwith had a distinctive approach to fighter design that relied on lightly loaded wings and simple functional box-girder fuselages. His Camel was revolutionary as it combined all the weight well forward; enabling the Camel to turn very quickly—but also making it an unforgiving fighter for the inexperienced. The Royal Aircraft Factory's SE5a represented another leap forward with its comfortable cockpit, modern instrumentation, and inline engine—clearly influenced by both Spads and German aircraft. Each manufacturer and design team vied for the upper hand and deftly and quickly appropriated good ideas from other companies—be they friend or foe. Developments in tactics and deployment also influenced design—from the early reconnaissance planes, to turn fighters, finally planes that relied upon formation tactics, speed, and firepower. Advances were so great that the postwar industry seemed bland by comparison.

Fokker Aircraft of WWI Jack Herris,2020-10-16 Fokker Aircraft of WWI Volume 1| Spinne-M.10 & Watercraft is the first volume in a 6-volume set that details all Fokker aircraft of the war. Volume 1 tells the story of the first Fokker aircraft through the M.10, including the A.I, A.II, A.III, B.I, and B.II. This story is told in text, specifications, 316 rare photos, 9 color profiles, 13 1/72 scale drawings, and 4 1/48 scale drawings of the aircraft in its 206 pages.

Fokker D.VII Tomasz J. Kowalski,Szymon Grzwocz,Damian Majzak,2018-02 World War I was the time of dynamic development of aviation. Aircraft created during that period and pilots who fought in them, became legends that have fascinated generations of pilots and aviation enthusiasts. Legends of Aviation in 3D is a publishing series with a goal to present legendary aircraft from the pioneer era of military aviation in an innovative way. Thanks to color 3D renderings we can almost touch the Fokker D.VII, see its details, get to know its meticulous airframe structure and understand the phenomenon of this legendary aircraft. With the virtual Fokker D.VII, Marek Ryś inspires us to explore the history of the aircraft afresh. The modern 3D images impressively harmonize with the old photographs. Tomasz Kowalski tells us the story of pilots flying the new Fokker biplanes and takes us to the dark and romantic period of the Great War when knights of the sky were born and killed. We are convinced that Tomasz Kowalski and Marek Ryś's publication is a valuable addition to literature concerning the legendary Fokker D.VII and simultaneously a successful and exceptional attempt to present the earliest history of aviation in an original way. We have made all efforts to make the layout and quality of the series fulfill the needs of our readers.

German Fighter Aircraft in World War I Mark Wilkins,2019-08-19 Fully illustrated overview of the development and different types of German Fighter aircraft during World War I. Fighter aircraft were developed by during World War I at an unprecedented rate, as nascent air forces sought to achieve and maintain air supremacy. German manufacturers innovated at top speed, while constantly scrutinising the development of new enemy aircraft. The Germans also utilised the concept of systematic production or modular engineering during the war - Fokker capitalised on this aspect with all his aircraft built in a similar fashion - wooden wings with welded steel fuselages. This meant that they could be disassembled or reassembled quickly in the field - unlike many Allied aircraft. Pfalz and Albatros were the first to realise the importance of a streamlined fuselage - the precursor to all that would follow. Both of these companies built semi-monocoque fuselages using plywood to develop semi-stressed skin - the Allies had nothing like this. The Germans also perfect powerful inline engines, as exemplified by the Albatros fighters. These engines did not have the gyroscopic effect of the rotary engines and as such were easier and more stable to fly. Fokker was slow to give up his rotary engines but once he did, the result was the iconic Fokker D VII - years ahead of its time and the only aircraft specifically mentioned in the Treaty of Versailles that Germany could not build after the war. German Fighter Aircraft in World War I explores how German fighter aircraft were developed during the war, the innovations and trials that made the Fokker D VII possible, and the different makes and types of aircraft. Using unpublished images including photographs of surviving aircraft, archive images, and models and replicas, it shows details of aircraft that were kept top secret during the war. Extensively illustrated with 140 photos and ten colour profiles, this is will be essential reading for all WWI aviation enthusiasts and modellers. AUTHOR: Mark Wilkins is an historian, writer, museum professional, and professional modelmaker. He has been director & curator of the Cape Cod Maritime Museum and The Atwood House Museum (Chatham Historical Society), and has worked for the Smithsonian & Mystic Seaport. He writes and lectures on maritime and aviation history, and is a contributing author to magazines including Model Aviation, Model Airplane News, Fly RC, RC Model World, RCM &E, Smithsonian's Air & Space Magazine, and Aviation History, with a focus on WWI aircraft. 140 colour and b/w photos and illustrations, 10 colour profiles

Fokker D VII Aces of World War 1 Norman Franks,Greg VanWyngarden,2003-03-25 Designed in a great rush at the end of 1917 just in time to take part in the German standard fighter competition held in January/February 1918, the D VII easily walked away with first prize. As Germanys premier fighter unit, von Richthofens JG I (led by Hermann Göring in the wake of the 'Red Baron's' recent death) received the first examples of the D VII to reach the frontline in late April. Built to oppose the new generation of French SPAD XIII's and British SE 5a's and Camel fighters, the D VII was arguably the best all-round fighting scout of the Great War.

Fokker Dr. I Tomasz J. Kowalski,Marek Rys,2012-01-01 Illustrated color reference guide to the Fokker Dr. I The Fokker Dr. I was built by Fokker-Flugzeugwerke in 1917 and saw service during World War I. Manfred Von Richthofen, better known as the the Red Baron, is perhaps the most widely recognized Fokker pilot, gaining his final 19 victories in the aircraft before his death in April 1918.This new title in the Legends of Aviation series

comes complete with numerous photographs, 3D images and profiles of the World War I fighter aircraft.

The Fokker Dr.1 & D VII in World War I Heinz J. Nowarra,1991 These early fighters used by Germany are considered by many to be the best of World War I.

WW1 Aircraft Performance Anders F. Jonsson,2023 This is the first book to comprehensively cover WW1 fighter aircraft focusing on their relative flight performance utilizing modern computer simulations and if you want to get a better understanding of how they compared to each other, then this is the book for you. Based on the simulation results, a number of myths surrounding the modeled aircraft can be put to rest and in addition, they reveal some unexpected results that go against the grain of what has become generally accepted facts about these airplanes. While anecdotal evidence runs the risk of misremembering and embellishments, hard numbers based on computer simulations are more neutral and allow a more complete picture of these aircraft to emerge revealing their true strengths and weaknesses. Another first is the detailed analysis of how the aircraft compare in terms of acceleration, dive, and sustained and instantaneous turn performance done to a level previously not attempted in a book. The aircraft covered in this book are the Albatros D.Va, Fokker Dr.I, Fokker D.VIIF, Fokker E.V, Fokker D.VIII, Nieuport 28.C1, Pfalz D.III, Pfalz D.IIIa, Pfalz D.VIII, Siemens Schukert D.IV, Sopwith Camel, Sopwith Triplane, S.E.5a and SPAD XIII. As a background to the analysis of the results and the rationale for how the aircraft were modeled, the book also contains a brief summary of the state of the art in aerodynamics and aircraft design at the time. Fokker Dr. 1 Mark C. Wilkins,2020-06-28 This book presents the evolution and development of perhaps the most iconic German fighter of WWI--the Fokker Dr. 1 triplane or Dreidecker. The Dr. 1 was born from experiments in cantilever monoplanes and the excellent combat record of the Sopwith triplane, which appeared at the western front at the end of 1916. Only 320 Fokker Dr.1s were built, yet their imprint on aviation history was and is far reaching and enduring--perhaps due to those who flew them. Baron Manfred von Richthofen and his brother Lothar, as well as Werner Voss, Ernst Udet, and many others, all flew the triplane, helping burnish their image in collective memory. This book highlights the design and construction of the legendary Dr. 1, as well as showcasing many flying replicas and where they can be found. Also included are selected museums from around the world where Dr. 1s can currently be seen.

Fokker D. VII Tomasz J. Kowalski,2013-01-15 * Contains more than 160 historic photos and 175 of the highest quality 3D renders The Fokker D.VII was a German World War I fighter aircraft designed by Reinhold Platz of the Fokker-Flugzeugwerke. Germany produced around 3,300 D.VII aircraft in the summer and autumn of 1918. In service, the D.VII quickly proved itself to be a formidable aircraft. The Armistice ending the war specifically required Germany to surrender all D.VIIs to the Allies at the conclusion of hostilities. Surviving aircraft saw continued widespread service with many other countries in the years after World War I. This is the second publication from the Legends of Aviation in 3D series. The Fokker D.VII was one of the most successful feats of engineering of World War I. Designed by Reinhold Platz and wheeled out in the summer of 1918, the D. VII proved itself to be an indispensable part of the German fight. This fantastic new title from Kagero contains more than 160 historic photos and 175 of the highest quality 3D renders that illustrate every detail of the plane. The engine, cockpit and much more is shown from many different angles and views which gives you a chance to explore the plane in a way you have never imagined!

Fighter Aircraft of World Wars I & II Francis Crosby,2010 Photographs and text profile the differently types of fighter aircraft used in World War I and II and describe how the technology has changed since then.

Hungarian Fighter Colours Dénes Bernád,György Punka,George Punka,2013-08-22 This book describes and illustrates all the fighter aircraft used by the Hungarian armed forces during WW2. Covering both the indigenous designs employed early on through to the German and Italian fighters flown for much of the period, the camouflage and markings of these aircraft are described and illustrated in great detail. Fully illustrated with many rare wartime photos. Full color profiles of many representative aircraft. In the volume One are described the following aircraft: Fokker D.XVI FIAT CR.20, CR.20B AVIS I-IV. FIAT CR.30, CR.30B FIAT CR.32, CR.32bis FIAT CR.42, CR.42CN Messerschmitt Bf 109D-1 Messerschmitt Bf 109E-3, E-4, E-7 Messerschmitt Bf 109F-2, F-4
