British Fighter Aircraft in World War I Mark C. Wilkins, 2021-05-26 Go buy this book right now. It is rare that ISD gives an instant five-star rating to any new volume, but Mark C. Wilkins' *British Fighter Aircraft in World War I* is a rare book. — *Indy Squadron Dispatch* World War I witnessed unprecedented growth and innovation in aircraft design, construction, and as the war progressed—mass production. Each country generated its own innovations sometimes in surprising ways—Albatros Fokker, Pfalz, and Junkers in Germany and Nieuport, Spad, Sopwith and Bristol in France and Britain. This book focuses on the British approach to fighter design, construction, and mass production. Initially the French led the way in Allied fighter development with their Bleriot trainers then nimble Nieuport Scouts—culminating with the powerful, fast gun platforms as exemplified by the Spads. The Spads had a major drawback however, in that they were difficult and counter-intuitive to fix in the field. The British developed fighters in a very different way; Tommy Sopwith had a distinctive approach to fighter design that relied on lightly loaded wings and simple functional box-girder fuselages. His Camel was revolutionary as it combined all the weight well forward; enabling the Camel to turn very quickly—but also making it an unforgiving fighter for the inexperienced. The Royal Aircraft Factory's SE5a represented another leap forward with its comfortable cockpit, modern instrumentation, and inline engine—clearly influenced by both Spads and German aircraft. Each manufacturer and design team vied for the upper hand and deftly and quickly

appropriated good ideas from other companies—be they friend or foe. Developments in tactics and deployment also influenced design—from the early reconnaissance planes, to turn fighters, finally planes that relied upon formation tactics, speed, and firepower. Advances were so great that the postwar industry seemed bland by comparison.

Fokker D.VII Tomasz J. Kowalski,Szymon Grzwocz,Damian Majsak,2018-02 World War I was the time of dynamic development of aviation. Aircraft created during that period and pilots who fought in them, became legends that have fascinated generations of pilots and aviation enthusiasts. Legends of Aviation in 3D is a publishing series with a goal to present legendary aircraft from the pioneer era of military aviation in an innovative way. Thanks to color 3D renderings we can almost touch the Fokker D.VII, see its details, get to know its meticulous airframe structure and understand the phenomenon of this legendary aircraft. With the virtual Fokker D.VII, Marek Ryś inspires us to explore the history of the aircraft afresh. The modern 3D images impressively harmonize with the old photographs. Tomasz Kowalski tells us the story of pilots flying the new Fokker biplanes and takes us to the dark and romantic period of the Great War when knights of the sky were born and killed. We are convinced that Tomasz Kowalski and Marek Ryś's publication is a valuable addition to literature concerning the legendary Fokker D.VII and simultaneously a successful and exceptional attempt to present the earliest history of aviation in an original way. We have made all efforts to make the layout and quality of the series fulfill the needs of our readers.

German Fighter Aircraft in World War I Mark Wilkins,2019-08-19 Fully illustrated overview of the development and different types of German Fighter aircraft during World War I. Fighter aircraft were developed by during World War I at an unprecedented rate, as nascent air forces sought to achieve and

maintain air supremacy. German manufacturers innovated at top speed, while constantly scrutinising the development of new enemy aircraft. The Germans also utilised the concept of systematic production or modular engineering during the war - Fokker capitalised on this aspect with all his aircraft built in a similar fashion - wooden wings with welded steel fuselages. This meant that they could be disassembled or reassembled quickly in the field - unlike many Allied aircraft. Pfalz and Albatros were the first to realise the importance of a streamlined fuselage - the precursor to all that would follow. Both of these companies built semi-monocoque fuselages using plywood to develop semi-stressed skin - the Allies had nothing like this. The Germans also perfect powerful inline engines, as exemplified by the Albatros fighters. These engines did not have the gyroscopic effect of the rotary engines and as such were easier and more stable to fly. Fokker was slow to give up his rotary engines but once he did, the result was the iconic Fokker D VII - years ahead of its time and the only aircraft specifically mentioned in the Treaty of Versailles that Germany could not build after the war. *German Fighter Aircraft in World War I* explores how German fighter aircraft were developed during the war, the innovations and trials that made the Fokker D VII possible, and the different makes and types of aircraft. Using unpublished images including photographs of surviving aircraft, archive images, and models and replicas, it shows details of aircraft that were kept top secret during the war. Extensively illustrated with 140 photos and ten colour profiles, this is will be essential reading for all WWI aviation enthusiasts and modellers. **AUTHOR:** Mark Wilkins is an historian, writer, museum professional, and professional modelmaker. He has been director & curator of the Cape Cod Maritime Museum and The Atwood House Museum (Chatham Historical Society), and has worked for the

Smithsonian & Mystic Seaport. He writes and lectures on maritime and aviation history, and is a contributing author to magazines including Model Aviation, Model Airplane News, Fly RC, RC Model World, RCM &E, Smithsonian's Air & Space Magazine, and Aviation History, with a focus on WWI aircraft. 140 colour and b/w photos and illustrations, 10 colour profiles

Fokker E.V/ Tomasz J. Kowalski,2010-01-01 Includes a free decal sheet in 1:72, 1:48 and 1:32 The German Fokker E.V was a parasol-monoplane fighter aircraft, designed by Reinhold Platz. It entered into service with the Luftstreitkräfte in the last few months of World War I, yet after several fatal accidents due to wing failures, the E.V. was modified and re-designated as the Fokker D.VIII. Dubbed the Flying Razor by Allied pilots, the D.VIII had the distinction of scoring the last aerial victory of the war. This is a detailed, illustrated review of both aircraft, covering all modifications and includes color artwork profiles and a decal sheet in three scales: 1:72, 1:48 and 1:32. About the Series Famous Airplanes focuses on the great aircraft of history and their combat history, featuring color profiles and photographs of the premier planes from a particular unit, theater or service. With detailed development history, profiles of the men who flew them and strategic and tactical analysis, these books provide a wealth of information for any aviation enthusiast.

Fokker D VII Aces of World War 1 Norman Franks,Greg VanWyngarden,2003-03-25 Designed in a great rush at the end of 1917 just in time to take part in the German standard fighter competition held in January/February 1918, the D VII easily walked away with first prize. As Germany's premier fighter unit, von Richthofen's JG I (led by Hermann Göring in the wake of the 'Red Baron's' recent death) received the

first examples of the D VII to reach the frontline in late April. Built to oppose the new generation of French SPAD XIII's and British SE 5's and Camel fighters, the D VII was arguably the best all-round fighting scout of the Great War.

WW1 Aircraft Performance Anders F. Jonsson, 2023 This is the first book to comprehensively cover WW1 fighter aircraft focusing on their relative flight performance utilizing modern computer simulations and if you want to get a better understanding of how they compared to each other, then this is the book for you. Based on the simulation results, a number of myths surrounding the modeled aircraft can be put to rest and in addition, they reveal some unexpected results that go against the grain of what has become generally accepted facts about these airplanes. While anecdotal evidence runs the risk of misremembering and embellishments, hard numbers based on computer simulations are more neutral and allow a more complete picture of these aircraft to emerge revealing their true strengths and weaknesses. Another first is the detailed analysis of how the aircraft compare in terms of acceleration, dive, and sustained and instantaneous turn performance done to a level previously not attempted in a book. The aircraft covered in this book are the Albatros D.Va, Fokker Dr.I, Fokker D.VIIF, Fokker E.V, Fokker D.VIII, Nieuport 28.C1, Pfalz D.III, Pfalz D.IIIa, Pfalz D.VIII, Siemens Schukert D.IV, Sopwith Camel, Sopwith Triplane, S.E.5a and SPAD XIII. As a background to the analysis of the results and the rationale for how the aircraft were modeled, the book also contains a brief summary of the state of the art in aerodynamics and aircraft design at the time. Ronny Bar Profiles Ronny Barr,2023-05-02 When Anthony Fokker introduced his Eindecker with its practical machine gun synchronization system, allowing him to fire a machine gun on the line of flight between the rotating propeller blades, the true fighter aircraft was born. Throughout most of the First World War, German fighter pilots fought with courage, clever tactics, and technically impressive aircraft against a numerically superior enemy. And thanks to a government-backed advertising campaign, collectible cards, newspaper articles, promotions, awards and the flamboyant and colorful finishes of their mounts, they were arguably the 'rock stars' of the Great War. In Ronny Bar Profiles - German Fighters of the Great War Volume I, renowned profile artist Ronny Bar presents an exciting and colorful selection of more than 350 highly detailed profiles of the most important German-built single-seat fighters operational during the war. This volume, the first of two, covers the early to mid-war period, from the Fokker Eindecker of 1915 to the Albatros D-V of 1917.

Command Of The Air General Giulio Douhet,2014-08-15 In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision.

Douhet, together with Hugh “Boom” Trenchard of Great Britain and William “Billy” Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet’s central vision—that command of the air is all important in modern warfare—has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

Canadian Expeditionary Force, 1914-1919 G.W.L. Nicholson, Mark Osborne Humphries, 2015-11-01 Colonel G.W.L. Nicholson's *Canadian Expeditionary Force, 1914-1919* was first published by the Department of National Defence in 1962 as the official history of the Canadian Army's involvement in the First World War. Immediately after the war ended Colonel A. Fortescue Duguid made a first attempt to write an official history of the war, but the ill-fated project produced only the first of an anticipated eight

volumes. Decades later, G.W.L. Nicholson - already the author of an official history of the Second World War - was commissioned to write a new official history of the First. Illustrated with numerous photographs and full-colour maps, Nicholson's text offers an authoritative account of the war effort, while also discussing politics on the home front, including debates around conscription in 1917. With a new critical introduction by Mark Osborne Humphries that traces the development of Nicholson's text and analyzes its legacy, Canadian Expeditionary Force, 1914-1919 is an essential resource for both professional historians and military history enthusiasts.
