*U.S. Marines In Vietnam: Fighting The North Vietnamese, 1967* Maj. Gary L. Telfer,Lt.-Col. Lane Rogers,Dr. V. Keith Fleming Jr.,2016-08-09 This is the fourth volume in an operational and chronological series covering the U.S. Marine Corps' participation in the Vietnam War. This volume details the change in focus of the III Marine Amphibious Force (III MAF), which fought in South Vietnam's northernmost corps area, I Corps. This volume, like its predecessors, concentrates on the ground war in I Corps and III MAF's perspective of the Vietnam War as an entity. It also covers the Marine Corps participation in the advisory effort, the operations of the two Special Landing Forces of the U.S. Navy's Seventh Fleet, and the services of Marines with the staff of the U.S. Military Assistance Command, Vietnam. There are additional chapters on supporting arms and logistics, and a discussion of the Marine role in Vietnam in relation to the overall American effort.

**U.S. Marines In Vietnam: The Landing And The Buildup, 1965** Dr. Jack Shulimson,Maj. Charles M. Johnson,2016-08-09 This is the second volume in a series of chronological histories prepared by the Marine Corps History and Museums Division to cover the entire span of Marine Corps involvement in the Vietnam War. This volume details the Marine activities during 1965, the year the war escalated and major American combat units were committed to the conflict. The narrative traces the landing of the nearly 5,000-man 9th Marine Expeditionary Brigade and its transformation into the III Marine Amphibious Force, which by the end of the year contained over 38,000 Marines. During this period, the Marines established three enclaves in South Vietnam's northernmost corps area, I Corps, and their mission expanded from defense of the Da Nang Airbase to a balanced strategy involving base defense, offensive operations, and pacification. This volume continues to treat the activities of Marine advisors to the South Vietnamese armed forces but in less detail than its predecessor volume, *U.S. Marines in Vietnam, 1954-1964; The Advisory and Combat Assistance Era*.

**History and Hope** Kevin M. Cahill, 2013-05-01 The International Humanitarian Affairs Reader is a compilation of the most important chapters in the ten volume series published on this topic by Fordham University Press. Each chapter selected has been edited to delete dated material; where appropriate, chapters will have a brief addendum to present current information. The Series Editor, Kevin M. Cahill M.D., will write a substantial introductory essay explaining the academic evolution of the discipline of international humanitarian assistance. It will focus on the Fordham Experience--its Institute of International Humanitarian Affairs (IIHA) has developed practical programs for training field workers, especially those dealing with complex emergencies following conflicts, man-made or natural disasters. The book series has been an essential part of this effort. The new International Humanitarian Affairs Reader will be divided into seven sections, each introduced by a link page providing continuity for the text. There will be extensive appendices to assist in finding basic acronyms, abbreviations, important conventions, treaties and accepted standards. One appendix will also provide the full table of contents for each volume in the series, and all chapters are available for digital download. The International Humanitarian Affairs Reader, scheduled for publication in Spring 2013, should provide the growing number of people--both within and outside academia--with a better understanding of the multi-faceted demands posed by humanitarian assistance programs. At Fordham University there are programs at both the undergraduate (Minor) and graduate (Masters) levels. Fordham's innovative, very intense, one-month residential course for experienced humanitarian workers--the International Diploma in Humanitarian Assistance (IDHA)--is recognized worldwide. The Institute now has over 2000 graduates from 133 nations. Contributors to The International Humanitarian Affairs Reader include many of the leading figures in international diplomacy, relief and refugee operations, conflict resolution and reconciliation, and transition from disaster to stability and development, from the chaos of war to peace.

**Japanese Encephalitis and West Nile Viruses** John Mackenzie, A.D.T. Barrett, V. Deubel, 2012-12-06 Japanese encephalitis and West Nile viruses are members of the Japanese encephalitis serological group of the genus Flavivirus and therefore closely related genetically and antigenically. They share a number of properties, including the use of birds as their major wildlife maintenance host and Culicine mosquitoes for transmission, and they are both associated with severe human disease, as well as fatal infections in horses. The emergence of these two viruses, and their well-established propensity to colonise new areas, make it timely to re-examine their ecology, biology, molecular structure, replication and epidemiology, and these therefore provide the focus of this volume.

**Paradise of the Blind** Thu Huong Duong, Nina McPherson, 2002-08-20 Paradise of the Blind is an exquisite portrait of three Vietnamese women struggling to survive in a society where subservience to men is expected and Communist corruption crushes every dream. Through the eyes of Hang, a young woman in her twenties who has grown up amidst the slums and intermittent beauty of Hanoi, we come to know the tragedy of her family as land reform rips apart their village. When her uncle Chinh's political loyalties replace family devotion, Hang is torn between her mother's appalling self-sacrifice and the bitterness of her aunt who can avenge but not forgive. Only by freeing herself from the past will Hang be able to find dignity — and a future.

**The First Team** John Lundstrom, 2013-04-11 Hailed as one of the finest examples of aviation research, this comprehensive 1984 study presents a detailed and scrupulously accurate operational history of carrier-based air warfare. From the earliest operations in the Pacific through the decisive Battle of Midway, it offers a narrative account of how ace fighter pilots like Jimmy Thach and Butch O'Hare and their skilled VF squadron mates - called the first team - amassed a remarkable combat record in the face of desperate odds. Tapping both American and Japanese sources, historian John B. Lundstrom reconstructs every significant action and places these extraordinary fighters within the context of overall carrier operations. He writes from the viewpoint of the pilots themselves, after interviewing some fifty airmen from each side, to give readers intimate details of some of the most exciting aerial engagements of the war. At the same time he assesses the role the fighter squadrons played in key actions and shows how innovations in fighter tactics and gunnery techniques were a primary reason for the reversal of American fortunes. After more than twenty years in print, the book remains the definitive account and is being published in paperback for the first time to reach an even larger audience.

**Cacti** Park S. Nobel, 2002-07-10 There is nothing in the world like this book. It should be in every library and on the bookshelves of all those interested in cacti. The book will be an important resource for plant physiology, agronomy, and horticulture classes at both the undergraduate and graduate level.—Bruce Smith, Brigham Young University Cacti: Biology and Uses is a landmark publication of one of the world's most unique group of plants. Park Nobel, a leading authority on succulent plants, has assembled a collection of contributions that spans a wide range of issues extending from basic systematics, anatomy, physiology and ecology to considerations of conservation and human uses of this diverse group of plants. This nicely-produced and well-illustrated volume provides a resource that will be of great use to a wide range of scientists, practitioners, and enthusiasts of this plant group.—Harold Mooney, Paul S. Achilles Professor of Environmental Biology, Stanford University

**Warbird Factory** John M. Fredrickson, 2015-09-10 Explore the WWII history of the company that later became a part of Boeing and made more aircraft from 1938 to 1944 than any other company in the United States. During World War II, Los Angeles was the ultimate boom town. By the end of the war, the L.A. area had produced 17 percent of all of America's war needs. North American Aviation, Inc. (NAA), operating out of their main Inglewood, California, plant, which is south of and adjacent to the city, was a key player in that work. From 1938 to 1944, NAA built

over 40,000 aircraft, more than any other company in the United States. The bulk of them were of three iconic types designed by NAA: - The P-51 Mustang, arguably the best fighter of WWII. - B-25 Mitchell medium bombers, which saw worldwide combat. - Two-seat military pilot trainers, such as the AT-6 Texan. This is a fascinating story of a remarkable time in aviation history, when American businesses helped fund the arsenal of democracy that helped defeat the Axis powers. Warbird Factory tells this story with over 200 photographs, many of which come directly from the NAA/Boeing archives, where they have resided since WWII. This is an essential book for anyone interested in warbirds, aviation, Boeing/NAA, WWII, and/or the history of Southern California!
