Flying Catalinas Andrew Hendrie,2012-10-24 The consolidated PBY Catalina was probably the most versatile and successful flying boat/amphibian ever built, serving not just with the US Army, Navy and Coast Guard during the Second World War, but also with the air forces of Britain, Canada, Australia and New Zealand, with the Danes, Free French and Norwegians as well as in Brazil, Chile, Indonesia and elsewhere. With a remarkable lifting capacity and endurance, this long-range twin-engine aircraft could absorb a great deal of punishment and still return home after flights lasting an entire day and covering thousands of miles. It was employed as a maritime reconnaissance aircraft, as a bomber and torpedo-bomber, as an anti submarine weapon, as a mine layer, as a special operations machine and as a search-and-rescue craft by day and night. It ferried stores, mail and people - many of them sick and injured - across the world's oceans. In this book Andrew Hendrie tells the story of the Flying Cats, of their achievements and exploits, of the heroism of many of the crews and the problems they had to endure.

Consolidated Pby-5a Catalina Walk Around David Doyle,2009 The Consolidated PBY is the most readily recognized and widely produced flying boat design ever made. The aircraft, which came to be known as the Catalina, has its origins in Consolidated's 1932 Model 28. The US Navy began taking deliveries of the PBY-5A in October 1941 and then placed orders for over 600 more following Pearl Harbor. During WWII, PBYs conducted anti-submarine warfare, patrol bombing, convoy escort, search-and-rescue operations, and cargo transport. Some PBY-5As went to the US Army and others to US Allies - Australia, Britain, Canada and the Free French forces. This book presents a comprehensive view of the Catalina with 170 photographs, color profiles and detailed line drawings.

PBY CATALINA PILOTS FLIGHT OPE United States Navy,Consolidated Aircraft,2010-02-01 One of the most widely-used multi-role Allied aircraft of WWII, Consolidated's PBY Catalina was a flying boat to be reckoned with. They were used as anti- submarine warfare platforms in the Atlantic, and gained notoriety in the Pacific as rescue and reconnaissance platforms, and as bombers. With their distinctive fuselages painted the shade of midnight, the Black Cats undertook daring raids of Japanese shipping and shore installations. Originally printed by the U.S. Navy during World War 2, this flight handbook taught pilots everything they needed to know before entering the cockpit. Classified Restricted, the manual was recently declassified and is here reprinted in book form. This affordable facsimile has been slightly reformatted. Care has been taken to preserve the integrity of the text.

Pby Catalina David Doyle,2023-04-28 A Legends of Warfare guide to the most iconic military flying boat ever produced.

Consolidated PBY Catalina David Legg,2002 With its distinctive design, the PBY Catalina flying boats soared through World War II and into history as one of the most resourceful aircraft ever flown. Other books concentrate on the Catalina's wartime feats, but this is the first full account of the PBY's colorful operational history outside of the war. Catalina expert David Legg offers an exhaustive country-by-country survey of both the military and commercial uses of this adaptable aircraft with detailed listings of their registration, type, place of manufacture, and construction numbers. Intriguing historical notes on an individual aircraft's adventures while fighting fires, performing survey work, and flying in support of Cold War communications networks, round out the volume. Everyone interested in flying boats will find the details of this work not only informative, but entertaining as well.

PBY Roscoe Creed,1986 The greatest of all flying boats, the PBY Catalina, was one of the most versatile aircraft ever built. This definitive study, first published in 1985, pulls together in a single volume all of the aircraft's fascinating facts. The author carefully analyzes the PBY's dual use in the war as a plane of mercy and as a bomber, and he chronicles the flying boat's contributions in peacetime.

World War II Illustrated Number 3 Merriam Press,2020-11-30 World War II Illustrated Number 3 provides extensive pictorial coverage, together with text and data, of the Consolidated PBY Catalina, which was produced as a flying boat and seaplane amphibian in the 1930s and 1940s. In Canadian service it was known as the Canso. It was one of the most widely used seaplanes of World War II. Catalinas served with every branch of the United States Armed Forces and in the air forces and navies of many other nations. The last military PBYs served until the 1980s. More than 80 years after its first flight, the aircraft continued to fly as a waterbomber (or airtanker) in aerial firefighting operations in some parts of the world. None remain in military service. With 550 photographs, 8 drawings, 3 documents.

US Navy PBY Catalina Units of the Atlantic War Ragnar J Ragnarsson,2012-12-20 Several books have been written about US naval patrol aviation in World War 2, but none do full justice to the role played by patrol squadrons of the US Navy in the longest, most bitterly fought campaign of the war the Battle of the Atlantic. From the Arctic to the Equator, anti-submarine aircraft of the US Navy patrolled both sides of the stormy Atlantic alongside their allied counterparts, escorting merchant shipping through submarine-infested waters the crucial lifeline from the United States to Great Britain and the Mediterranean, and staging troops and supplies for the ultimate liberation of North Africa and Europe. This book details the PBY Catalina, without contest the most successful flying boat ever designed, and a key element in the success of the Atlantic War.

American Airpower Comes Of Age—General Henry H. “Hap” Arnold’s World War II Diaries Vol. II [Illustrated Edition] Gen. Henry H. “Hap.” Arnold,2015-11-06 Includes the Aerial Warfare In Europe During World War II illustrations pack with over 180 maps, plans, and photos. Gen Henry H. “Hap.” Arnold, US Army Air Forces (AAF) Chief of Staff during World War II, maintained diaries for his several journeys to various meetings and conferences throughout the conflict. Volume 1 introduces Hap Arnold, the setting for five of his journeys, the diaries he kept, and evaluations of those journeys and their consequences. General Arnold’s travels brought him into strategy meetings and personal conversations with virtually all leaders of Allied forces as well as many AAF troops around the world. He recorded his impressions, feelings, and expectations in his diaries. Maj Gen John W. Huston, USAF, retired, has captured the essence of Henry H. Hap Arnold—the man, the officer, the AAF chief, and his mission. Volume 2 encompasses General Arnold’s final seven journeys and the diaries he kept therein.

American Flying Boats and Amphibious Aircraft E.R. Johnson,2016-03-29 This work is a comprehensive, heavily illustrated history of the many flying boats and amphibious aircraft designed and built in the United States. It is divided into three chronological sections: the early era (1912–1928), the golden era (1928–1945), and the post-war era (1945–present), with historical overviews of each period. Within each section, individual aircraft types are listed in alphabetical order by manufacturer or builder, with historical background, technical specifications, drawings, and one or more photographs. Appendices cover lesser known flying boat and amphibian types as well as various design concepts that never achieved the flying stage.

Grave Misfortune: The USS Indianapolis Tragedy Richard A. Hulver,2019-06-03 Dedicated to the Sailors and Marines who lost their lives on the final voyage of USS Indianapolis and to those

who survived the torment at sea following its sinking. plus the crews that risked their lives in rescue ships. The USS Indianapolis (CA-35) was a decorated World War II warship that is primarily remembered for her worst 15 minutes. . This ship earned ten (10) battle stars for her service in World War II and was credited for shooting down nine (9) enemy planes. However, this fame was overshadowed by the first 15 minutes July 30, 1945, when she was struck by two (2) torpedoes from Japanese submarine I-58 and sent to the bottom of the Philippine Sea. The sinking of Indianapolis and the loss of 880 crew out of 1,196 --most deaths occurring in the 4-5 day wait for a rescue delayed --is a tragedy in U.S. naval history. This historical reference showcases primary source documents to tell the story of Indianapolis, the history of this tragedy from the U.S. Navy perspective. It recounts the sinking, rescue efforts, follow-up investigations, aftermath and continuing communications efforts. Included are deck logs to better understand the ship location when she sunk and testimony of survivors and participants. For additional historical publications produced by the U.S. Naval History and Heritage Command, please check out these resources here: <https://bookstore.gpo.gov/agency/naval-history-heritage-command> Year 2016 marked the 71st anniversary of the sinking and another spike in public attention on the loss -- including a big screen adaptation of the story, talk of future films, documentaries, and planned expeditions to locate the wreckage of the warship.

Shooting the Pacific War Thayer Soule,2014-10-17 Thayer Soule couldn't believe his orders. As a junior officer with no military training or indoctrination and less than ten weeks of active duty behind him, he had been assigned to be photographic officer for the First Marine Division. The Corps had never had a photographic division before, much less a field photographic unit. But Soule accepted the challenge, created the unit from scratch, established policies for photography, and led his men into combat. Soule and his unit produced films and photos of training, combat action pictures, and later, terrain studies and photographs for intelligence purposes. Though he had never heard of a photo-litho set, he was in charge of using it for map production, which would prove vital to the division. Shooting the Pacific War is based on Soule's detailed wartime journals. Soule was in the unique position to interact with men at all levels of the military, and he provides intriguing closeups of generals, admirals, sergeants, and privates -everyone he met and worked with along the way. Though he witnessed the horror of war firsthand, he also writes of the vitality and intense comradeship that he and his fellow Marines experienced. Soule recounts the heat of battle as well as the intense training before and rebuilding after each campaign. He saw New Zealand in the desperate days of 1942. His division was rebuilt in Australia following Guadalcanal. After a stint back in Quantico training more combat photographers, he went to Guam and then to the crucible of Iwo Jima. At war's end he was serving as Photographic Officer, Fleet Marine Force Pacific, at Pearl Harbor.

366 Days of World War II Richard Binder,2015-02-21 World War II lasted six years. That's 2,194 days. What happened in those six years? In this new diary, author Richard Binder takes a radical new approach to telling the story of the worst conflict humanity has ever experienced. Instead of trying to cover everything, he relates the happenings of just 366 days, the length of a single year. Choosing events great and small from the beginning of the war to its bitter end, he gives you a fascinating and sometimes shocking look at things you know from your high-school history and things you may never have heard of.

"An Honorable Place in American Air Power" Frank A. Blazich (Jr.),2020 Military historian and Civil Air Patrol (CAP) member Frank A. Blazich Jr. collects oral and written histories of the CAP's short-lived--but influential--coastal air patrol operations of World War II and expands it in a scholarly monograph that cements the legacy of this vital civil-military cooperative effort--

Attu John Haile Cloe,United States. National Park Service,2017 The Battle of Attu, which took place from 11-30 May 1943, was a battle fought between forces of the United States, aided by Canadian reconnaissance and fighter-bomber support, and the Empire of Japan on Attu Island off the coast of the Territory of Alaska as part of the Aleutian Islands Campaign during the American Theater and the Pacific Theater and was the only land battle of World War II fought on incorporated territory of the United States. It is also the only land battle in which Japanese and American forces fought in Arctic conditions. The more than two-week battle ended when most of the Japanese defenders were killed in brutal hand-to-hand combat after a final banzai charge broke through American lines. The Cutting Edge Mark A. Lorell,Hugh P. Levaux,1998 The proposition that innovation is critical in the cost-effective design and development of successful military aircraft is still subject to some debate. RAND research indicates that innovation is promoted by intense competition among three or more industry competitors. Given the critical policy importance of this issue in the current environment of drastic consolidation of the aerospace defense industry, the authors here examine the history of the major prime contractors in developing jet fighters since World War II. They make use of an extensive RAND database that includes nearly all jet fighters, fighter-attack aircraft, and bombers developed and flown by U.S. industry since 1945, as well as all related prototypes, modifications, upgrades, etc. The report concludes that (1) experience matters, because of the tendency to specialize and thus to develop system-specific expertise; (2) yet the most dramatic innovations and breakthroughs came from secondary or marginal players trying to compete with the industry leaders; and (3) dedicated military R&D conducted or directly funded by the U.S. government has been critical in the development of new higher-performance fighters and bombers.
