Cut & Assemble World War II Paper Soldiers A. G. Smith, 2017-10-18 Over 100 free-standing, easy-to-assemble World War II fighters wielding bazookas, firing mortars and machine guns, clearing mines, digging trenches, and more. Accessories include a tank, field gun, flag, pup tents, other items.

A15 Cruiser Mk.VI Crusader Tank A Technical History P. M. Knight, 2015-05-17 There can be few tanks that have proved as controversial in their deployment as the Crusader, a tank that was invested with high hopes on its entry into service in 1941. This book investigates in unprecedented detail the issues that impinged on its service life. Drawing extensively on original archive sources, a new perspective is drawn on both the employment of the tank itself, and on British tank development of the era. The complex story that unfolds encompasses many interwoven and sometimes contradictory threads, allowing the author to reach both perceptive and surprising conclusions.

Very Special Ships Arthur Nicholson, 2015-10-30 *Very Special Ships* is the first full-length book about the six Abdiel-class fast minelayers, the fastest and most versatile ships to serve in the Royal Navy in the Second World War. They operated not only as offensive minelayers — dashing into enemy waters under cover of darkness — but in many other roles, most famously as blockade runners to Malta. In lieu of mines, they transported items as diverse as ammunition, condensed milk, gold, and VIPs. Distinguished by their three funnels, the Abdiels were attractive, well-designed ships, and they were also unique — no other navy had such ships, and so they were sought-after commands and blessed with fine captains. To give the fullest picture of this important class of ships, the book details the origins and history of mines, minelayers, and minelaying; covers the origins and design of the class; describes the construction of each of the six ships, and the modified design of the last two; tells in detail of the operational careers of the ships in the second World War, when they played vital roles in the battle of Crete and the siege of Malta, plied the hazardous route to Tobruk, and laid mines off the Italian coast. The post-war careers of the surviving ships is also documented. Written to appeal to naval enthusiasts, students of World War II and modelmakers, the author tells the story of these ships through first-hand accounts, official sources, and specially-commissioned drawings and photographs.

The Smell of Kerosene National Aeronautics and Space Administration, Donald L. Mallick, Peter W. Merlin, 2023-12-28 This book puts the reader in the pilot's seat for a day at the office unlike any other. *The Smell of Kerosene* tells the dramatic story of a NASA research pilot who logged over 11,000 flight hours in more than 125 types of aircraft. Donald Mallick gives the reader fascinating first-hand

description of his early naval flight training, carrier operations, and his research flying career with NASA. After transferring to the NASA Flight Research Center, Mallick became involved with projects that further pushed the boundaries of aerospace technology. These included the giant delta-winged XB-70 supersonic airplane, the wingless M2-F1 lifting body vehicle, and triple-sonic YF-12 Blackbird. Mallick also test flew the Lunar Landing Research Vehicle and helped develop techniques used in training astronauts to land on the Moon.

Crusader and Covenanter Cruiser Tanks 1939–45 David Fletcher, 2012-05-20 The Covenanter (which never saw active service) and Crusader Cruiser tanks were developed between 1939 and 1940. The Crusader first saw action in the North African desert in June 1941: its speed and sleek design made it a hard target to hit, and the tank was well-respected by the Afrikakorps for its velocity in combat. But its hurried development prior to World War II also made it prone to mechanical failure. This book examines the Covenanter and the many variants of the Crusader tank, detailing the designs, developments and disappointments of these infamous World War II tanks.

Brazen Chariots Robert Crisp, 1959 The story of Operation Crusader launched by the Eighth Army on 18 November 1941, against the Axis forces which stood on the borders of Egypt and around beleaguered Tobruk.

Deep Maneuver Jack D Kern Editor, Jack Kern, 2018-10-12 Volume 5, *Deep Maneuver: Historical Case Studies of Maneuver in Large-Scale Combat Operations*, presents eleven case studies from World War II through Operation Iraqi Freedom focusing on deep maneuver in terms of time, space and purpose. Deep operations require boldness and audacity, and yet carry an element of risk of overextension - especially in light of the independent factors of geography and weather that are ever-present. As a result, the case studies address not only successes, but also failure and shortfalls that result when conducting deep operations. The final two chapters address these considerations for future Deep Maneuver.

Global Trends 2030 National Intelligence Council, 2018-02-07 This important report, *Global Trends 2030-Alternative Worlds*, released in 2012 by the U.S. National Intelligence Council, describes megatrends and potential game changers for the next decades. Among the megatrends, it analyzes: - increased individual empowerment - the diffusion of power among states and the ascent of a networked multi-polar world - a world's population growing to 8.3 billion people, of which sixty percent will live in urbanized areas, and surging cross-border migration - expanding demand for food, water,

and energy It furthermore describes potential game changers, including: - a global economy that could thrive or collapse - increased global insecurity due to regional instability in the Middle East and South Asia - new technologies that could solve the problems caused by the megatrends - the possibility, but by no means the certainty, that the U.S. with new partners will reinvent the international system Students of trends, forward-looking entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades will find this essential reading.

Public Opinion Walter Lippmann,1922 In what is widely considered the most influential book ever written by Walter Lippmann, the late journalist and social critic provides a fundamental treatise on the nature of human information and communication. The work is divided into eight parts, covering such varied issues as stereotypes, image making, and organized intelligence. The study begins with an analysis of the world outside and the pictures in our heads, a leitmotif that starts with issues of censorship and privacy, speed, words, and clarity, and ends with a careful survey of the modern newspaper. Lippmann's conclusions are as meaningful in a world of television and computers as in the earlier period when newspapers were dominant. Public Opinion is of enduring significance for communications scholars, historians, sociologists, and political scientists. Copyright © Libri GmbH. All rights reserved.

A Midshipman's War Frank Wade,2005 The World War II Mediterranean sea battles are not well known. Many of our ships were sunk, but Malta was saved. North Africa was cleared and Sicily taken in 1943.

The Fingerprint U. S. Department Justice,2014-08-02 The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.

Flying beyond the stall Douglas A. Joyce,2014 The X-31 Enhanced Fighter Maneuverability Demonstrator was unique among experimental aircraft. A joint effort of the United States and Germany, the X-31 was the only X-plane to be designed, manufactured, and flight tested as an

international collaboration. It was also the only X-plane to support two separate test programs conducted years apart, one administered largely by NASA and the other by the U.S. Navy, as well as the first X-plane ever to perform at the Paris Air Show. *Flying Beyond the Stall* begins by describing the government agencies and private-sector industries involved in the X-31 program, the genesis of the supermaneuverability concept and its initial design breakthroughs, design and fabrication of two test airframes, preparation for the X-31's first flight, and the first flights of Ship #1 and Ship #2. Subsequent chapters discuss envelope expansion, handling qualities (especially at high angles of attack), and flight with vectored thrust. The book then turns to the program's move to NASA's Dryden Flight Research Center and actual flight test data. Additional tasking, such as helmet-mounted display evaluations, handling quality studies, aerodynamic parameter estimation, and a tailless study are also discussed. The book describes how, in the aftermath of a disastrous accident with Ship #1 in 1995, Ship #2 was prepared for its outstanding participation in the Paris Air Show. The aircraft was then shipped back to Edwards AFB and put into storage until the late 1990s, when it was refurbished for participation in the U. S. Navy's VECTOR program. The book ends with a comprehensive discussion of lessons learned and includes an Appendix containing detailed information.
