Curtiss P-40 Leszek A. Wieliczko, Krzysztof Janowicz, 2010-07-01 * Free extras for modelers, including decals and masking foil
The Curtiss P-40 Warhawk was an American single-engine, single-seat, all-metal fighter and ground attack aircraft that first flew in 1938. It was used by the air forces of 28 nations, including those of most Allied powers during World War II, and remained in front line service until the end of the war. By November 1944, when production of the P-40 ceased, 13,738 had been built, all at Curtiss-Wright Corporation's main production facility at Buffalo, New York. The P-40 design was a modification of the previous Curtiss P-36; this reduced development time and enabled a rapid entry into production and operational service. The P-40's lack of a two-stage supercharger made it inferior to Luftwaffe fighters such as the Messerschmitt Bf 109 or the Focke-Wulf Fw 190 in high altitude combat and it was rarely used in operations in Northwest Europe. Between 1941 and 1944, however, the P-40 played a critical role with Allied air forces in three major theaters: North Africa, the Southwest Pacific and China. It also had a significant role in the Middle East, Southeast Asia, Eastern Europe, Alaska and Italy. About the series Monographs is a series focusing on an individual type of aircraft. Each monograph contains descriptions of the aircraft's origins, its variants and combat history. Each volume includes several hundred archive photographs, technical scale drawings and colour profile artworks, with free extras for modelers, including decals and masking foil.

P-40 Curtiss Olivier Souleys, 2008-10-28 Planes and Model Kits" is dedicated to the Curtiss P-40. Despite its limits, the Warhawk is an aircraft which played a major part in the whole war and on all the front lines, displaying the most colorful insignia and "nose arts" of WW2. This book has no historical claim and makes us discover the B, E, F, N versions of this mythical fighter through the most beautiful models currently available. Each of the four versions are organized around one main technical part, which presents in a clear and dynamic way some of the well-tried knacks used by the most experienced modelers.

Pictorial history of the Curtiss P-40 Warhawk, an American single-engined, single-seat, all-metal fighter and ground-attack aircraft that first flew in 1938. The Warhawk was used by most Allied powers during World War II, and remained in frontline service until the end of the war. It was the third most-produced American fighter, after the P-51 and P-47; by November 1944, when production of the P-40 ceased, 13,738 had been built. History with photos and illustrations covering development, operational history, variants and more, in service with the USAAF, RAF, RCAF, RAAF, RNZAF, NEIAF, Finland, France, Russia, Turkey, Brazil, Japan. 561 photos, illustrations and drawings.

Curtiss P-40 D/E Kittyhawk Mk I/Ia Leszek Wieliczko, Tom Zmuda, 2009-12-15 * Includes free decals and masking foil Highly detailed publication covering these two famous World War II fighter aircraft, built by the Americas in 1938 and used by 28 Allied nations in World War II. Warhawk was the name the United States Army Air Corps adopted for all models, making it the official name in the United States for all P-40s. The British Commonwealth and Soviet air forces used the name Kittyhawk for models equivalent to the P-40D and all later variants. Containing dozens of archive black and white and color photos, including 35 pages of close-up and walkaround shots, 4 pages of color artwork profiles, and 8 pages of line drawings, this is an ideal reference for both the enthusiast and modeler, with free masking foil included. About the Series Photosniper is a classic series of highly illustrated photo books on the best machines of war, creating, with numerous images, a close-up, walk-around view for each aircraft or vehicle. With emphasis on the key features of each machine, including their variations, artwork, markings, insignia and modifications, customizing and creating a model could not be easier. Includes a free decal sheet.

Modelling the Rare Curtiss Fighters Jim Norfolk, 1999-05-01 The second in a series of model aircraft plans books, this book tells the story of the successful and not so good aircraft that Curtiss Wright Aircraft Corp developed shortly before WW2. They started off well with the P-36, a breakthrough in fighter design and carried on with the famous P-40. They then tried to keep it going with various experimentals; the P-37, the P-42, P-46 and P-53, then finishing off with a near hit in the P-60 which turned out to be too little too late. These aircraft are designed for free flight powered with a rubber band but could be adapted to a small gas or electric motor. These models are around 1/24th scale. The book contains a brief description of the aircraft, design, construction and trimming and flying instructions. The book is well illustrated with photos showing each step of the way to successfully building the model. This book has been reviewed in several model magazines including Cartens Publications FLYING MODELS, MODEL FLYER (Br), Model Airplane News and MAAC Magazine.

US Army Air Force Fighters William Green, Gordon Swanborough, 1977

Flying Tigers Daniel Ford, 2023-05-01 During World War II, in the skies over Burma and China, a handful of American pilots met and bloodied the Imperial Wild Eagles of Japan and won immortality as the Flying Tigers. One of America's most famous combat forces, the Tigers were recruited to defend beleaguered China for \$600 a month and a bounty of \$500 for each Japanese plane they shot down--fantastic money in an era when a Manhattan hotel room cost three dollars a night. This May 2023 revision has never-before-published information about Chennault's early years. Admirable, wrote Chennault biographer Martha Byrd of Ford's original text. A readable book based on sound sources. Expect some surprises. Flying Tigers won the Aviation/Space Writers Association Award of Excellence in the year of its first publication.

The Army Air Forces in World War II: Men and planes ,1948

The Cutting Edge Mark A. Lorell, Hugh P. Levaux, United States. Air Force, Project Air Force (U.S.), 1998 The proposition that innovation is critical in the cost-effective design and development of successful military aircraft is still subject to some debate. RAND

research indicates that innovation is promoted by intense competition among three or more industry competitors. Given the critical policy importance of this issue in the current environment of drastic consolidation of the aerospace defense industry, the authors here examine the history of the major prime contractors in developing jet fighters since World War II. They make use of an extensive RAND database that includes nearly all jet fighters, fighter-attack aircraft, and bombers developed and flown by U.S. industry since 1945, as well as all related prototypes, modifications, upgrades, etc. The report concludes that (1) experience matters, because of the tendency to specialize and thus to develop system-specific expertise; (2) yet the most dramatic innovations and breakthroughs came from secondary or marginal players trying to compete with the industry leaders; and (3) dedicated military R&D conducted or directly funded by the U.S. government has been critical in the development of new higher-performance fighters and bombers.

Sicily 1943 Steven J. Zaloga, 2013-01-20 Not only did the Sicily operation represent a watershed in tactical development of combined arms tactics, it was also an important test for future Allied joint operations. Senior British commanders left the North African theater with a jaundiced and dismissive view of the combat capabilities of the inexperienced US Army after the debacle at Kasserine Pass in Tunisia in February 1943. Sicily was a demonstration that the US Army had rapidly learned its lessons and was now capable of fighting as a co-equal of the British Army. The Sicily campaign contained a measure of high drama as Patton took the reins of the Seventh US Army and bent the rules of the theater commander in a bold race to take Palermo on the northern Sicilian coast. When stiff German resistance halted Montgomery's main assault to Messina through the mountains, Patton was posed to be the first to reach the key Sicilian port and end the campaign. The Sicily campaign contains a fair amount of controversy as well including the disastrous problems with early airborne assaults and the Allied failure to seal the straits of Messina, allowing the Germans to withdraw many of their best forces.
