The Smell of Kerosene National Aeronautics and Space Administration, Donald L. Mallick, Peter W. Merlin, 2023-12-28 This book puts the reader in the pilot's seat for a day at the office unlike any other. The Smell of Kerosene tells the dramatic story of a NASA research pilot who logged over 11,000 flight hours in more than 125 types of aircraft. Donald Mallick gives the reader fascinating first-hand description of his early naval flight training, carrier operations, and his research flying career with NASA. After transferring to the NASA Flight Research Center, Mallick became involved with projects that further pushed the boundaries of aerospace technology. These included the giant delta-winged XB-70 supersonic airplane, the wingless M2-F1 lifting body vehicle, and triple-sonic YF-12 Blackbird. Mallick also test flew the Lunar Landing Research Vehicle and helped develop techniques used in training astronauts to land on the Moon.

Dictionary of Disasters at Sea During Th F.L CHARLES HOCKING, 1969 A mammoth and sobering record, listing the tragically frequent disasters at sea between 1824 and 1962. The book, though daunting in

size, is easy to use, giving an alphabetical list of every ship lost, with the circumstances of the sinking, and the technical data of each ship: length, beam, tonnage, speed, propulsion etc. This fascinating work of reference should be on the shelves or in the cabin of any maritime enthusiast.

Influence Without Boots on the Ground Larissa Forster, 2013 Military intervention always has been and always will be an important part of foreign policy, a tool to further national interests and influence world events. Many scholars have tried to explain the intervention behavior of states in crises, conflicts, and wars. When and why do states intervene, and what are reasons for nonintervention? What conflicts and crises are more likely to call for intervention, and why? When is intervention successful? The explanations are manifold and include political, military, economic, social, environmental, domestic, and humanitarian factors. The theoretical literature covers a gamut of realist intentions, ranging from security, power, and national interests, as guides to state action; to emphasis on international trade and economics; and to domestic politics. Some argue for explanations based on idealistic aspirations, such as democracy and human rights. Many studies focus on a mix of different reasons. From this vast field, the author has selected international crises involving any form of U.S. activity in the years 1946-2006. Within these U.S. activities, the author distinguishes between crisis response with and without naval forces, as this study intends to advance the knowledge of the use of U.S. naval forces as a response to international crises and to contribute to a better understanding of when and how the U.S. Navy is deployed.

Coalition Air Warfare in the Korean War, 1950-1953 Air Force Historical Foundation. Symposium, 2005 In commemoration of the fiftieth anniversary of the Korean War, the official history offices of the U.S.

Army, Navy, Marine Corps, and Air Force and their respective historical associations collaborated to sponsor as comprehensive a symposium as possible, including as participants some of the coalition partners who contributed forces and weapons to the war. The intent of this symposium, titled Coalition Air Warfare during the Korean War, 1950 -1953, was to focus not only on the contributions made by the armed forces of the United States, but also on those of America's allies. The diverse group of panelists and speakers included not only scholars with subject matter expertise, but also veteran soldiers, sailors, and airmen who had served in that conflict. It was hoped that the melding of these diverse perspectives would provide interesting, if sometimes conflicting, views about the Korean War. The symposium organizers designated an agenda of six specific panels for investigation, including Planning and Operations; Air Superiority, Air Support of Ground Forces; Air Interdiction and Bombardment, Air Reconnaissance and Intelligence, and Logistical Support of Air Operations. Each session began with commentary by the panel chairman, which was followed by formal papers, and in some instances included a lively question and answer session. The papers and most of the proceedings found their way into print and are recorded here in an effort to permanently capture the activities, challenges, contributions, and heroics of the coalition air forces and the airmen who fought during the Korean conflict.

World War II at Sea [2 volumes] Spencer C. Tucker, 2011-11-10 The war at sea was a key aspect of World War II, one that is too-often under-studied. This comprehensive encyclopedia shares current understandings of the struggle to control the seas during that conflict—and it opens our eyes to the reasons sea power continues to be of critical importance today. Scholarly treatment of World War II is constantly

changing as new materials inform new interpretations. At the same time, current military operations lead to reevaluation of the tactics and technologies of the past. Marshalling the latest information and insights into this epic conflict, *World War II at Sea: An Encyclopedia* will enable students and other interested readers to explore specific naval engagements, while also charting the transformation of naval history through innovations in ordnance. In treating the naval aspects of World War II, this two-volume ready reference enhances the understanding of a part of the war that is often overshadowed by the fighting on land and in the air. The encyclopedia focuses on the events, individuals, organizations, and ideas that shaped the world's navies during World War II, as well as the resultant battles that changed naval history. It also covers the numerous innovations that occurred during the conflict and shows how strategies evolved and were executed.

Under the Red Sea Sun Edward Ellsberg, 2014-06-24 A Navy admiral's firsthand account of the Allied salvage operation that played a key role in recovering North Africa from the Nazis during World War II. By 1942, Mussolini's forces were on the run in East Africa. In order to slow the Allied advance, the Italians used audacious tactics—including making ports inoperable, leaving the Allies without the infrastructure

necessary to continue the war effort. At Massawa, Eritrea, the fleeing Italians left the largest mass wreck in the world, turning a vital port into a tangle of shattered ships, cranes, sunken dry docks, and dangerous booby traps. In order to continue the war effort and push back the Axis powers in Africa, the Allies enlisted a naval salvage expert known as Commander Ellsberg. Ellsberg, a veteran miracle worker in raising sunken ships, was given his toughest assignment yet: Reopen the port with no budget, no men, and no tools. The British had claimed the task was impossible—Massawa couldn't be cleared. But a determined Ellsberg navigated complicated American and British bureaucracies to build a ragtag group of international civilians and pull off a historic feat of engineering. This is his account of that crucial operation—the largest of its kind the world had ever seen—accomplished in the searing heat of Eritrea.

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in

Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Iwo Jima and the Bonin Islands in U.S.-Japan Relations Robert D. Eldridge, 2015-04-19 Like my two other books about security and territorial issues in the U.S.-Japan relationship, *The Origins of the Bilateral Okinawa Problem: Okinawa in U.S.-Japan Relations, 1945-1952*³ and *The Return of the Amami Islands: The Reversion Movement and U.S.-Japan Relations*,⁴ this is first and foremost a study on the intra-alliance dynamics in which one country, the United States, continued to occupy and administer islands that were recognized as Japanese territory but, for a number of reasons, the United States and its wartime allies felt necessary to continue to administer. The longer this control continued, the more unnecessary it was seen by increasingly larger segments of the public and government of both countries due to the political erosion of the relationship caused by this friction. The question for policy makers and political leaders was finding the balance between security concerns, reversion demands, and national sentiment (in both countries), particularly as it related to the memory and sacrifices at Iwo Jima, in an effort to maintain friendly and cooperative relations. Eventually, the U.S. government agreed to Japanese requests to return the islands and this was done on 26 June 1968, a full four years prior to the even more problematic, but strategically important, Okinawa.
