The Fieseler Fi 156 Storch Jan Forsgren,2021-02-19 The innovative Fi 156 was the progenitor of today's STOL aircraft. Operated in large by the German Luftwaffe, it also saw service with more than 20 other air arms. Post-war, the Fi 156 continued in production in Czechoslovakia and France. Many were used in French Indochina. Today, the Fi 156 is a highly valued vintage aircraft.

Fieseler Storch in Action Jerry L. Campbell,2005 Om design, udvikling, produktion og operationer med det tyske observationsfly Storch. Flyet blev prøvefløjet i juli 1937 og indgik i operativ tjeneste i Luftwaffe i 1938, idet der blev produceret 3 fly pr. uge.

Arming the Luftwaffe Daniel Uziel,2011-11-16 During World War II, aviation was among the largest industrial branches of the Third Reich. About 40 percent of total German war production, and two million people, were involved in the manufacture of aircraft and air force equipment. Based on German records, Allied intelligence reports, and eyewitness accounts, this study explores the military, political, scientific and social aspects of Germany's wartime aviation industry: production, research and development, Allied attacks, foreign workers and slave labor, and daily life and working conditions in the factories. Testimony from Holocaust survivors who worked in the factories provides a compelling new perspective on the history of the Third Reich.

Wahoo Richard O'Kane,2009-11-11 The career of the USS Wahoo in sinking Japanese ships in the farthest reaches of the Empire is legendary in submarine circles. Christened three months after Pearl Harbor, Wahoo was commanded by the astonishing Dudley W. “Mush” Morton, whose originality and daring new techniques led to results unprecedented in naval history; among them, successful “down the throat” barrage against an attacking Japanese destroyer, voracious surface-running gun attacks, and the sinking of a four-ship convoy in one day. Wahoo took the war to Japan’s front porch, and Morton became known as the Navy’s most aggressive and successful sea raider. Now, in a new quality paperback edition, her full story is told by the person most qualified to tell it—her executive officer Richard O’Kane, who went on to become the leading submarine captain of the Second World War. Praise for Wahoo “The accounts of the patrols are spine-tingling, both in triumph and tragedy. It is a tale of great courage, brilliant leadership, and daring innovation in a new type of submarine warfare fought largely on the surface in waters closely controlled by the enemy. Well-written, a gripping story for anybody with a love of the sea or adventure in submarine combat.”—Naval War College Review “This is an exceptional story of American men who rose to the occasion time and again under dangerous circumstance.” —Abilene Reporter News “A first-hand—and first-rate—narrative, told by the former executive officer of this legendary WWII submarine, which gives readers an intimate feel for life aboard the ‘boats’ that helped beat the odds in the battles of the Pacific and put Japan on the defensive.”—Sea Power “Like Clear the Bridge!, [Richard] O’Kane’s bestselling account of the Tang’s 33 confirmed sinkings, [Wahoo] is a rousing, authentic war adventure that could well become a classic of its type, crack[ling] with the tensions, boredom, and occasional exhilaration of submarine life under the Pacific, O’Kane is a superb storyteller, and his credentials are impeccable.”—Springfield Sunday Republic

Russia's War Richard Overy,1998-08-01 A penetrating and compassionate book on the most gigantic military struggle in world history.--The New York Times Book Review An extraordinary tale... Overy's engrossing book provides extensive details of teh slaughter, brutality, bitterness and destruction on the massive front from the White Sea to the flank of Asia.--Chicago Tribune The Russian war effort to defeat invading Axis powers, an effort that assembled the largest military force in recorded history and that cost the lives of more than 25 million Soviet soldiers and civilians, was the decisive factor for securing an Allied victory. Now with access to the wealth of film archives and interview material from Russia used to produce the ten-hour television documentary Russia's War, Richard Overy tackles the many persuasive questions surrounding this conflict. Was Stalin a military genius? Was the defense of Mother Russia a product of something greater than numbers of tanks and planes--of something deep within the Russian soul?

Luck Mark Twain,2016-01-06 Luck is a classic humorous short story written by Mark Twain and first published in 1891. It's about a hero who is really a fool, and why he owes it all to luck. Samuel Langhorne Clemens (November 30, 1835 - April 21, 1910), better known by his pen name Mark Twain, was an American author and humorist. He wrote The Adventures of Tom Sawyer (1876) and its sequel, Adventures of Huckleberry Finn (1885), the latter often called The Great American Novel. Twain grew up in Hannibal, Missouri, which provided the setting for Huckleberry Finn and Tom Sawyer. After an apprenticeship with a printer, he worked as a typesetter and contributed articles to the newspaper of his older brother, Orion Clemens. He later became a riverboat pilot on the Mississippi River before heading west to join Orion in Nevada. He referred humorously to his singular lack of success at mining, turning to journalism for the Virginia City Territorial Enterprise. In 1865, his humorous story, The Celebrated Jumping Frog of Calaveras County, was published, based on a story he heard at Angels Hotel in Angels Camp, California, where he had spent some time as a miner. The short story brought international attention, and was even translated into classic Greek. His wit and satire, in prose and in speech, earned praise from critics and peers, and he was a friend to presidents, artists, industrialists, and European royalty. Though Twain earned a great deal of money from his writings and lectures, he invested in ventures that lost a great deal of money, notably the Paige Compositor, a mechanical typesetter, which failed because of its complexity and imprecision. In the wake of these financial setbacks, he filed for protection from his creditors via bankruptcy, and with the help of Henry Huttleston Rogers eventually overcame his financial troubles. Twain chose to pay all his pre-bankruptcy creditors in full, though he had no legal responsibility to do so. Twain was born shortly after a visit by Halley's Comet, and he predicted that he would go out with it, too. He died the day after the comet returned. He was lauded as the greatest American humorist of his age, and William Faulkner called Twain the father of American literature. Twain began his career writing light, humorous verse, but evolved into a chronicler of the vanities, hypocrisies and murderous acts of mankind. At mid-career, with Huckleberry Finn, he combined rich humor, sturdy narrative and social criticism. Twain was a master at rendering colloquial speech and helped to create and popularize a distinctive American literature built on American themes and language. Many of Twain's works have been suppressed at times for various reasons. Adventures of Huckleberry Finn has been repeatedly restricted in American high schools, not least for its frequent use of the word nigger, which was in common usage in the pre-Civil War period in which the novel was set.

Operation Crossbow Allan Williams,2013-05-30 The story of the photographic intelligence work undertaken from a country house at Medmenham, Buckinghamshire, is one of the great lost stories of the Second World War . At its peak in 1944, almost 2,000 British and American men and women worked at the top-secret Danesfield House, interpreting photographs - the majority stereoscopic so they could be viewed in 3D - to unlock secrets of German military activity and weapons development. Millions of aerial photographs were taken by Allied pilots, flying unarmed modified Spitfires and Mosquitos on missions over Nazi Europe. it was said that an aircraft could land, the photographs be developed and initial interpretation completed within two hours - marking the culmination of years of experiments in aerial intelligence techniques. Their finest hour began in 1943, during the planning stages of the Allied invasion of Europe, when Douglas Kendall, who masterminded the interpretation work at Medmenham, led the hunt for Hitler's secret weapons. Operation Crossbow would grow from a handful of photographic interpreters to the creation of a hand-picked team, and came to involve interpreters from across the Medmenham spectrum, including the team of aircraft specialists led by the redoubtable Constance Babington Smith. In November that year, whilst analysing photographs of Peenemunde in northern Germany, they spotted a small stunted aircraft on a ramp. This intelligence breakthrough linked the Nazi research station with a growing network of sites in northern France, where ramps were being constructed aligned not only with London, but targets throughout southern Britain. Through the combined skill and dedication of the Crossbow team and the heroism of the Allied pilots, throughout late 1943 and 1944 V-weapon launch sites were located and through countermeasures destroyed, saving hundreds of thousands of lives, and changing the course of the war. Operation Crossbow is a wonderful story of human endeavour and derring-do, told for the first time.
