Curtiss P-40 Leszek A. Wieliczko, Krzysztof Janowicz, 2010-07-01 * Free extras for modelers, including decals and masking foil The Curtiss P-40 Warhawk was an American single-engine, single-seat, all-metal fighter and ground attack aircraft that first flew in 1938. It was used by the air forces of 28 nations, including those of most Allied powers during World War II, and remained in front line service until the end of the war. By November 1944, when production of the P-40 ceased, 13,738 had been built, all at Curtiss-Wright Corporation's main production facility at Buffalo, New York. The P-40 design was a modification of the previous Curtiss P-36; this reduced development time and enabled a rapid entry into production and operational service. The P-40's lack of a two-stage supercharger made it inferior to Luftwaffe fighters such as the Messerschmitt Bf 109 or the Focke-Wulf Fw 190 in high altitude combat and it was rarely used in operations in Northwest Europe. Between 1941 and 1944, however, the P-40 played a critical role with Allied air forces in three major theaters: North Africa, the Southwest Pacific and China. It also had a significant role in the Middle East, Southeast Asia, Eastern Europe, Alaska and Italy. About the series Monographs is a series focusing on an individual type of aircraft. Each monograph contains descriptions of the aircraft's origins, its variants and combat history. Each volume includes several hundred archive photographs, technical scale drawings and colour profile artworks, with free extras for modelers, including decals and masking foil.

Curtiss P-40 Carl Molesworth, 2013-11-20 An improved version of the Allison V-1710 engine gave rise to the Curtiss H-87, which began life in 1941 as the P-40D and featured a completely redesigned fuselage. The shorter and deeper nose of the new fighter gave it a decidedly snub-nosed appearance compared to the earlier P-40 models. Curtiss continued to tweak the H-87 for the next two years in the search for better performance, but the last major version, the P-40N, was only marginally faster than the first. In the process, Curtiss even tried an engine change to the Packard Merlin in the P-40F and L but to no avail. What the late model P-40s lacked in speed and service ceiling, they traded for maneuverability, durability and availability. Their niche became fighter-bomber operations, and they fought on fronts as varied as the arctic wastes of the Aleutian Islands and Iceland, the steaming jungles of the South Pacific and the barren deserts of North Africa. P-40s were a common sight in the skies over Burma and China, Sicily and Italy, and western Russia as well. By the time production ceased in 1944, Curtiss had produced nearly 14,000 P-40s.

Curtiss P-40 D/E Kittyhawk Mk I/Ia Leszek Wieliczko, Tom Zmuda, 2009-12-15 * Includes free decals and masking foil Highly detailed publication covering these two famous World War II fighter aircraft, built by the Americas in 1938 and used by 28 Allied nations in World War II. Warhawk was the name the United States Army Air Corps adopted for all models, making it the official name in the United States for all P-40s. The British Commonwealth and Soviet air forces used the name Kittyhawk for models equivalent to the P-40D and all later variants. Containing dozens of archive black and white and color photos, including 35 pages of close-up and walkaround shots, 4 pages of color artwork profiles, and 8 pages of line drawings, this is an ideal reference for both the enthusiast and modeler, with free masking foil included. About the Series Photosniper is a classic series of highly illustrated photo books on the best machines of war, creating, with numerous images, a close-up, walk-around view for each aircraft or vehicle. With emphasis on the key features of each machine, including their variations, artwork, markings, insignia and modifications, customizing and creating a model could not be easier. Includes a free decal sheet.

P-40 Curtiss Olivier Souleys, 2008-10-28 Planes and Model Kits" is dedicated to the Curtiss P-40. Despite its limits, the Warhawk is an aircraft which played a major part in the whole war and on all the front lines, displaying the most colorful insignia and "nose arts" of WW2. This book has no historical claim and makes us discover the B, E, F, N versions of this mythical fighter through the most beautiful models currently available. Each of the four versions are organized around one main technical part, which presents in a clear and dynamic way some of the well-tried knacks used by the most experienced modelers.

Curtiss P-40 Warhawk Tomasz Szlagor, 2015 Curtiss P-40, known to Americans as Warhawk, and

to their allies of the British Commonwealth as Tomahawk and Kittyhawk, fought on nearly all fronts of the Second World War, serving with the American, British, Australian, New Zealand, South African, Canadian, Free French, Chinese, Dutch and Soviet air forces. The American Warhawks were part of as many as nine US Army Air Forces stationed overseas: the 5th (Australia, New Guinea, Philippines); the 6th (Central America); the 7th (central Pacific); the 9th (Middle East, North Africa), the 10th (India, Burma), the 11th (Alaska, Aleutians), the 12th (North Africa, Italy); the 13th (the Solomons); and the 14th (China). During the first years of the war the P-40 helped the Allies stem the offensive of the Axis powers and fight them back at the last-ditch defensive positions, like Kunming in China, Port Moresby on New Guinea, Darwin in Australia or El Alamein in Egypt. Never a high-performance fighter, it nonetheless proved a potent weapon in capable hands. Often turned into a fighter-bomber in later years, it soldiered on until phased out in favor of more advanced designs.

The Curtiss P-40 from 1939 to 1945 Anis El Bied, Daniel Laurelut, 2002 200 color images showing the aircraft markings and all the variants of this classic American World War II fighter. Also includes detail of personalized markings and nose art

Curtiss P-40 Carl Molesworth, 2013-05-20 The initial version of the Curtiss P-40, designated by the manufacturer as the Hawk H-81, combined the established airframe of the earlier radial-powered H-75 (P-36) fighter with the Allison V-1710 liquid-cooled engine. The year was 1939, and the marriage was one of expediency. With the threat of war in Europe growing by the day, the US Army Air Corps brass wanted a modern fighter that would combine the sterling handling qualities of the P-36 with a boost in performance that would make it competitive with the new types emerging in Germany and England, and the generals wanted the new plane immediately. The P-40 delivered admirably, and though it never reached the performance levels of the Bf 109 or Spitfire, the sturdy fighter nevertheless made a place in history for itself as the Army's frontline fighter when the US entered World War II. Long-nosed P-40s initially saw combat in North Africa, flying in Royal Air Force squadrons. They also fought in the skies over Pearl Harbor and the Philippines. But the long-nosed P-40 is best known as the shark-faced fighter flown by the American Volunteer Group - the legendary Flying Tigers - over Burma and China during 1941-42.

P-40 Warhawk vs Ki-43 Oscar Carl Molesworth, 2012-11-20 Known for the distinctive 'sharkmouth' decoration on their noses, P-40 fighters first saw combat in China during World War II. Their most common adversary was the Japanese Nakajima Ki-43, nicknamed 'Oscar.' Carl Molesworth describes and explains the design and development of these two foes, the products of two vastly different philosophies of fighter design. The P-40 was heavily armed and sturdy with armour protection and self-sealing fuel tanks, but paid for this with the loss of speed and a sluggish performance at altitude. The Ki-43 was a rapier to the battleaxe P-40 and the Ki-43 was immensely nimble, though with less firepower and durability. This book examines these two different fighters, and the pilots who flew them over China, with an action-packed text, rare photographs and digital artwork.

The Curtiss Kittyhawk Mk. II Phil H. Listemann, 2017-01-31 The Curtiss P-40 was the most numerous USAAF fighter on hand when the United States entered the war in December 1941. A development of the Curtiss P-36, the P-40 was essentially a P-36 equipped with an Allison inline V12 V-1710. The French were the first to express an interest in this model, known as the H-81, having already ordered the Curtiss H-75, the export version of the P-36. The Curtiss H-81 would later be purchased by the USAAC and the RAF as the Tomahawk. Curtiss continued to improve the breed and a new production model, the H-87, was soon available with a new version of the V-1710 that had a spur-gear reduction mechanism, raising the engine thrust-line. This caused the nose profile to be redesigned, hence the new Curtiss designation. The RAF became interested in purchasing this version as the Kittyhawk for its squadrons fighting in the Western Desert and to replace the Tomahawk already in service. In all four Marks would be used by the RAF, the Mk II corresponding to the P-40F/L and would see service in only two squadrons, the Australian 3 Squadron and the British 260 Squadron and saw action for the first time shortly before the Battle of El Alamein. The

full story of the Kittyhawk Mk II is here told in 38 pages illustrated with 40 photos and 5 colour profiles.

Modelling the P-40 Brett Green, 2012-04-20 The P-40 was a dependable warhorse that provided valuable service throughout World War II. The earliest operational variants were used to great effect by the famous 'Flying Tigers' in China, and the P-40 went on to serve in almost every theatre of the war. Modellers are well served with P-40 variants from major manufacturers and after-market companies, and this book helps make the most of the products available. The projects featured in clear step-by-step detail include a 1/32 'Flying Tiger' P-40B, an RAAF Kittyhawk Mk.IV in 1/48, a TP-40N two-seat trainer in 1/48 and an RAF Desert Kittyhawk in 1/72 scale. Superb colour reference photographs and detailed lists of kits and accessories available round off this authoritative treatment.

P-40 Warhawk in Action Richard Dann, 2016 Expanded edition with more photos, updated content, and 20 more pages. The Curtiss P-40 Warhawk, a US single-engine single-seat all-metal fighter and ground-attack aircraft, first took to the air in 1939. In service throughout WWII and used by most Allied powers, the P-40 was the third most-produced US pursuit plane. A total of 13,738 of the aircraft were produced by the time output ceased in November 1944. The P-40 first saw combat with British Commonwealth forces in June 1941, even before the US entered the conflict. It was in the Pacific, however, that the aircraft became an icon. Decorated with menacing shark mouths, P-40s served as workhorse fighters of the American Volunteer Group better known as the Flying Tigers who came to China in late 1941, following the withdrawal of the Soviet Volunteer Group earlier that year, as the USSR struggled to maintain a precarious neutrality with Japan and avoid a two-front war. Meanwhile, the P-40 was the first Allied fighter supplied to the Soviet Union under Lend-Lease for use against the Germans. After Pearl Harbor, the US Army Air Force flew the P-40 extensively in the Mediterranean Theater and during Operation Torch and the subsequent advance northward into Europe. This volume traces the development of the various modifications of the P-40 throughout the war years and includes contemporary photos of surviving P-40s going through their paces at airshows today.
