The Imperial Japanese Navy in the Pacific War

Mark Stille, 2014-11-20 An highly illustrated examination of the key ships, tactics and operations of the Imperial Japanese Navy in the War in the Pacific in World War II. The Imperial Japanese Navy (IJN) was the third most powerful navy in the world at the start of World War II, and came to dominate the Pacific in the early months of the war. This was a remarkable turnaround for a navy that only began to modernize in 1868, although defeats inflicted on the Russians and Chinese in successive wars at the turn of the century gave a sense of the threat the IJN was to pose. Bringing together for the first time material previously published in Osprey series books, and with the addition of new writing making use of the most recent research, this book details the Japanese ships which fought in the Pacific and examines the principles on which they were designed, how they were armed, when and where they were deployed and how effective they were in battle. The Imperial Japanese Navy in the Pacific War provides a history of the IJN's deployment and engagements, analysis of the evolution of strategy and tactics, and finally addresses the question of whether it truly was a modern navy, fully prepared for the rigors of combat in the Pacific. Illustrated throughout with photographs and detailed colour artworks, this is a valuable reference source for Pacific War enthusiasts and historians alike.

B-17, Fortress at War Roger A. Freeman, 1977

Danger's Hour Maxwell Taylor Kennedy, 2009-11-03

Drawing on years of research and firsthand interviews with both American and Japanese survivors, Maxwell Taylor Kennedy draws a gripping portrait of men bravely serving their countries in war and the advent of a terrifying new weapon, suicide bombing, that nearly halted the most

powerful nation in the world. In the closing months of World War II, Americans found themselves facing a new weapon: kamikazes--the first men to use airplanes as suicide weapons. By the beginning of 1945, facing imminent invasion, Japan turned to its most idealistic young men and demanded of them the greatest sacrifice. On May 11, 1945, days after Germany's surrender, the USS Bunker Hill--with thousands of crewmen and the most sophisticated naval technology available--was 70 miles off the coast of Okinawa when pilot Kiyoshi Ogawa flew his plane into the ship, killing 393 Americans in the worst suicide attack against America until September 11.--From publisher description.

Fighter Combat Robert L. Shaw, 1985 This book provides a detailed discussion of one-on-one dog-fights and multi-fighter team work tactics. Full discussions of fighter aircraft and weapons systems performance are provided along with an explanation of radar intercept tactics and an analysis of the elements involved in the performance of fighter missions.

May 1940 ,2010-04-27 Drawing on new research, this book provides the first comprehensive English-language account of the German assault on the Netherlands in May 1940. It presents fresh and incisive analyses of German and Dutch actions at tactical, operational and strategic levels.

The First Team John Lundstrom, 2013-04-11 Hailed as one of the finest examples of aviation research, this comprehensive 1984 study presents a detailed and scrupulously accurate operational history of carrier-based air warfare. From the earliest operations in the Pacific through the decisive Battle of Midway, it offers a narrative account of how ace fighter pilots like Jimmy Thach and Butch O'Hare and their skilled VF squadron mates - called

the first team - amassed a remarkable combat record in the face of desperate odds. Tapping both American and Japanese sources, historian John B. Lundstrom reconstructs every significant action and places these extraordinary fighters within the context of overall carrier operations. He writes from the viewpoint of the pilots themselves, after interviewing some fifty airmen from each side, to give readers intimate details of some of the most exciting aerial engagements of the war. At the same time he assesses the role the fighter squadrons played in key actions and shows how innovations in fighter tactics and gunnery techniques were a primary reason for the reversal of American fortunes. After more than twenty years in print, the book remains the definitive account and is being published in paperback for the first time to reach an even larger audience.

Kamikaze Attacks of World War II Robin L. Rielly, 2010 This book details more than 400 kamikaze attacks performed by Japanese aircraft, manned torpedoes, suicide boats and suicide swimmers against U.S. ships during World War II. Part One focuses on the traditions, development and history. Part Two details the kamikaze attacks on ships. Appendices list all of the U.S. ships suffering kamikaze attacks--Provided by publisher.

Fork-Tailed Devil: The P-38 Martin Caidin, 2016-10-05 One of America's greatest military aviation historians relates the astonishing--and true--story of the only American warplane to fight in every operational theater in World War II from Pearl Harbor to Alaska and North Africa to Northern Europe.

The Petlyakov Pe-2 Peter C Smith, 2020-03-30 During the Second World War, the Soviet Union's Petlyakov Pe-2 _Peshka_ dive-bomber was unique in that it was as fast as most fighter aircraft. This was in a period when it was

considered by the RAF that it was impossible for monoplane aircraft to conduct vertical bombing with any degree of success. During the war the Pe-2 was the principal dive- and light-bomber of Russia's air power across the vast Eastern Front and it continued in service until the early 1950s with the air forces of the Warsaw Pact countries and Yugoslavia. Conceived by a team of top aircraft designers whom Stalin had incarcerated in a prison camp on trumped-up political charges, the Pe-2 had originally been designed as a high-altitude twin-engine fighter plane, but, due to the outstanding success of the German Stukas in the Blitzkrieg, its role was quickly changed to that of a fast dive-bomber. The Pe-2 arrived in service around the time of the German attack on its hitherto ally. Although only a handful had reached front line units by the start of Operation Barbarossa in June 1941, the Pe-2 soon became the main dive-bomber in both the Soviet VVS and Naval service. Mass production, by factories hastily moved back beyond the front, meant that numbers increased rapidly, and more than 11,000 of the type, including many variants, were built up to 1945. The Peshka became the mainstay of the Soviet counteroffensive that ultimately resulted in the fall of Berlin. Pe-2s also led the way in the brief but annihilating Manchurian campaign against Japan in the closing days of the war in 1945. Using official sources, including the official Pe-2 handbook, and numerous color and black-and-white photographs made available to the author from both official and private sources and collections, this book is the definitive record of the Pe-2 - the dive-bomber supreme!

Hirohito's War Francis Pike, 2016-09-08 Named one of Foreign Affairs' Best Books of 2016 In his magisterial 1,208 page narrative of the Pacific War, Francis Pike's Hirohito's War offers an original interpretation, balancing the

existing Western-centric view with attention to the Japanese perspective on the conflict. As well as giving a 'blow-by-blow' account of campaigns and battles, Francis Pike offers many challenges to the standard interpretations with regards to the causes of the war; Emperor Hirohito's war guilt; the inevitability of US Victory; the abilities of General MacArthur and Admiral Yamamoto; the role of China, Great Britain and Australia; military and naval technology; and the need for the fire-bombing of Japan and the eventual use of the atom bomb on Hiroshima and Nagasaki. Hirohito's War is accompanied by additional online resources, including more details on logistics, economics, POWs, submarines and kamikaze, as well as a 1930-1945 timeline and over 200 maps.

Zero Fighter Martin Caidin, 1970 The agile, brilliant fighter planes and their masterly pilots blasted all oppositions from the air. The '... weren't just good--they were hell on wheels'. For a fatally long time the horrifying reports came in and were disbelieved. For that space zero fighter ruled the Pacific sky.

The US Navy in World War II Mark Henry, 2012-08-20 In 1941 the US Navy had 17 battleships of which eight would be knocked out on the first day of the war four aircraft carriers, and about 340,000 men including reservists. Pearl Harbor so weakened it that it was unable to prevent the Japanese capture of the Philippines and a vast sweep of Pacific islands. By 1945 it was the strongest navy the world had ever seen, with nearly 100 carriers, 41,000 aircraft and 3.3 million men; the unrivalled master of air-sea and amphibious operations, it was poised to invade Japan's home islands after reducing her fleet to scrap and her Pacific empire to impotence and starvation. This extraordinary story is illustrated here with dramatic photos, and nine meticulous colour plates

showing a wide range of USN uniforms.

The Japanese Aircraft Industry ,2020-06-23 This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published. Hence any marks or annotations seen are left intentionally to preserve its true nature.

The Ardennes J. Mark Connell,2003 In December 1944, desperate to hold out for the new weaponry he expected and shocked by losing the port of Antwerp, Adolf Hitler embarked on an audacious counter-offensive that was intended to drive back the all-conquering Allied forces that had caused Germany to retreat from Normandy to its own borders. It was a foolhardy exercise but it had surprise on its side and for some days the fate of the war in Europe

was in the hands of the commanders and men of a few American divisions and some supporting British forces. The Germans got within a few miles of their first objective - the River Meuse - but, by then, their own shortcomings had been found out and the Allies had regrouped. This avidly studied battle is given a fresh and all-embracing approach in this 55000 word account of the fluctuating fortunes of the combatants and the role in the action of the leading generals, including Eisenhower, Patton, Montgomery, Model, Dietrich and von Rundstedt. Though Germany was destined for defeat, its industry produced remarkable amounts of weaponry for this offensive and an assortment of troops, many too young or too old, were assembled for Hitler's astonishing but ultimately futile final battlefield venture. The Battle of the Bulge is an example of a short action where almost every military tactic was deployed and is charted on a daily basis here.

366 Days of World War II Richard Binder,2015-02-21 World War II lasted six years. That's 2,194 days. What happened in those six years? In this new diary, author Richard Binder takes a radical new approach to telling the story of the worst conflict humanity has ever experienced. Instead of trying to cover everything, he relates the happenings of just 366 days, the length of a single year. Choosing events great and small from the beginning of the war to its bitter end, he gives you a fascinating and

sometimes shocking look at things you know from your high-school history and things you may never have heard of.
