Macchi C. 202 Folgore Davide F. Jabes,Alessandro Romanello,Niccolò Tognarini,2022-02-03 The Macchi C.202 was probably the most successful Italian fighter in WW2, the aircraft of almost all Italian top scoring aces. Mc.202 was fast and manoeuvrable, on par with, or better than the allied fighters of the same period. However, there were too few machines to exert a determinant role during the war due to inadequate planning and resources.

Macchi C.202 Folgore Davide F. Jabes,Alessandro Romanello,Niccolò Tognarini,2021-12-02 The Macchi C.202 was probably the most successful Italian fighter during the Second World War. It is generally agreed that the performance of the Macchi was superior to both the Hawker Hurricane and the Curtiss P-40 Kittyhawk and on a par with the Supermarine Spitfire Mk. V. It is not by chance that virtually all the Italian top scoring aces flew this plane either with the Regia Aeronautica or the Aeronautica Nazionale Repubblicana. At the same time, the Mc.202 is the symbol of the dysfunctions in the Italian military-industrial complex: the lack of sound industrial planning resulting in orders from the Regia Aeronautica for an exaggerated number of different aircraft; the lack of the development of adequate engines limiting aircraft performance and reducing capacity to house weapons with a proper punch; the corruption of politics and the culpable connivance of the high military spheres. The Mc.202 was therefore produced in limited numbers, while there is consensus that air war, especially in the African theatre, would have been different had the aircraft been adopted before.

Macchi C. 202 Folgore 3rd Edition Przemyslaw Skulski,2020-11-15 Third edition, revised

and extended. The development of the most famous Italian WWII fighter is described and illustrated. Combining the agility and excellent flying characteristics of the earlier MC.200 with a powerful German aero-engine, the Folgore was the best Italian fighter in large-scale service. It served with the Regia Aeronautica and other forces, including the Croatian air arm. This book describes the design, development and operations of this elegant and effective fighter. This expanded 3rd edition contains: scale plans, photos and drawings from Technical Manuals, superb colour illustrations of camouflage and markings, and rare b&w archive photographs. Colour photos of the preserved aircraft illustrate all aspects of the airframe. Essential reading for aviation enthusiasts & scale aeromodellers.

Macchi C.202/C.205V Units in Combat Marco Mattioli, 2022-05-26 A study of the Macchi Folgore and Veltro, the most successful Italian fighters in World War II. With specially commissioned profiles, the book examines how these fighters were conceived, their performance and the fascinating stories of their pilots. Italian fighters, such as the Fiat G.50 and Macchi C.200, had always struggled with their straight-line speed and restricted armament when engaging their Allied counterparts. To solve these problems, Macchi initially designed the C.202 Folgore using German engines, which contributed to create a faster aircraft, with a superior rate of climb and reachable altitude. Folgore's success in various North African engagements then paved the way for the development of Macchi's most successful fighter, the C.205V Veltro, which managed to combine increased speed and increased power. Packed with specially commissioned artwork and original photos, and written by Italian military aviation specialist Marco Mattioli, this fascinating book explores how the premier Italian fighter of the war came to life and the historical circumstances that

prevented it from becoming one of the most dreaded aircraft in the Mediterranean.

Macchi MC.202 Folgore Przemyslaw Skulski, 2012-12-24 second edition, revised and extended. The development of the most famous Italian WWII fighter is described and illustrated. Combining the agility and excellent flying characteristics of the earlier MC.200 with a powerful German aero-engine, the Folgore was the best Italian fighter in large-scale service. It served with the Regia Aeronautica and other forces, including the Croatian air arm. This book describes the design, development and operations of this elegant and effective fighter. This expanded 2nd edition contains: scale plans, photos and drawings from Technical Manuals, superb color illustrations of camouflage and markings, and rare b/w archive photographs. Color photos of the preserved aircraft illustrate all aspects of the airframe. Essential reading for aviation enthusiasts & scale aeromodelers.

Macchi C.202 in Action Roberto Gentili, Luigi Gorena, 1980

Italian Fighters 1939-45 Volume One Macchi Luigino Caliaro, 2024-03-31 In this thoroughly researched, detailed and exhaustive study, aviation historian Luigino Caliaro tells the story of the three main fighters to serve in World War II produced by the Varese-based Aeronautica Macchi. The C.200 Saetta (Lightning) was conceived in 1935 by Ing. Mario Castoldi as a short-range interceptor powered by a Fiat A.74 R.C.38 14-cylinder radial engine and armed with twin 12.7 mm machine guns. By war's end some 1,150 examples had been built. The C.202 Folgore (Thunderbolt) incorporated the German Daimler-Benz 601A in-line engine licensed-built by Alfa Romeo. Finally, the C.205 Veltro (Greyhound) was powered by the more powerful Daimler-Benz DB 605. The internationally renowned British test pilot, Captain Eric Brown, told the author that the C.205 was 'was a superb fighter, with

a beautiful line and good armament... In my opinion its flying performance was totally comparable with the Spitfire.' Drawing on company and military archive reports, the author traces the origins of Aeronautica Macchi before examining the design and development of each type, as well as, in each case, production, prototypes and technical aspects. Also covered in this profusely illustrated volume are details of the operational variants and project designs, along with a detailed narrative covering the history of each aircraft in service with the Regia Aeronautica, the Aviazione Nazionale Repubblicana, the Luftwaffe and Croatian Air Legion. Additionally, post-war service with the Aeronautica Militare and the Royal Egyptian Air Force is explored, as well as camouflage, markings, heraldry and insignia. With hundreds of photographs, drawings and colour artwork, this book forms the most comprehensive and informative account of this trio of aircraft in the English language.

Macchi C.200 Saetta Jose Fernandez, 2012-10-01 The Macchi C.200 Saetta (also variously identified as the MC.200) was a WWII fighter aircraft built by Aeronautica Macchi in Italy, and used in various forms throughout the Regia Aeronautica (Italian Air Force). The C.200 had excellent maneuverability and the general flying characteristics left little to be desired. The design, development and operations of these aircraft is told in detail, illustrated with many previously unpublished photos. Color schemes and markings are described and illustrated. Scale plans in 1/72nd and 1/48th. The author is a renowned aviation historian, with many books in both French and English to his name.
