Savoia-Marchetti S.79 Sparviero Bomber Units Marco Mattioli,2018-02-22 Initially developed by Savoia-Marchetti as a transport, the aircraft had evolved into a dedicated medium bomber by the time the S.79-I made its combat debut in the Spanish Civil War in 1936. During World War 2, it became Italy's most successful bomber, and the most produced, with around 1370 built between 1936 and early 1944. Although initially hampered by poor tactics, the S.79 bomber crews nonetheless scored sunk a number of Allied vessels, and provided a constant threat to Allied sailors in the Mediterranean in the early stages of the war. In East Africa and the Red Sea the Sparvieri were the most modern bombers in-theatre, proving a challenge to RAF and SAAF biplane fighters. Using specially commissioned full-colour artwork, first-hand accounts and historic photographs, this volume chronicles the history of the S.79's war in the Mediterranean, North African, Balkan, and East African theatres.

Savoia-Marchetti S.79 Sparviero Torpedo-Bomber Units Marco Mattioli,2014-10-20 Italy's most successful wartime bomber, the S.79 saw combat with the Regia Aeronautica in France, Yugoslavia,

Greece, North Africa, East Africa and in the Mediterranean. Initially developed as a transport, the aircraft evolved into a dedicated medium bomber during the Spanish Civil War in 1936. The manufacturer then produced the S.79-II torpedo-bomber which entered service in 1939 – which primarily saw service against the Royal Navy in the Mediterranean. Illustrated with 30 full colour profiles of the main units that saw action with either the Regia Aeronautica or the ANR, this title is the first of two volumes to cover the development history and wartime performance of the S.79.

The Vought F4U Corsair Martin W. Bowman, 2019-12-27 This fully illustrated history of the iconic American fighter plane examines its development and combat experience through WWII and beyond. First flown in 1940, the Vought F4U Corsair was the fastest fighter in the world and the fastest US aircraft of any description. Powered by a huge 18-cylinder Pratt and Whitney Double Wasp engine, the first Corsairs were capable of speeds up to 417 miles per hour. This figure would rise to nearly 450mph in later versions. The F4U entered service with the US Navy in September 1942 and over time was extensively used by the US Marines, Royal Navy and Royal New Zealand Air Force. Famous

squadrons that flew these planes—like VMF-214 'The Black Sheep' and VF-17 'Jolly Rogers'—maintained their superiority over the Japanese for the rest of the war. After the Second World War the Corsair was used with distinction by the French in Indo-China and again by the US Navy in Korea. Since then, Corsairs have remained a favorite among warbird enthusiasts the world over. This comprehensive book examines the engineering of the Corsairs alongside a detailed history of their development and usage in combat. Illustrated with scores of rare and previously unpublished photographs, Vought F4U Corsair is the perfect book for any fan of the 'bent wing bird'.
