Focke-Wulf FW 190 D Stefan Damiński,2010-01-01 Includes free decals and masking foil Complete with detailed technical drawings The Focke-Wulf Fw 190 Wurger was a German single-seat, single-engine fighter aircraft designed by Kurt Tank in the late 1930s. It was used by the Luftwaffe during the Second World War. The early Fw 190As performance decreased at high altitudes which complicated its use as a high altitude interceptor. These complications were rectified in the Focke-Wulf Fw 190D variant in the autumn of 1944. This book provides detailed technical drawings for one of Germany's most valuable workhorses. About the Series This series of highly illustrated books presents detailed scale drawings of aircraft and vehicles, with supporting color profile artwork. With detailed captions on the history, combat action and development of each machine, each volume is an exceptional reference tool for modelers, with extras such as free decals, masking foil and photo-etched brass.

Focke-Wulf Fw 190A Dietmar Harmann,Ulrich Leverenz,Eberhard Weber,2003-10-30 This book deals with the development history and testing of this fighter aircraft and production of the early variants of the Fw 190 A. An interesting comparison between the Bf 109 and the Fw 190 shows the strengths and weaknesses of the two aircraft, and authentic reports by former test pilots of Focke-Wulf and the Rechlin Test Station document the aircraft's performance. Also covered are the later torpedo-carrier and reconnaissance versions of the Fw 190. Together with the Messerschmitt Bf 109, the Focke-Wulf Fw 190 formed the standard equipment of the German fighter arm in the Second World War and today is considered one of the most capable fighters of that period. Initial flight trials in 1939 revealed a number of shortcomings, nevertheless the basic concept of the Fw 190 proved extremely successful. In contrast to the Bf 109, which was powered by a liquid-cooled, inverted-vee engine, in developing the Fw 190 Prof. Kurt Tank selected the BMW 801, an air-cooled radial engine that was less sensitive to battle damage. The broad-track undercarriage also gave the Focke-Wulf fighter much superior takeoff and landing characteristics. The Fw 190 entered quantity production by Focke-Wulf and license manufacturers Fieseler, AGO and Arado in 1941. It proved an immediate success in combat operations in 1942, proving itself superior to the Spitfire in some respects. Lavishly illustrated with photographs and drawings, many of which have not been published before, this book provides both aircraft enthusiasts and modelers with a wealth of information, and fills a gap in the history of aircraft design in Germany.

Modelling the Focke-Wulf Fw 190 A, F and G Geoff Coughlin,2012-04-20 The Focke-Wulf Fw 190 is regarded as one of the best fighters of World War II. Designed by Kurt Tank, it first saw

combat in the summer of 1941 and went on to be produced in several variants. It remains a hugely popular subject for aviation scale-modellers. This book, the first of two to cover the Fw190, provides a detailed, step-by-step guide to modelling the Fw 190's A, F and G variants in 1/72, 1/48, and 1/32 scale. Key aspects such as creating mottled camouflage patterns, undercarriage and cockpit detailing, final weathering and finishing, and diorama bases to display your models are covered.

Focke Wulf 190 Morten Jessen,2000 From the spring of 1942 until the end of the war, Germany was pounded by night and by day by Allied aircraft. A key element of the German defenses was the Fw 190, a rugged, well armed and reliable machine. This book details the Fw 190 and its variants in the crucial years of 1943/45, and presents rare photos of the planes, their crews, and their combat missions.

Focke-Wulf Fw190 J. Richard Smith,Eddie J. Creek,2015-01-26 This is the third of a comprehensive three-volume reference book on the iconic Focke Wulf FW190—arguably the finest piston-engined fighter aircraft of World War 2. These books are the product of years of study by two of the leading researchers into this complex aircraft to try to produce the most complete work on the FW190. Each volume contains more than 400 photographs, including those showing factory and construction, close-ups of weapons and equipment, operational units, as well as numerous facsimiles of Focke-Wulf handbook drawings. Color artwork will also be included, plus an extensive selection of original manufacturer's technical drawings.

Focke-Wulf Fw 190 "long Nose" Dietmar Harmann,2003 This book covers the complete development history of those variants of the Focke-Wulf Fw 190 powered by inline engines. The first Fw 190 equipped with a Daimler Benz liquid-cooled engine took to the air in early 1942, followed six months later by another powered by a Jumo 213. Production of the Fw 190 C, Fw 190 D and Ta 153 was delayed by the German air ministry. Not until 1944, by which time Germany had lost control of the air, did the Fw 190 D-9, an interim fighter powered by the Jumo 213 A, enter production. The Fw 190 D-9 proved an immediate success, largely due to an excellent prototype test program under Dipl.Ing. Hans Sander. The type quickly entered service with the Luftwaffe and more than 1,700 examples were completed by the end of the war. The Fw 190 D-9 gave rise to a number of improved variants with the more powerful Jumo 213 F engine and a heavier armament, however only a handful of the D-11 and D-13 versions were completed. With a maximum speed of 750 km/h, the Fw 190 D-12 powered by the new Jumo 213 EB would have represented the apex of Fw 190 development. The proposed Fw 190 D-14 and D-15, both powered by improved versions of the dive-bombers 603, came too late to see service with the Luftwaffe.

Focke-Wulf Fw 190 Aces of the Western Front John Weal,2012-10-20 The Fw 190 was the scourge of Fighter Command from the moment it appeared on the Western Front at Abbeville in August 1941 with II./JG 26. A nimble, speedy and well-armed adversary, the 'Butcher Bird' quickly proved superior to all Allied fighters of the time, particularly at medium to low altitude. Led by Experten of the calibre of 'Pips' Priller, Heinz Bar and Walter Oesau, the handful of Fw 190-equipped Jagdgeschwader flew against overwhelming odds, firstly on the Channel coast, and then in direct defence of the Reich when the Jagdflieger took on the might of the USAAF's Eighth and Ninth Air Forces. This is their story.

The Focke-Wulf FW 190 Heinz J. Nowarra,1997-01-06 Along with the Bf 109, the Fw 190 was a stalwart of the Luftwaffe and one of the top fighters of WWII.

Focke-Wulf Fw 190 Chris Goss,2019 The Focke-Wulf Fw 190 was widely regarded as the Luftwaffe's finest fighter. It first saw service in France in August 1941, immediately proving itself at least the equal of the then latest Spitfire variant, the Mk.V. There were a number of characteristics which contributed to the Fw 190's success. The first of these was that it had been designed from the outset to be a weapons platform, rather than an aircraft to which weapons were added, as was the case with previous fighters. This meant that it could carry a wide range of armament in the form of various combinations of bomb racks, cannon pods and, later, unguided rockets. It was also built to withstand heavy punishment, with the extensive use of electrically powered equipment instead of the hydraulic systems which, used by most aircraft manufacturers of the time, were more susceptible to failure if damaged by gunfire. The relatively small diameters of electrical wires were much less likely to be hit by gunfire than larger hydraulic pipes. Another element in the Fw 190's construction which added to its durability was its wide-tracked, inwards-retracting landing gear, as opposed to the much narrower, outwards-retracting landing gear of the Messerschmitt Bf 109. This gave the Fw 190 much greater stability on the ground which resulted in far fewer ground accidents than experienced by the Bf 109. The Fw 190's BMW 801 D-2 radial engine also produced 1,677 horse power, giving the early Focke-Wulf 190 A-8 a top speed of more than 400 miles per hour - which was considerably faster than the early variant Spitfires. It was the Spitfires with which the Fw 190 pilots frequently had to contend when in combat over the English Channel,

and particularly during the Allied raid on Dieppe in August 1942, when more than 100 Focke-Wulfs (from Jagdgeschwaders JG 2 and JG 26) engaged Spitfires and Hawker Typhoons, claiming sixty-one Allied aircraft 'kills' against just twenty-five losses of their own. The Fw 190's weapons capability also saw it used as a fighter-bomber. The Fw 190 A-3/U3 Jabo was used with considerable effect against Allied shipping in the Channel and against the southeastern coasts of England in 1942 in tip-and-runs raids. These fast, low-level attacks proved very difficult for the defending RAF squadrons to counter and only one Fw 190 was lost on these operations. In this illuminating study of the early service of the Fw 190, Chris Goss has assembled a unique collection of photographs illustrating the wide use of this highly versatile aircraft.
