At Close Quarters; PT Boats In The United States Navy [Illustrated Edition] Captain Robert J. Bulkley Jr.,2015-11-06 Includes over 110 illustrations charting the history of the US Navy PT Boats. "The destiny of our country has been inextricably interwoven with the sea. This was never more true than in the giant World War II that involved all seas and most of mankind. To fight the sea war we needed many types of ships, large and small, from aircraft carriers and battleships to PT boats. "Small though they were, the PT boats played a key role. Like most naval ships, they could carry out numerous tasks with dispatch and versatility. In narrow waters or in-fighting close to land they could deliver a powerful punch with torpedo or gun. On occasion they could lay mines or drop depth charges. They could speed through reefs and shark infested waters to rescue downed pilots or secretly close the shore to make contacts with coast watchers and guerrilla forces. PT boats were an embodiment of John Paul Jones' words: "I wish to have no connection with any ship that does not sail fast for I intend to go in harm's way." "Naval strength must function from shore to shore and on inland waters where the mobility and flexibility provided by ships can be employed to support land operations. PT boats filled an important need in World War II in shallow waters, complementing the achievements of greater ships in greater seas. This need for small, fast, versatile, strongly armed vessels does not wane. In fact it may increase in these troubled times when operations requiring just these capabilities are the most likely of those which may confront us. "The thorough and competent account herein of over-all PT boat operations in World War II, compiled by Captain Robert Bulkley, a distinguished PT boat commander, should therefore prove of wide interest. The widest use of the sea, integrated fully into our national strength, is as important to America in the age of nuclear power and space travel as in those stirring days of the birth of the Republic."—President John F Kennedy.

US Patrol Torpedo Boats Gordon L. Rottman,2011-03-15 Motor torpedo boat development began in the early 1900s, and the vessels first saw service during World War I. However, it was not until the late 1930s that the US Navy commenced the development of the Patrol Torpedo or PT boat. The PT boat was designed for attacking larger warships with torpedoes using its 'stealth' ability, high-speed and small size to launch and survive these attacks – although they were employed in a wide variety of other missions, including rescuing General MacArthur and his entourage from the Philippines. This book examines the design and development of these unique craft, very few of which survive today, and goes on to examine their role and combat deployment in World War II.

Elco Pts in Action Electric Boat Company,2010-08 Built by the Electric Boat Company, the Motor Torpedo Boat or 'PT' was a potent, versatile and highly effective weapon. Small in size, lightly armed and relatively cheap when compared to other combat vessels, the patrol boats sunk or damaged several Japanese warships including a battleship, several cruisers, two submarines and over 15 destroyers. They also shot down enemy planes, savaged enemy shipping and transport, and conducted commando-style raids on enemy facilities. Created during the war by Elco, this softcover book traces the development of these nimble craft, and showcases their achievements in combat. Additional chapters include a review of crew training, a profile of Electric Boat and its founders, and more. Richly illustrated with numerous photos and artwork. This brand new, softbound reprint represents the first time since WWII that this rare book has been available.

Pt Boats Source Wikipedia,2013-09 Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Pages: 29. Chapters: Douglas MacArthur's escape from the Philippines, List of PT boat bases, Motor Torpedo Boat PT-109, Motor Torpedo Boat PT-121, Motor Torpedo Boat PT-337, Motor Torpedo Boat PT-34, Motor Torpedo Boat PT-346, Motor Torpedo Boat PT-41, Motor Torpedo Boat PT-59, Motor Torpedo Boat PT-658, Motor Torpedo Boat PT 105, PT 617, PT 796. Excerpt: PT boats were a variety of torpedo-armed fast attack craft used by the United States Navy in World War II to attack larger surface ships. PT is the US hull classification symbol for Patrol Torpedo. The PT boat squadrons were nicknamed the mosquito fleet. The Japanese called them Devil Boats. The original pre-World War I torpedo boats were designed with displacement hulls. They displaced up to 300 tons and the top speed was 25 to 27 kn (29 to 31 mph; 46 to 50 km/h). The PT boats used in World War II were built using the planing-type hull form developed for racing boats. They were much smaller (30-75 tons) and faster (35-40 knots). Both types were designed to strike at larger warships with torpedoes, using relatively high speed to get close, and small size to avoid being spotted and hit by gunfire. They were much less expensive than large warships. PT boats were much faster, smaller, and cheaper than conventional (displacement hull) vessels. During World War II, American PT boats engaged enemy destroyers and numerous other surface craft, ranging from small boats to large supply ships. PT boats also operated as gunboats against enemy small craft, such as armored barges used by the Japanese forces for inter-island transport. In the late 1930s, the U.S. Navy requested competitive bids for several different concepts of torpedo boats. This competition led to eight prototype boats built to compete in two different classes. The first class was for 55-foot (17 m) boats, and the...

At Close Quarters: PT Boats in the United States Navy Robert J. Bulkley,2012-09 Small though they were, PT boats played a key role in World War II, carrying out an astonishing variety of missions where fast, versatile, and strongly armed vessels were needed. Called weapons of opportunity, they met the enemy at closer quarters and with greater frequency than any other type of surface craft. Among the most famous PT commanders was John F. Kennedy, whose courageous actions in the Pacific are now well known to the American public. The author of the book, another distinguished PT boat commander in the Pacific, compiled this history of PT-boat operations in World War II for the U.S. Navy shortly after V-J Day, when memories were fresh and records easily assessable. Bulkley provides a wealth of facts about these motor torpedo boats, whose vast range of operation covered two oceans as well as the Mediterranean and the English Channel. Although their primary mission was to attack surface ships and craft close to shore, they were also used effectively to lay mines and smoke screens, to rescue downed aviators, and to carry out intelligence and raider operations. The author gives special attention to the crews, paying well-deserved tribute to their heroism, skill, and sacrifice that helped to win the war.

Mtbstc Charles B. Jones,2011-03-01 This book is the first comprehensive history of an important, but mostly overlooked, element of the World War II Patrol Torpedo (PT) boats: the Motor Torpedo Boat Squadrons Training Center (MTBSTC) in Melville, Rhode Island. While not every sailor who served on PT boats went through the training at MTBSTC, every PT sailor was affected by what went on there. The MTBSTC created the PT boats' operational policies and tactics, as well as weapons and equipment experimentation and development. Even the orders the men received for their PT boat assignment were dictated by the MTBSTC. Most of the books written about

PT boats have only a passing reference to the MTBSTC. This lack of detailed information on the Training Center has left a large hole in the overall printed history of PT boats. This book fills that gap. This book documents the Training Center from its beginnings when the land was undeveloped swampland, through its growing pains during construction and expansion during the war. It traces the problems of developing a training curriculum from scratch, the struggles to keep the training current, up through the point when the training reached its peak of proficiency just as the war ended. It provides insight into what life was like for the sailors that spent two to three months going through the training program and of those who were stationed at the Training Center as instructors or staff personnel. This book also details the Training Center's post-war career and its current development as a thriving marina and boat building enterprise. This book is culled from the MTBSTC's wartime correspondence files and other deck logs, published and unpublished books, articles, and reports; and interviews with PT boat veterans who underwent the training at the MTBSTC. It is lavishly illustrated with archival, private, and public photographs, most of which have never been published before. This book completes the written history of the PT boats in World War II.

United States PT-boats of World War II in Action Frank D. Johnson,1980 An account of the development of American motor-torpedo boats and their important role in naval operations during World War II.

At Close Quarters Robert Johns Bulkley,John F. Kennedy,Ernest McNeill Eller,2010-07 The U.S. Navy's Patrol Torpedo (PT) Boats occupy a unique place in the American popular view of World War II. The author, a PT boat skipper, provides the definitive account of the reality behind the romantic facade.

German S-Boats Steve Wiper,2012-01-19 A treasury of useful facts, plans, and photos for modelers. The ShipCraft series provides in-depth information about building and modifying model kits of famous warship types. Lavishly illustrated, each book takes the modeler through a brief history of the subject class, highlighting differences between sister-ships and changes in their appearance over their careers. This includes paint schemes and camouflage, featuring color profiles and highly detailed line drawings and scale plans. The modeling section reviews the strengths and weaknesses of available kits, lists commercial accessory sets for super-detailing of the ships, and provides hints on modifying and improving the basic kit. This is followed by an extensive photographic gallery of selected high-quality models in a variety of scales, and the book concludes with a section on research references—books, monographs, large-scale plans, and relevant websites. The subject of this volume is the Second World War German Navy's motor torpedo boats called Schnellboote, known to the Allies as E-Boats. One of the most effective coastal attack craft of the time, the type was built in large numbers and constantly improved as the war progressed, giving many variants to interest modelers. With its unparalleled level of visual information—paint schemes, models, line drawings and photographs—it is simply the best reference for any model maker setting out to build one of these famous boats.

Allied Coastal Forces of World War II John Lambert,Al Ross,2019-03 Allied Coastal Forces, now a recognized classic work first published in 1990, remains the only publication to deal comprehensively--in words, photographs, and drawings--with the technical detail of motor torpedo boats, PT boats, motor gunboats, launches, and submarine chasers. This second volume covers sixteen Vosper MTB designs and the US 70ft, 77ft and 80ft ELCO designs.

German E-boats 1939–45 Gordon Williamson,2012-04-20 By the outbreak of World War II, Germany had done much to replace the Kaiser's High Seas Fleet, which was scuttled following their surrender at the end of World War I. Forced to build anew, the Kriegsmarine possessed some of the most technically advanced warships in existence. Although the heavy units of the fleet were too small in number to pose much of a threat, Germany was particularly well served by her Navy's smaller vessels, in particular the U-Boats and the S-Boats. Known to the allies as the E-Boats ('Enemy'), they performed sterling duties in the Black Sea and English Channel, where they became a particular scourge.

Building the PT Boats Frank J. Andruss,2009-05 The complete history of the building of PT boats for the U.S. Navy at the Elco, Higgins, and Huckins plants. One hundred sixty-two full-page illustrations, selected by Frank J. Andruss Sr., curator of the acclaimed Mosquito Fleet Exhibit, give the reader an unparalleled understanding of the construction and operation of U.S. Navy torpedo boats. It's the closest thing to being on board! This book will take its place on the shelf alongside other essential references to U.S. Navy ship types; an essential companion to similar books about battleships, cruisers, and carriers.

U.S. Patrol Torpedo Boats in World War II, 1939-1945 T. Garth Connelly,2010 This is a comprehensive illustrated history of PT boats in World War II. The author, a lifelong student of PTs, briefly describes the pre-war experimental boat designs to give the reader a lead in to the war-time boats. He then covers the four classes of PT boats in service with the USN in World War II, describing the differences from boat to boat in detail. Every weapon system used on board US PTs in WWII is described and discussed, from machine guns to rocket launchers. For the first time in any great detail, the author gives a history of the six known all gun gunboats which were converted from PTs (three Elco and three Higgins) and has both drawings and photos of these gunboats (including John F. Kennedy's PT-59). Model-builders will appreciate the drawings that contain actual color chips for the various camouflage systems applied to the boats. There are also many color photos to aide modelers in painting accurate paint schemes. The author also discusses and identifies each of the radars used on PT boats in the later stages of the war. A substantial chapter on operational experience discusses how PT boats were used in every theater of war, from Pearl Harbor to D-Day and beyond. Finally, the author provides the fate of every PT boat that now survives. One hundred forty-eight photographs and drawings, full color interior.

Allied Coastal Forces of World War II John Lambert,Al Ross,1993-12-31 Volume II examines sixteen Vosper MTB designs, and the US 70ft, 77ft and 80ft ECLC designs. US-built Vosper designs supplied under lease-lend are also covered while weapons systems and machinery are dealt with in detail. Design, construction, equipment and subsequent development are all covered, and builders, construction lists, fates and technical data are given for each type. Some 700 finely detailed drawings have been included.

Allied Coastal Forces of World War II, Volume I: Fairmile Designs and U.S. Submarine Chasers John Lambert, Al Ross, 2018-11 The major contribution made by coastal forces to the Allied war effort has had surprisingly little coverage in the literature of World War II. Motor torpedo boats, PT boats, motor gunboats, launches, and submarine chasers served with distinction throughout the war, and in every theater. They performed invaluable service as patrol boats, convoy escorts, minelayers and minesweepers, harbor defense vessels, light landing craft, RAF rescue boats, and transports for agents and clandestine missions.

Motor Torpedo Boat Manual U.S Navy, 2013-05-10 FEBRUARY 1943 1. This Motor Torpedo Boat Manual (short title--Motorprons Two) is approved and issued to the service for use. This manual is RESTRICTED, may be issued to officers and petty officers of the Navy, and for instruction of naval personnel. It shall not be carried in aircraft for use therein. 2. Although motor torpedo boats are a relatively new weapon, considerable operating experience has been accumulated. Peacetime operation promoted valuable experimental work and the development of tactical, administrative, and operative procedures. Wartime operation against the enemy in the Pacific, to date, has already greatly added to the total experience gained. As new squadrons are commissioned and sent to outlying bases, the importance of passing on the benefits of operating experience to new personnel needs no elaboration.. 3. Each commanding officer shall keep a record of issue of this manual within his command. When no longer required or when its destruction is ordered, it shall be destroyed by burning. No report of destruction is required. Public domain content transcribed and formatted for HTML by Larry Jewell & Patrick Clancey, Hyperwar Foundation.
