*German Self-Propelled Artillery Guns of the Second World War* Craig Moore, 2019-03-19 • One of the few books that explores the design and deployment of German artillery self-propelled guns (SPGs) to support tanks and infantry during the Second World War • A great reference book for military modellers, historians and tank wargamers interested in German SPGs • A comprehensive guide to German SPGs between 1939 and 1945 in one volume for the very first time, including previously unpublished information on the little-known Hummel-Wespe proving that at least twelve units were built • Authentic camouflage suggestions for military modellers A single towed artillery gun required a team of six horses and nine men. During the Second World War, German engineers mounted an artillery gun on top of a tank chassis; this new technology reduced the amount of valuable war resources as self-propelled guns only required a four- or five-man crew. They could also be made ready to fire more rapidly. *German Self-Propelled Artillery Guns of the Second World War* covers the development and use of this new weapon between 1939 and 1945. One type was successfully deployed in the invasion of France in 1940 and more were used on the Eastern Front against Soviet forces from 1941 until the end of the war. The 'Desert Fox' (Ewin Rommel) demanded artillery guns that could keep up with his panzers in North Africa. He was sent 15-cm howitzers mounted on top of Panzer II tank chassis' and captured French Army Lorraine 37L-tracked armoured supply vehicles. Rommel's forces in northern France were equipped with a variety of new self-propelled guns, which were used against the Allies on the beaches of Normandy during D-Day in 1944. • Includes 81 colour photographs

*With It Or in It* Bacil Donovan Warren, 2016-02-24 Using humor and frank candor, author Bacil Donovan Warren shares his personal experience, as well as that of his fellow tankers, as part of the US Army's 3d Armored Cavalry Regiment (the Brave Rifles) in Saudi Arabia and Iraq. Warren recounts the initial shock of hearing about Iraq's invasion of Kuwait and his Regiment's preparation for deployment during Operation Desert Shield. He describes the stress and sometimes mind-numbing boredom of being deployed deep in the desert of Saudi Arabia, constantly preparing for a possible Iraqi invasion. He recalls the terrifying experience of the start of the air war of Operation Desert Storm and the workmanlike action during combat against Iraq's Republican Guard forces during Operation Desert Sabre. *With It or in It* brings clarity and focus to their unceasing efforts to bring the conflict to a swift and decisive end. Finally, Warren describes the triumphant return of the Brave Rifles to Ft. Bliss, Texas, and the waiting arms of their families and loved ones.

**Obsessed by a Dream** Aashild Sørheim, 2019-01-01 This Open Access biography chronicles the life and achievements of the Norwegian engineer and physicist Rolf Widerøe. Readers who meet him in the pages of this book will wonder why he isn't better known. The first of Widerøe's many pioneering contributions in the field of accelerator physics was the betatron. He later went on to build the first radiation therapy machine, an advance that would eventually revolutionize cancer treatment. Hospitals worldwide installed his machine, and today's modern radiation treatment equipment is based on his inventions. Widerøe's story also includes a fair share of drama, particularly during World War II when both Germans and the Allies vied for his collaboration. Widerøe held leading positions in multinational industry groups and was one of the consultants for building the world's largest nuclear laboratory, CERN, in Switzerland. He gained over 200 patents, received several honorary doctorates and a number of international awards. The author, a professional writer and maker of TV documentaries, has gained access to hitherto restricted archives in several countries, which provided a wealth of new material and insights, in particular in relation to the war years. She tells here a gripping and illuminating story.

**Courbet and the Modern Landscape**, 2006 With its fittingly dramatic design, *Courbet and the Modern Landscape* accompanies the first major museum exhibition specifically to address Gustave

Courbet's extraordinary achievement in landscape painting. Many of these carefully selected works produced from 1855 to 1876--gathered from Asia, Europe, and North America--will be new to readers. The catalogue--which accompanies an exhibition at the Getty Museum to be held from February 21 to May 14, 2006--highlights the artist's expressive responses to the natural environment. Essays by the curators examine Courbet's distinctly modern practice of landscape painting. Mary Morton's essay situates his landscapes in relation to his work in other genres, his critical reputation, and his role in establishing a new pictorial language for landscape painting. Charlotte Eyerman's essay investigates how later generations of nineteenth- and twentieth-century artists responded to Courbet's example. The catalogue also includes an essay by Dominique de Font-Reaulx, curator of photographs at the Musee d'Orsay, on the relationship between Courbet's work and landscape photography of the 1850s and 1860s. Obedience to Authority Stanley Milgram, 2017-07-11 A part of Harper Perennial's special "Resistance Library" highlighting classic works that illuminate our times: A special edition reissue of Stanley Milgram's landmark examination of humanity's susceptibility to authoritarianism. "The classic account of the human tendency to follow orders, no matter who they hurt or what their consequences." — Washington Post Book World In the 1960s, Yale University psychologist Stanley Milgram famously carried out a series of experiments that forever changed our perceptions of morality and free will. The subjects—or "teachers"—were instructed to administer electroshocks to a human "learner," with the shocks becoming progressively more powerful and painful. Controversial but now strongly vindicated by the scientific community, these experiments attempted to determine to what extent people will obey orders from authority figures regardless of consequences.

"Milgram's experiments on obedience have made us more aware of the dangers of uncritically accepting authority," wrote Peter Singer in the New York Times Book Review. With an introduction from Dr. Philip Zimbardo, who conducted the famous Stanford Prison Experiment, *Obedience to Authority* is Milgram's fascinating and troubling chronicle of his classic study and a vivid and persuasive explanation of his conclusions.

**Totalitarian Communication** Kirill Postoutenko, 2014-03-31 Totalitarianism has been an object of extensive communicative research since its heyday: already in the late 1930s, such major cultural figures as George Orwell or Hannah Arendt were busy describing the visual and verbal languages of Stalinism and Nazism. After the war, many fashionable trends in social sciences and humanities (ranging from Begriffsgeschichte and Ego-Documentology to Critical Linguistics and Critical Discourse Analysis) were called upon to continue this media-centered trend in the face of increasing political determination of the burgeoning field. Nevertheless, the integration of historical, sociological and linguistic knowledge about totalitarian society on a firm factual ground remains the thing of the future. This book is the first step in this direction. By using history and theory of communication as an integrative methodological device, it reaches out to those properties of totalitarian society which appear to be beyond the grasp of specific disciplines. Furthermore, this functional approach allows to extend the analysis of communicative practices commonly associated with fascist Italy, Nazi Germany and Soviet Union, to other locations (France, United States of America and Great Britain in the 1930s) or historical contexts (post-Soviet developments in Russia or Kyrgyzstan). This, in turn, leads to the revaluation of the very term »totalitarian«: no longer an ideological label or a stock attribute of historical narration, it gets a life of its own, defining a specific constellation of hierarchies, codes and networks within a given society.
