Mobility, shock, and firepower: The Emergence of the U.S. Army's Armor Branch, 1917-1945 Robert S. Cameron, 2008 From the Preface: The following pages provide a narrative analysis of the U.S. Army's development of armored organizations and their related doctrine, materiel, and training activities in the period 1917-1945. This period marked the emergence of clear principles of armored warfare that became the underpinning of the Armor Branch, influencing armored developments long after World War II ended. A unique style of mounted maneuver combat emerged that reflected a mix of tradition and innovation. In the process, American military culture changed, particularly through the adoption of combined-arms principles. Conversely, political actions, budgetary considerations, and senior leadership decisions also shaped the course of armor development. The emergence of an American armored force involved more than simply tank development. It included the creation of an armored division structure steeped in combined-arms principles, organizational flexibility, and revolutionary command and control processes. Parallel developments included the establishment of specialized units to provide antitank, reconnaissance, and infantry support capabilities. Several Army branches played a role in determining the precise path of armored development, and one of them-the Cavalry-became a casualty as a result.

**Shooting the Pacific War** Thayer Soule, 2014-10-17 Thayer Soule couldn't believe his orders. As a junior officer with no military training or

indoctrination and less than ten weeks of active duty behind him, he had been assigned to be photographic officer for the First Marine Division. The Corps had never had a photographic division before, much less a field photographic unit. But Soule accepted the challenge, created the unit from scratch, established policies for photography, and led his men into combat. Soule and his unit produced films and photos of training, combat action pictures, and later, terrain studies and photographs for intelligence purposes. Though he had never heard of a photo-litho set, he was in charge of using it for map production, which would prove vital to the division. Shooting the Pacific War is based on Soule's detailed wartime journals. Soule was in the unique position to interact with men at all levels of the military, and he provides intriguing closeups of generals, admirals, sergeants, and privates -everyone he met and worked with along the way. Though he witnessed the horror of war firsthand, he also writes of the vitality and intense comradeship that he and his fellow Marines experienced. Soule recounts the heat of battle as well as the intense training before and rebuilding after each campaign. He saw New Zealand in the desperate days of 1942. His division was rebuilt in Australia following Guadalcanal. After a stint back in Quantico training more combat photographers, he went to Guam and then to the crucible of Iwo Jima. At war's end he was serving as Photographic Officer, Fleet Marine Force Pacific, at Pearl Harbor.

**Fighting the People's War** Jonathan Fennell, 2019-01-24 Jonathan Fennell

captures for the first time the true wartime experience of the ordinary soldiers from across the empire who made up the British and Commonwealth armies. He analyses why the great battles were won and lost and how the men that fought went on to change the world.

**The Matilda** Bryan Perrett, 1973

*Inside the Great Tanks* Hans Halberstadt, 1998 This outstanding history is packed with modern color photography of World War II's best-known tanks. Among the armored fighting vehicles covered are the legendary M4 Sherman, the most famous tank of WWII; the Churchill and Cromwell, which battled their way from Normandy to Hamburg; the Russian T-34, triumphant over the Germans from Stalingrad to the streets of Berlin; and the M60 Patton and Super Sherman, which saw fierce fighting in the Middle East. The collection even includes a rare German Hetzer, a tank-destroyer which took its toll on Allied armor in the last months of the War.

Das Afrika Korps Franz Kurowski, 2010-03-23 Action-packed history of the Germans in Africa in World War II. One of the most famous military units of all time under one of the best commanders. The early campaigns in the Western Desert, Tobruk, El Alamein, and more.

A Midshipman's War Frank Wade, 2005 The World War II Mediterranean sea battles are not well known. Many of our ships were sunk, but Malta was saved. North Africa was cleared and Sicily taken in 1943.

*Tiger Tanks at War* Michael Green, James D. Brown, 2008-02-15 The first

prototype for the Tiger tank was set to be ready for Hitler's birthday on April 20, 1942. The Henschel Company, competing with Porsche, produced the superior model, and by August of that year the formidable Tiger--or Panzerkampfwagen VI Tiger Ausf. H.--was in full production. This book takes us behind the scenes with the Tiger tank, reviewing the full history, the design and mechanics, and the mixed record of this machine, which was designed to outgun its Russian counterparts. Military writer Michael Green offers a close-up account--accompanied by photographs, diagrams, and maps--of how the Tiger tank operated, how it was armed, and where it succeeded brilliantly, as well as where it failed miserably. His book fills a fascinating niche in the history of military technology, and of the impact of technology on history itself.

**Bolt Action: Armies of Italy and the Axis** Warlord Games, 2013-11-20 While many nations flocked to the side of the Allies, others joined forces with Germany as part of the Axis. This volume is the definitive guide to the armies of Italy, Hungary, Bulgaria, Romania and Finland. Fight the Winter War against the Soviets, hold back the British in North Africa, or help shore up the German offensives on the Eastern Front with this latest supplement for Bolt Action.

**Leyte** M. Hamlin Cannon, 1996 With the Leyte Campaign the War in the Pacific entered a decisive stage. The period of limited offensives, bypassing, and island hopping was virtually over. American troops in greater numbers than

ever before assembled in the Pacific Theater, supported by naval and air forces of corresponding size, fought and overcame Japanese forces of greater magnitude than any previously met. Though the spotlight is on the front-line fighting, the reader will find in this volume a faithful description of all arms and services performing their missions. The account is not exclusively an infantry story. It covers as well the support of ground fighting on Leyte by large-scale naval operations and by land-based air power under the most adverse conditions. In addition, careful attention to logistical matters, such as the movement of supplies and the evacuation of the wounded, gives the reader a picture of the less spectacular activities of an army in battle.

IS-2 Heavy Tank 1944-73 Steven J. Zaloga, 2011-10-20 The Iosef Stalin tanks were the ultimate heavy tanks developed by the Soviet Union and were popularly called 'Victory tanks' due to their close association with the defeat of Germany in 1945. Yet in spite of their reputation, the Stalin tanks emerged from a troubled design, had a brief moment of glory in 1944 and 1945, and disappeared in ignominy after 1960. This title covers the events contributing to the Soviet Union's need to design the new series, with particular reference to the unsuccessful KV series and the advent of a new generation of heavy German tanks including the Tiger. It also covers their development, operational history and myriad variants.

**World Military Leaders** Mark Grossman, 2007 Articles profiling important military leaders are arranged in A to Z format.

*European Armies and the Conduct of War* Hew Strachan, 2005-07-28 Discussing the key issues of modern warfare, Hew Strachan's work examines the theory and practice of land warfare in Europe since 1700. Looking at warfare in the context of social and political change, Dr. Strachan interprets his subject matter as widely as possible, and *European Armies and the Conduct of War* considers the roles of air power and the impact of the United States on European military developments. Through the eyes of the major theorists of the day, *European Armies* examines: \* how the social and political influences which shape armies, also mould the attitude of those armies to warfare \* the story of technical innovation \* the mounting pace of industrialization and its impact of warfare. Recent military history has tended to focus on the relationship between armies and society and there has been much original research on the subject of the conduct of war. This book brings these approaches together, providing information and insight vital to the study of this fascinating era.

**Jane's World War II Tanks and Fighting Vehicles** Leland S. Ness, 2002 This is the land equivalent of Jane's Battleships, a comprehensive encyclopaedia of all the combat vehicles of World War II from Somaliland to Japan. A nation-by-nation overview of each country's development of tanks and their involvement in World War II is before providing an A-Z of each army's tanks and fighting vehicles including armoured cars, personnel carriers, amphibious craft and mortar carriers. Quirlier profiles of vehicles such as the German

TKS tankette are given.

Timelines of Nearly Everything Manjunath.R,2021-07-03 This book takes readers back and forth through time and makes the past accessible to all families, students and the general reader and is an unprecedented collection of a list of events in chronological order and a wealth of informative knowledge about the rise and fall of empires, major scientific breakthroughs, groundbreaking inventions, and monumental moments about everything that has ever happened.

**Botticelli Past and Present** Ana Debenedetti,Caroline Elam,2019-01-08 The recent exhibitions dedicated to Botticelli around the world show, more than ever, the significant and continued debate about the artist. Botticelli Past and Present engages with this debate. The book comprises four thematic parts, spanning four centuries of Botticelli's artistic fame and reception from the fifteenth century. Each part comprises a number of essays and includes a short introduction which positions them within the wider scholarly literature on Botticelli. The parts are organised chronologically beginning with discussion of the artist and his working practice in his own time, moving onto the progressive rediscovery of his work from the late eighteenth to the turn of the twentieth century, through to his enduring impact on contemporary art and design. Expertly written by researchers and eminent art historians and richly illustrated throughout, the broad range of essays in this book make a valuable contribution to Botticelli studies.

*Carriages and Mounts Series* United States. Army Materiel Command,1970

**Tigers in Combat** Wolfgang Schneider,2020-09-01 • Hundreds of photos--many of them rare--of Tiger tanks and their crews • Color illustrations by Jean Restayn focus on markings, camouflage, and insignia • Inventories and timelines for each unit In this follow-up to *Tigers in Combat I* (0-8117-3171-5), Wolfgang Schneider turns his attention to the Tiger tanks of the Waffen-SS and the Wehrmacht's named units, such as the Großdeutschland Division, Company Hummel, and Tiger Group Meyer. Based on combat diaries, the text tells the history of each unit, but most of the book is devoted to photos of the tanks and the men who manned them. It offers as unique and comprehensive a look at these lethal machines as is possible decades after World War II.

**Kursk 1943** Anders Frankson,Niklas Zetterling,2016-12-05 The battle at Kursk in 1943 is often referred to as the greatest tank battle in the history of warfare. This volume makes extensive use of German archival documents as well as various Russian books and articles. As well as an account of the battle, it addresses methodological issues.

*Challenger 2 Main Battle Tank Owners' Workshop Manual* Dick Taylor,2018-10-23 Challenger 2 (CR2) is the British Army's main battle tank. CR2 is based on the Challenger 1 tank, which served with distinction on operations in the Gulf War and the Balkans. Although a logical development of Challenger 1, CR2 is greatly superior. It is protected by second generation

Chobham Armour and features a new digital fire control system that includes a panoramic commander's sight, a laser range finder and a new version of the Thermal Observation and Gunnery Sight (TOGS II). The turret mounts the high pressure L30 120mm gun that fires conventional APDS-FS, HESH, smoke and depleted uranium projectiles with great accuracy.
