The Japanese Aircraft Carrier Akagi Stefan

Dramiński, 2017-03-19 This vessel, which was to become the most famous Japanese aircraft carrier and the symbol of the might of the Imperial Japanese Navy aviation, was initially built as a battlecruiser. Only as the result of the resolutions of the Washington Naval Treaty the Akagi (Red Castle, the name of a Japanese mountain) was completed as an aircraft carrier. During the first six months of the war in the Pacific she was the flagship of the carrier strike group, marching from one victory to another. The reversal took place during the battle of Midway, when a hit by a single bomb in a fatal moment sealed her fate.

The Aircraft Carrier Kaga Stefan Draminski, 2014-12-19

Japanese aircraft carrier Kaga. She was initially being built as a battleship, but as a result of a coincidence she became one of the first large carriers in history. She was a part of Japanese Kidō Butai, a group of carriers that decided about the power of the Imperial Japanese Navy during the first half-year of the war in Pacific. After a daring attack on Pearl Harbor followed by a series of further victories there was a reversal during the battle of Midway, when Kaga and three accompanying carriers were destroyed which ultimately buried Japan's chances for winning the war.

The Aircraft Carrier Hiryu Stefan Draminski, 2022-07-07

A uniquely detailed study of a Japanese aircraft carrier that took part in the attack on Pearl Harbor, before being sunk at Midway. Superbly illustrated with line drawings, full-colour artwork of the ship through its career, internal reconstructions of deck layouts, and 3D illustrations of every detail of the ship from its rigging to its aircraft to its anchors, this book reconstructs and dissects one of the most prominent carriers of the early Pacific War. Built in the late 1930s, Hiryu took part in the attack on Pearl Harbor and most of the operations of Japan's triumphant first months of the war, before being sunk at Midway. Drawing on Stefan Draminski's new

research and making the best use yet of his acclaimed 3D illustration techniques, this is the most comprehensive examination of Hiryu ever published. It includes a complete set of detailed line drawings with fully descriptive keys and full-color 3D artwork, supported by technical details, photographs, and a concise history of the ship's construction and service.

Imperial Japanese Navy Aircraft Carriers 1921-45 Mark Stille, 2012-05-20 The Imperial Japanese Navy was a pioneer in naval aviation, having commissioned the world's first built-from-the-keel-up carrier, the Hosho. Throughout the 1920s and 1930s, it experimented with its carriers, perfecting their design and construction. As a result, by the time Japan entered World War II and attacked the United States at Pearl Harbor in 1941, it possessed a fantastically effective naval aviation force. This book covers the design, development and operation of IJN aircraft carriers built prior to and during World War II. Pearl Harbor, Midway and the first carrier vs carrier battle, the battle of the Coral Sea, are all discussed.

Battle of Midway, WWII Naval Battle in a Fly Edgar

Wollstone, Two warring nations, United States and Japan, both equally mighty and determined in its path to emerge as an invincible global power. Japan with its disciplined and constituted war gimmicks locks horn with the technologically advanced US. With the first ever radar system prototype installed, Battle of Midway inaugurates the opening of Pacific theatre in WW2. With Japanese captains of sinking war ships deciding to drown their pride and dignity in the teal waters of the Pacific, the tragic death of the three captured pilots in the hands of a callous Japanese admiral to the abysmal loss of lives and machinery in the wake of a naval battle, is nothing short of a tumultuous ride, akin to a fictional movie. The battle of midway is as much a story of generals of competing nations as is that of combating aircraft carriers; Yorktown, Enterprise and Hornet in the US and Hiryu, Soryu and Akagi in the Japanese side. Go through this book to have a brief journey this ferocious battle of WWII. The tactics, techniques and aftermaths of this combat have unveiled here.

Carrier War Clark G. Reynolds,1982 Traces the development of aircraft carriers and their use in WW II

Battle of Midway John Grehan,2019-09-24 Japan's attack on Pearl Harbor in the Hawaiian Islands on 7 December 1941, had severely damaged the United States Pacific Fleet but had not destroyed it, for the fleet's aircraft carrier force had been at sea when the Japanese struck. This meant that, despite the overwhelming success of Japanese military forces across the Pacific, US carrier-based aircraft could still attack Japanese targets. After the Battle of the Coral Sea in early May 1942, in which both sides had lost one carrier, the commander of the Japanese Combined Fleet, Admiral Isoroku Yamamoto, calculated that the US had only two serviceable carriers left. If those remaining carriers could be lured into a battle with the Combined Fleet and destroyed, nothing could stop the Japanese achieving complete control of the South Pacific. It would take the United States many months, even with its massive industrial muscle, to rebuild its

carried fleet if it was destroyed, by which time Japan would be able to secure the raw materials needed to keep its war machine functioning and to build all the bases it required across the Pacific, which would enable its aircraft to dominate the entire region. Aware of the sensitivity of the Americans towards Hawaii after the Battle of Pearl Harbor, Yamamoto believed that if he attacked there again, the US commander, Admiral Nimitz would be certain to commit all his strength to its defence. Yamamoto selected the furthest point of the Hawaiian Islands, the Naval Air Station on the Midway Atoll, for his attack, which was beyond the range of most US land-based aircraft. Yamamoto launched his attack on 4 June 1942. But the US had intercepted and deciphered Japanese signals and Nimitz, with three not two aircraft carriers, knew exactly Yamamoto's plans. Yamamoto had hoped to draw the US carriers into his trap but instead he sailed into an ambush. The four-day battle resulted in the loss of all four Japanese aircraft carriers, the US losing only one. The Japanese were never able to recover from these losses, and it was the Americans who were able to take control of the Pacific. The Battle of Midway, unquestionably, marked the turning point in the war against Japan.

Sōryū-, Hiryū-, and Unryū-Class Aircraft Carriers Lars Ahlberg, Hans Lengerer, 2020-11-28 This book covers the design and construction of the two well-known Sōryū and Hiryū carriers, and the lesser-known ships of the Unryū class, and relies on original Japanese source material, including numerous photos, drawings, and specifications. How and why the Japanese designed and constructed the WWII-era, medium-sized Sōryū-, Hiryū-, and Unryū-class aircraft carriers, and how they were operated, is covered in detail. The Imperial Japanese Navy planned the construction of 45 aircraft carriers from 1918 to 1943 and commissioned twenty-five of them between 1922 and 1944. These types were large, medium, and small aircraft carriers, with some converted from other warship classes, and escort aircraft carriers remodeled from passenger ships. The medium type presented

here formed the majority, with a total of 18 planned: five were completed, three remained in various completion stages at the end of the Pacific War, and ten were eventually canceled.

Flattop Fighting in World War II Patrick Degan, 2003-04-18
World War II's naval battles between the United States and Japan have been the subject of many books, popular movies, and documentaries, but the very important story of the fighting between United States and Japanese aircraft carriers is often lost in broader discussions of the Pacific naval war. This work concentrates exclusively on the fighting between the American and Japanese aircraft carriers, examining how strategies were planned and carried out on both sides. Presented are the stories of the USS Hornet, which launched the B-25s of James Doolittle's daring raid of Tokyo in 1942; the USS Yorktown, which suffered fierce attacks during the Battle of Midway; the USS Lexington, which refueled and rearmed Hellcats during the Great Marianas Turkey Shoot; the USS Enterprise, the leader of a motley assortment of cruisers and destroyers left to hold a very precarious line in the campaign for Guadalcanal; and the Japanese battleship Yamato, sacrificed for a suicide mission against 900 aircraft bombers.

US Carriers at War Peter Kilduff, 1997 Some of the greatest exploits of US Navy aircraft carrier operations - in both the Atlantic and the Pacific - are told in this book by American aviation historian Peter Kilduff. The product of extensive research, this book portrays in personal account and from official documentation the stories of courage in the face of adversity and triumph after struggle that marked the air operations from the flight decks of the US Navy aircraft carriers at war.

Koga's Zero Jim Rearden, 1995 The amazing, true story of Flight Petty Officer Tadayoshi Koga and the Zero fighter he crash landed on Akutan island in Alaska on June 4, 1942. This is the story of what it meant to the US during the war.

Carrier Wars Edwin Palmer Hoyt, 1989

Rendezvous at Midway Pat Frank,Joseph Daniel

Harrington,1967

The Ship that Held the Line Lisle A. Rose,1995 Despite the undisputed significance of the USS Hornet's wartime experience in the Pacific, until now there has never been a serious study of this aircraft carrier's remarkable career. This book tells how the Hornet was molded into a deadly weapon of war, how the ship was fought and ultimately lost, and what it was like to live and fight aboard her at a time when the fate of the United States depended on the Navy's minute carrier fleet. Through the experience of this key ship and the eyes of her crew and the aviators who flew from her deck, Lisle Rose recreates the first desperate year of the war in the Pacific. As one of the few fleet aircraft carriers in the world, the Hornet - and her contemporaries in the U.S. and Japanese navies - shaped the brief golden age of carrier warfare and defined carrier doctrine down to this day.

An Operational Analysis of the Pearl Harbor Attack - World War II Deception to Achieve Surprise, Reconnaissance and Intelligence Execution, Admiral Yamamoto, Japanese Aircraft Carriers Akaqi and Kaga U. S. Military,Department of Defense (DoD),U. S.

Government,2017-04-19 This book explores the Pearl Harbor attack from an operational level of war perspective. Its purpose is to provide the reader with a Japanese viewpoint of the Pearl Harbor operation, and to determine if there were weaknesses with the plan and its execution. The study is limited in scope in that it will focus primarily on a single operation of the Pacific campaign initiated by the Japanese. Much has been written about the devastation inflicted upon U.S. forces by Japan on 7 December 1941. Research initiated for this paper concludes that although the execution of the Pearl Harbor operation was successful, the operation did not achieve its strategic aim. A mismatch existed between operational and strategic objectives which was partially

attributed to flaws in target selection, priority, and tactical level decision making during execution. Japan's narrow objective of destroying primarily capital ships, spared important logistical facilities from destruction. These support facilities proved to be the key to a quick restoration of U.S. naval presence in the region. Likewise, Japan's emphasis on placing a higher target priority for battleships versus carriers, allowed a more potent weapon system to essentially escape unscathed. This mistake had strategic implications in that aircraft carriers were the key weapon's platform used to destroy the Japanese Navy in later battles in the Pacific. Finally, the tactical commander's failure to exploit America's military forces at its most vulnerable point, minimized further damage which could have been inflicted upon the U.S. Pacific Fleet anchored at Pearl Harbor. These operational and tactical errors allowed America to quickly recover from the attack and pursue offensive actions in the Pacific within a few months. The net result of the Pearl Harbor attack along with subsequent operations, solidified Japan's position in the Southwest Pacific. However, flaws in operational planning and conservative military leadership during the plan's execution, guaranteed this dominance only in the short term. From the Japanese perspective, war with the United States seemed inevitable. During the early 1900's, the Japanese government spent a considerable amount of their national budget building a formidable navy. Her contributions to the allied side during World War I was rewarded by receiving Germany's island possessions in the Pacific, north of the equator. Therefore, Japan emerged from the war as a naval power with enhanced prestige and an appetite for primary influence in the western Pacific region. The Japanese island possessions were strategically located close to U.S. controlled islands in the Pacific thus, a rivalry with America quickly ensued. In 1918, the Imperial Defense Policy adopted by Japan identified the United States as their number one potential enemy. This belief influenced all aspects of Japanese naval policy. A naval arms race resulted from

increased tensions between the two nations. The Washington Agreement in 1922 deterred further escalation by limiting the number of ships each side could possess. The agreement and subsequent disarmament conferences, kept the size of the Japanese Navy inferior to United States naval forces. By 1936, Japan had withdrawn from the agreement, giving herself freedom to expand her navy. By 1941, the Japanese Navy was more powerful than the combined British and United States fleets in the Pacific area.

Carrier Victory John M. Lindley, 1978 An account of the combat between American and Japanese aircraft carrier forces in the Pacific during World War II.

Destined for Glory Thomas Wildenberg, 1998 On 4 June 1942 three squadrons of U.S. Navy Dauntless dive bombers set fire to three-quarters of Japan's carrier strike force at Midway and changed the course of the war in the Pacific. Japan was never able to recover its offensive initiative. As Thomas Wildenberg convincingly demonstrates in this book, the key ingredient to the navy's success at Midway was the planning and training devoted to the tactic of dive bombing over the previous seventeen years. Examining how political, economic, technical, and operational factors influenced the development of carrier airpower between 1925 and 1942, he shows why dive bombing became the navy's weapon of choice - why it was emphasized over all other methods of aerial warfare and finally brought to bear to stop the Japanese advance. He also pays tribute to the select group of naval aviators and senior leaders whose insights and determination drove the evolution of carrier tactics in this formative period.
