**Mitsubishi A6M Zero** James D'Angina, 2016-10-20 Unquestionably the most iconic Japanese fighter of World War II, the Mitsubishi A6M Rei-Sen, Type Zero fighter was used from the initial raid on Pearl Harbor up to the Kamikaze attacks at the end of the war. Facing off against the likes of the Wildcat, Corsair and even the Spitfire, the Zero gained a legendary reputation amongst Allied pilots due to its incredible manoeuvrability. Detailed analysis of its technical qualities show why the Zero was so feared, but also pinpoints the weaknesses that would eventually be its downfall as Allied pilots learned how to combat it. A selection of historical photographs and unique artwork accompany the analysis as James D'Angina delves into the history of the premier Axis fighter of the Pacific Theatre, exploring the design and combat effectiveness of the Zero as well as the tactics developed by Allied pilots to counter it.

**Wings on My Sleeve** Eric Brown, 2008-09-18 The autobiography of one of the greatest pilots in history. In 1939 Eric Brown was on a University of Edinburgh exchange course in Germany, and the first he knew of the war was when the Gestapo came to arrest him. They released him, not realising he was a pilot in the RAF volunteer reserve: and the rest is history. Eric Brown joined the Fleet Air Arm and went on to be the greatest test pilot in history, flying more different aircraft types than anyone else. During his lifetime he made a record-breaking 2,407 aircraft carrier landings and survived eleven plane crashes. One of Britain's few German-speaking airmen, he went to Germany in 1945 to test the Nazi jets, interviewing (among others) Hermann Goering and Hanna Reitsch. He flew the suicidally dangerous Me 163 rocket plane, and tested the first British jets. WINGS ON MY SLEEVE is 'Winkle' Brown's incredible story.

**Fighter Combat** Robert L. Shaw, 1985 This book provides a detailed discussion of one-on-one dog-fights and multi-fighter team work tactics. Full discussions of fighter aircraft and weapons systems performance are provided along with an explanation of radar intercept tactics and an analysis of the elements involved in the performance of fighter missions.

**Danger's Hour** Maxwell Taylor Kennedy, 2009-11-03 Drawing on years of research and firsthand interviews with both American and Japanese survivors, Maxwell Taylor Kennedy draws a gripping portrait of men bravely serving their countries in war and the advent of a terrifying new weapon, suicide bombing, that nearly halted the most powerful nation in the world. In the closing months of World War II, Americans found themselves facing a new weapon: kamikazes--the first men to use airplanes as suicide

weapons. By the beginning of 1945, facing imminent invasion, Japan turned to its most idealistic young men and demanded of them the greatest sacrifice. On May 11, 1945, days after Germany's surrender, the USS Bunker Hill--with thousands of crewmen and the most sophisticated naval technology available--was 70 miles off the coast of Okinawa when pilot Kiyoshi Ogawa flew his plane into the ship, killing 393 Americans in the worst suicide attack against America until September 11.--From publisher description.

**Judy** Damien Lewis, 2014-12-02 British bestselling author Damien Lewis is an award-winning journalist who has spent twenty years reporting from war, disaster, and conflict zones. Now Lewis brings his first-rate narrative skills to bear on the inspiring tale of Judy--an English pointer who perhaps was the only canine prisoner of war. After being bombed and shipwrecked repeatedly while serving for several wild and war-torn years as a mascot of the World War II Royal Navy Yangtze river gunboats the Gnat and the Grasshopper, Judy ended up in Japanese prisoner of war camps in North Sumatra. Along with locals as slave labor, the American, Australian, and British POWs were forced to build a 1,200-mile single-track railroad through the most horrifying jungles and treacherous mountain passes. Like the one immortalized in the film *The Bridge on the River Kwai*, this was the other death-railroad building project where POWs slaved under subhuman conditions. In the midst of this living hell was a beautiful and regal-looking liver and white English pointer named Judy. Whether she was scavenging food to help feed the starving inmates of a hellish Japanese POW camp, or by her presence alone bringing inspiration and hope to men, she was cherished and adored by the Allied servicemen who fought to survive alongside her. Judy's uncanny ability to sense danger, matched with her quick thinking and impossible daring saved countless

lives. More than a close companion she shared in both the men's tragedies and joys. It was in recognition of the extraordinary friendship and protection she offered amidst the unforgiving and savage environment of a Japanese prison camp in Indonesia that she gained her formal status as a POW. From the author of *The Dog Who Could Fly* and the co-author of *Sergeant Rex* and *It's All About Treo* comes one of the most heartwarming and inspiring tales you will ever read.

*Rapid Fire* Anthony G. Williams, 2002-10-22 A comprehensive account of the heavy automatic weapons developed in every nation throughout the 20th century. Contains tabulated data for the weapons and ammunition as well as a cartridge identification guide.

**Dornier Do 24 Units** Peter de Jong, 2015-07-20 Perhaps the most seaworthy flying boat ever built, the elegant, tri-motor Dornier Do 24 served with both the Allied and Axis forces in very different parts of the globe during World War 2, garnering an excellent reputation along the way. This study uses archival records, first-hand accounts and revealing photographs to illuminate the combat career of this remarkable aircraft for the first time in English. The German-built Do 24 was the Netherlands Navy's principal aerial asset during the Japanese invasion of the East Indies. While the survivors of that ordeal served in the Australian Air force, in occupied Holland and France production continued apace and the Do 24 equipped the German Air-Sea rescue service, whose crews loved and respected the machine. The type witnessed the rise and fall of the Luftwaffe over all the European seas, took part in the desperate evacuations of Wehrmacht troops on the Baltic in the face of the overwhelming Soviet advance, and was pressed out of service only with the withdrawal of Spanish Do 24s in 1969. This volume tells the long and eventful story

of the faithful Do 24 in full.

Introduction to UAV Systems Paul Fahlstrom, Thomas Gleason, 2012-07-11 Unmanned aerial vehicles (UAVs) have been widely adopted in the military world over the last decade and the success of these military applications is increasingly driving efforts to establish unmanned aircraft in non-military roles. Introduction to UAV Systems, 4th edition provides a comprehensive introduction to all of the elements of a complete Unmanned Aircraft System (UAS). It addresses the air vehicle, mission planning and control, several types of mission payloads, data links and how they interact with mission performance, and launch and recovery concepts. This book provides enough information to encourage a student to learn more; to provide a specialist with a basic appreciation of the technical issues that drive other parts of the system and interact with their specialty; or to help a program manager understand system-level tradeoffs and know what questions to ask. Key features: Comprehensive overview of all elements of a UAS and of how they interact. Introduces the underlying concepts of key subsystems. Emphasizes system-integration issues and how they relate to subsystem design choices. Practical discussion of issues informed by lessons learned in UAV programs. Introduction to UAV Systems, 4th edition is written both for newcomers to the subject and for experienced members of the UAV community who desire a comprehensive overview at the system level. As well as being a primary text for an introductory course on UAS or a supplementary text in

a course that goes into more depth in one of the individual technologies involved in a UAS, this book is a useful overview for practicing engineers, researchers, managers, and consultants interested in UAV systems.

The Japanese Empire S. C. M. Paine, 2017-03-06 The Japanese experience of war from the late-nineteenth to the mid-twentieth century presents a stunning example of the meteoric rise and shattering fall of a great power. As Japan modernized and became the one non-European great power, its leaders concluded that an empire on the Asian mainland required the containment of Russia. Japan won the First Sino-Japanese War (1894–5) and the Russo-Japanese War (1904–5) but became overextended in the Second Sino-Japanese War (1931–45), which escalated, with profound consequences, into World War II. A combination of incomplete institution building, an increasingly lethal international environment, a skewed balance between civil and military authority, and a misunderstanding of geopolitics explains these divergent outcomes. This analytical survey examines themes including the development of Japanese institutions, diversity of opinion within the government, domestic politics, Japanese foreign policy and China's anti-Japanese responses. It is an essential guide for those interested in history, politics and international relations.

**Why the Samurai Lost Japan** John D Beatty, Lee A Rochwerger, 2018-12-15 Beginning in the late 19th century, Imperial Japan embarked on a program of aggressive military overseas adventures in Asia and the Pacific. From 1904 to 1941, Japan's desire for resource independence had driven them to conquer Korea, Manchuria, large parts of China, and French Indochina, and to occupy large swaths of Pacific islands. These

conquests provided tremendous resources, but still, they needed more. All these conquests were driven by the Samurai: the ancient warriors of Japan, answerable only to the needs for resources, an ill-defined bushido code, and their Emperor. They led Japan into a horrible war stretching across a third of the Earth's surface, knowing full well they could not defeat their enemies. Their plan was the uncertain hope that the West would falter and offer an olive branch, accepting Japanese hegemony in the Pacific and East Asia and granting them the resources they needed. This was a miscalculation driven by a folly of epic proportions. Four months of early and easy victories in 1941 convinced them of their invincibility. They refused to believe that their fighting spirit could be defeated by superior firepower and the sheer numbers of opponents. And the samurai had no Plan B.
