**Modelling the Early Panzerkampfwagen IV** Tom Cockle,2012-02-20 The Panzerkampfwagen IV has often been referred to as the 'workhorse' of the German Army in World War II. This important weapon went through several upgrades and improvements and was the only German tank to have been produced continuously throughout the entire war. This book specifically deals with the short-barrelled Panzer IV, built until February 1942, which saw service from the invasion of Poland, through the fall of Western Europe and the campaigns of North Africa to the steppes of the Soviet Union. This book takes on a series of increasingly complex construction projects covering all the major Panzer IV types, including the rare multi-turreted Neubau-Panzerkampfwagen IV.

**Panzer IV, Medium Tank** Dennis Oliver,2022-03-18 A fully illustrated guide to Germany's use of Panzer IV Tanks during the Normandy campaign, perfect for WWII buffs, modelers, and wargamers. When the Allied armies landed on the Normandy beaches on June 6, 1944, they met a reaction force anchored by 758 Pzkw IV tanks. The first models of these tanks had entered service in 1937 and the original design remained in use, continually up-gunned and up-armored, throughout the conflict. Drawing on official documentation and unit histories, Dennis Oliver investigates the formations that operated these deservedly famous vehicles and uses archive photos and extensively researched color illustrations to examine the markings, camouflage, and technical aspects of the Pzkw IV tanks that served on the Western Front during the critical summer of 1944. A key section of this book displays available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined, providing everything the modeler needs to recreate an accurate representation of these historic vehicles.

**Panzer IV at War, 1939-1945** Paul Thomas,2012-06-19 The Panzer IV Panzerkampfwagen IV was one the foremost German fighting vehicles of the Second World War, and this volume in the TankCraft series is an ideal introduction to it. With detailed captions, text and illustrations the book tells the story of the technical development of the Panzer IV and the numerous variants that went into production, and it describes how it evolved from an infantry support vehicle to become the backbone of the Panzer units. It was modified and upgunned to face the ever-increasing enemy threat, and it proved to be so diverse and effective that it earned a unique tactical role on the battlefield.A large part of the book showcases available model kits and after market products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined in order to provide everything the modeler needs to recreate an accurate representation of the only Panzer that stayed in production throughout the war.

**Panzer** Niall Barr,Russell Hart,1999 The photographs show the panzers at every stage of their development, from the first experimental units in the 1930s through to the final, futile defence of the Reich. The text provides a detailed history of the development of the concept of armoured blitzkrieg and the equipment used by panzer units, with analysis of the relevant campaigns.

**Modelling the Panzer IV in 1/72 scale** Alex Clark,2012-07-20 Although not as glamorous as vehicles such as the Panther and Tiger, the Panzer IV formed an extremely important part of the German armoured forces during World War II. This title provides detailed 1/72-scale build articles on a Panzer IV Ausf. H in winter camouflage, a Jagdpanzer IV, a late-version Sturmpanzer IV, a final version Sturmgeschütz IV, and a Flakpanzer IV Wirbelwind. Conversions, interior detailing, kit-bashing, adding aftermarket figures and parts, finishing and weathering, plus special scale

techniques are all covered in detail. A gallery section also features Panzer IV Ausf. H, Panzer IV L/70 (V), and Panzer IV L/70 (A) variants.

**Panzer IV vs Sherman** Steven J. Zaloga,2015-08-20 As the Allies attempted to break out of Normandy, it quickly became apparent that there would be no easy victory over the Germans, and that every scrap of territory on the way to Berlin would have to be earned through hard fighting. This study concentrates on, the ferocious battles between the German Panzer IV and US Sherman that were at the heart of this decisive phase of World War II. The two types were among the most-produced tanks in US and German service and were old enemies, having clashed repeatedly in the Mediterranean theater. Throughout their long service careers, both had seen a succession of technical developments and modifications, as well as an evolution in their intended roles – but both remained at the forefront of the fighting on the Western Front. Written by an expert on tank warfare, this book invites the reader into the cramped confines of these armoured workhorses, employing vivid technical illustrations alongside archive and contemporary photography to depict the conditions for the crewmen within.

**Panzer IV vs Char B1 bis** Steven J. Zaloga,2011-12-20 The Battle of France in 1940 involved the first large-scale tank-against-tank battles in history. The massive clashes at Stonne, Hannant, and Gembloux involved hundreds of tanks on both sides, yet have faded from memory due to the enourmity of the French defeat. This book examines two of the premier opposing tanks of the Wehrmacht and the French Army, the German PzKpfw IV and the French Char B1 bis. With a complete history of the design, development, and deployment of these armoured fighting vehicles, the story of these great battles is once again brought to life.

**Modelling a Tiger I I3./SS-Panzer Regiment I, Kursk 1943** Gary Edmundson,2012-04-20 Probably the most famous tank of World War II, the Tiger I was originally conceived in 1941 in response to the German Army's experience in fighting British tanks and anti-tank guns in Western Europe and the North African desert. Following the invasion of Russia, the appearance of the Soviet T-34 and KW tanks lent a further impetus to the programme and 1,350 Tigers were produced between August 1942 and August 1944.
