Modelling the Early Panzerkampfwagen IV Tom Cockle,2012-02-20

The Panzerkampfwagen IV has often been referred to as the 'workhorse' of the German Army in World War II. This important weapon went through several upgrades and improvements and was the only German tank to have been produced continuously throughout the entire war. This book specifically deals with the short-barrelled Panzer IV, built until February 1942, which saw service from the invasion of Poland, through the fall of Western Europe and the campaigns of North Africa to the steppes of the Soviet Union. This book takes on a series of increasingly complex construction projects covering all the major Panzer IV types, including the rare multi-turreted Neubau-

Panzerkampfwagen IV.

This important weapon went through several upgrades and improvements during its lifetime and is the only German tank to have been produced continuously throughout the entire war. In his previous title, *Modelling the Early Panzerkampfwagen IV*, Tom Cockle covered the early production Panzer IV. This book will cover the later versions of the tank from those that were initially equipped with the 7.5cm KwK 40 L/43 to later versions which were mounted with the L/48 gun. Step-by-step photographs show how to model this tank across various scales and at various skill levels, making this book ideal for both beginners as well as advanced modellers interested in minuscule detail, scratch built extras and rare tank markings.

Panzer IV, Medium Tank Dennis Oliver,2022-03-18 A fully illustrated guide to Germany's use of Panzer IV Tanks during the Normandy campaign, perfect for WWII buffs, modelers, and wargamers. When the Allied armies landed on the Normandy beaches on June 6, 1944, they met a reaction force anchored by 758 Pzkw IV tanks. The first models of these tanks had entered service in 1937 and the original design remained in use, continually up-gunned and up-armored, throughout the conflict. Drawing on official documentation and unit histories, Dennis Oliver investigates the formations that operated these deservedly famous vehicles and uses archive photos and extensively researched color illustrations to examine the markings, camouflage, and technical aspects of the Pzkw IV tanks that served on the Western Front during the critical summer of 1944. A key section of this book displays available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined, providing everything the modeler needs to recreate an accurate representation of these historic vehicles.

Spielberger,2011 This book is the final documentation on the Panzerkampfwagen IV series, the most often-built German tank of World War II and presents the exact chronology of the vehicle's development from 1935-45, plus many hitherto unknown and pioneering test vehicles. The authors discuss the origin of the Large Tractor, the so-called Neubau (New-Built) Vehicle and the attempts in 1944 to install the 7.5 cm Kampfwagenkanone 42 L/70 of the Panther onto the Panzer IV. The authors have dedicated an entire chapter to armament, and action in all war theaters.
