**Armored Champion** Steven Zaloga, 2015-05-15 Armor expert Zaloga enters the battle over the best tanks of World War II with this heavy-caliber blast of a book armed with more than forty

years of research. • Provocative but fact-based rankings of the tanks that fought the Second World War • Breaks the war into eight periods and declares Tanker's Choice and Commander's Choice for each • Champions include the German Panzer IV and Tiger, Soviet T-34, American Pershing, and a few surprises • Compares tanks' firepower, armor protection, and mobility as well as dependability, affordability, tactics, training, and overall combat performance • Relies on extensive documentation from archives, government studies, and published sources—much of which has never been published in English before • Supported by dozens of charts and diagrams and hundreds of photos

*Hetzer & G-13* George Parada, Robert Wroblewski, Stefan Draminski, Mike Koenig, 2009-12-15 \* Includes free decals and masking foil Highly detailed publication covering the World War II German tank destroyers, the Hetzer and the G-13. The Hetzer (baiter), was a German light tank destroyer of the Second World War based on a modified prewar Czechoslovakian Panzer 38(t) chassis. It was intended to be more cost-effective than the much more ambitious Jagdpanther and Jagdtiger designs of the same period. Using a proven chassis, it avoided the mechanical problems of the larger armored vehicles. Containing dozens of archive black and white and color photos, including both close-up and walk-around shots, as well as color artwork profiles, this is an ideal reference for both the enthusiast and modeler, with masking foil included. About the Series Photosniper is a classic series of highly illustrated photo books on the best machines of war, creating, with numerous images, a close-up, walk-around view for each aircraft or vehicle. With emphasis on the key features of each machine, including their variations, artwork, markings, insignia and modifications, customizing and creating a model could not be easier. Includes a free decal sheet.

Patton's Juggernaut: The Rolling 8-Ball 8th Tank Battalion of the 4th Armored Division Albin F. Irzyk, 2017-07-22 This is the biography, not of an individual but of a small military unit, the 8th

Tank Battalion, 4th Armored Division (1943-1946). Combat with the German Army was the destiny of this Battalion. Nothing in my long, full life could compare with the priceless opportunity that I had to command the men of the 8th Tank Battalion. This is their story.

The Anti-Tank Rifle Steven J. Zaloga, 2018-01-25 The emergence of the tank in World War I led to the development of the first infantry weapons to defend against tanks. Anti-tank rifles became commonplace in the inter-war years and in the early campaigns of World War II in Poland and the Battle of France, which saw renewed use in the form of the British .55in Boys anti-tank rifle - also used by the US Marine Corps in the Pacific. The French campaign made it clear that the day of the anti-tank rifle was ending due to the increasing thickness of tank armour. Nevertheless, anti-tank rifles continued to be used by the Soviets on the Eastern Front with two rifles, the 14.5mm PTRS and PTRD, and were still in widespread use in 1945. They served again with Korean and Chinese forces in the Korean War, and some have even appeared in Ukraine in 2014-15. Fully illustrated and drawing upon a range of sources, this is the absorbing story of the anti-tank rifle, the infantryman's anti-armour weapon during the world wars.

**Terrorists' Target Selection** C. Drake, 1998-08-26 The author examines the factors which influence terrorists' target selection. In particular he looks at the influence of the ideologies, strategies and tactics of terrorist groups, and describes how these are restricted by the terrorists' resources, by protective and anti-terrorist measures, by the society within which the terrorists operate, and by the nature of the terrorists and their supporters. He concludes that terrorists' target selection is often both explicable and logical.

*Tank Hunter* Craig Moore, 2017-11-08 The First World War's fierce battles saw the need to develop military technology beyond anything previously imagined: as exposed infantry and cavalry

were mowed down by relentless machine-gun attacks, so tanks were developed. Here author Craig Moore presents every First World War tank, from the prototype 'Little Willie', through the French heavy tanks to the German light tank. He gives a focused history of the development of this game-changing vehicle and the engagements it was used in - vital battles such as the Somme and Cambrai. Stunningly illustrated in full colour throughout, Tank Hunter: World War One provides historical background, facts and figures for each First World War tank as well as the locations of any surviving examples, giving you the opportunity to become a Tank Hunter yourself.

**Dirty Little Secrets of World War II** James F. Dunnigan, 1996-03-14 Dirty Little Secrets of World War II exposes the dark, irreverent, misunderstood, and often tragicomic aspects of military operations during World War II, many of them virtually unknown even to military buffs. Like its successful predecessor, Dirty Little Secrets, Dunnigan and Nofi's new book vividly brings to life all theaters and participants of the war. Revelations include: - The real death count for the war, and why it has never been previously released. - The new age general who refused to smoke or drink, who lived on a vitamin-enriched diet, who opposed animal experimentation, and who regularly consulted his astrologer. - How equipment developed for the war led to such modern high-tech innovations as smart bombs, electronic warfare, and nuclear missiles. - The lackadaisical relationship between Germany and Japan throughout the war. - Tricky bits of information about the lingering effects of the war -- like the thousands of live shells and mines that are still buried in Europe and off the East Coast of America.

Jane's World War II Tanks and Fighting Vehicles Leland S. Ness, 2002 This is the land equivalent of Jane's Battleships, a comprehensive encyclopaedia of all the combat vehicles of World

War II from Somaliland to Japan. A nation-by-nation overview of each country's development of tanks and their involvement in World War II is before providing an A-Z of each army's tanks and fighting vehicles including armoured cars, personnel carriers, amphibious craft and mortar carriers. Quirlier profiles of vehicles such as the German TKS tankette are given.

No Greater Ally Kenneth K. Koskoda, 2011-12-20 An in-depth history of the Polish soldiers who served in World War 2, with previously unpublished first-hand accounts and rare photographs. There is a chapter of World War II history that remains largely untold; the monumental struggles of an entire nation have been forgotten, and even intentionally obscured. This book gives a full overview of Poland's participation in World War II. Following their valiant but doomed defence of Poland in 1939, members of the Polish armed forces fought with the Allies wherever and however they could. Full of previously unpublished accounts, and rare photographs, this title provides a detailed analysis of the devastation the war brought to Poland, and the final betrayal when, having fought for freedom for six long years, Poland was handed to the Soviet Union.

**In Deadly Combat** Gottlob Herbert Bidermann, 2000-06-07 In the hell that was World War II, the Eastern Front was its heart of fire and ice. Gottlob Herbert Bidermann served in that lethal theater from 1941 to 1945, and his memoir of those years recaptures the sights, sounds, and smells of the war as it vividly portrays an army marching on the road to ruin. A riveting and reflective account by one of the millions of anonymous soldiers who fought and died in that cruel terrain, *In Deadly Combat* conveys the brutality and horrors of the Eastern Front in detail never before available in English. It offers a ground soldier's perspective on life and death on the front lines, providing revealing new information concerning day-to-day operations and German army life. Wounded five times and awarded numerous decorations for valor, Bidermann saw action in the Crimea and

siege of Sebastopol, participated in the vicious battles in the forests south of Leningrad, and ended the war in the Courland Pocket. He shares his impressions of countless Russian POWs seen at the outset of his service, of peasants struggling to survive the hostilities while caught between two ruthless antagonists, and of corpses littering the landscape. He recalls a Christmas gift of gingerbread from home that overcame the stench of battle, an Easter celebrated with a basket of Russian hand grenades for eggs, and his miraculous survival of machine gun fire at close range. In closing he relives the humiliation of surrender to an enemy whom the Germans had once derided and offers a sobering glimpse into life in the Soviet gulags. Bidermann's account debunks the myth of a highly mechanized German army that rolled over weaker opponents with impunity. Despite the vast expanses of territory captured by the Germans during the early months of Operation Barbarossa, the war with Russia remained tenuous and unforgiving. His story commits that living hell to the annals of World War II and broadens our understanding of its most deadly combat zone. Translator Derek Zumbro has rendered Bidermann's memoir into a compelling narrative that retains the author's powerful style. This English-language edition of Bidermann's dynamic story is based upon a privately published memoir entitled *Krim-Kurland Mit Der 132 Infanterie Division*. The translator has added important events derived from numerous interviews with Bidermann to provide additional context for American readers.

**Black Earth** Timothy Snyder, 2015-09-08 A brilliant, haunting, and profoundly original portrait of the defining tragedy of our time. In this epic history of extermination and survival, Timothy Snyder presents a new explanation of the great atrocity of the twentieth century, and reveals the risks that we face in the twenty-first. Based on new sources from eastern Europe and forgotten testimonies from Jewish survivors, *Black Earth* recounts the mass murder of the Jews as an event that is still close to us,

more comprehensible than we would like to think, and thus all the more terrifying. The Holocaust began in a dark but accessible place, in Hitler's mind, with the thought that the elimination of Jews would restore balance to the planet and allow Germans to win the resources they desperately needed. Such a worldview could be realized only if Germany destroyed other states, so Hitler's aim was a colonial war in Europe itself. In the zones of statelessness, almost all Jews died. A few people, the righteous few, aided them, without support from institutions. Much of the new research in this book is devoted to understanding these extraordinary individuals. The almost insurmountable difficulties they faced only confirm the dangers of state destruction and ecological panic. These men and women should be emulated, but in similar circumstances few of us would do so. By overlooking the lessons of the Holocaust, Snyder concludes, we have misunderstood modernity and endangered the future. The early twenty-first century is coming to resemble the early twentieth, as growing preoccupations with food and water accompany ideological challenges to global order. Our world is closer to Hitler's than we like to admit, and saving it requires us to see the Holocaust as it was --and ourselves as we are. Groundbreaking, authoritative, and utterly absorbing, *Black Earth* reveals a Holocaust that is not only history but warning.

*Offerings to the Discerning Eye* Sue D'Auria, 2010

Egyptologist Jack A. Josephson, a writer and researcher in the tradition of the gentleman scholar, has achieved broad recognition as an authority in Egyptian art history. His lucid investigative analyses have probed and redefined the limits of inquiry, expanded research parameters, and broadened perspectives, emphasizing the undeniable contributions of art history in an intra-disciplinary framework. This volume of collected essays is dedicated to Josephson by distinguished friends and colleagues, a select roster including eminent, established scholars in the field of Egyptology and rising stars of

the younger generation. Josephson views Egyptian art history as a critical but neglected area of study, and is a strong proponent of its reinstatement in the academic curriculum as an essential component in the formation of new cadres. The quality of the articles in this Egyptological medley is a tribute to the honoree and an affirmation of the esteem of his peers, while the range of subjects and variety of themes addressed reflect the degree to which he has, in his own scholarship, undertaken to implement his ideal.
