**Panzer IV, Medium Tank** Dennis Oliver,2022-03-18 A fully illustrated guide to Germany's use of Panzer IV Tanks during the Normandy campaign, perfect for WWII buffs, modelers, and wargamers. When the Allied armies landed on the Normandy beaches on June 6, 1944, they met a reaction force anchored by 758 Pzkw IV tanks. The first models of these tanks had entered service in 1937 and the original design remained in use, continually up-gunned and up-armored, throughout the conflict. Drawing on official documentation and unit histories, Dennis Oliver investigates the formations that operated these deservedly famous vehicles and uses archive photos and extensively researched color illustrations to examine the markings, camouflage, and technical aspects of the Pzkw IV tanks that served on the Western Front during the critical summer of 1944. A key section of this book displays available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined, providing everything the modeler needs to recreate an accurate representation of these historic vehicles.

**Modelling the Late Panzerkampfwagen IV** Tom Cockle,Gary Edmundson,2012-02-20 The Panzerkampfwagen IV has often been referred to as the 'workhorse' of the German Army in World War II. This important weapon went through several upgrades and improvements during its lifetime and is the only German tank to have been produced continuously throughout the entire war. In his previous title, Modelling the Early Panzerkampfwagen IV, Tom Cockle covered the early production Panzer IV. This book will cover the later versions of the tank from those that were initially equipped with the 7.5cm KwK 40 L/43 to later versions which were mounted with the L/48 gun. Step-by-step photographs show how to model this tank across various scales and at various skill levels, making this book ideal for both beginners as well as advanced modellers interested in minuscule detail, scratch built extras and rare tank markings.

*Panther Medium Tank* Dennis Oliver,2021-04-28 This fully illustrated modeling guide offers in-depth information on the German Panther tanks battalions that fought Russia in 1944. In the summer of 1944, overwhelming Soviet offensives threatened to destroy the entire German army on the Eastern Front. As the Wehrmacht scrambled to hold its ground, the newly raised IV SS-Panzerkorps—with its battalions of Pzkw V Panther tanks—was critical to the defense. The Panthers were perhaps the most effective armored fighting vehicle produced by Germany during the Second World War. In this volume of the TankCraft series, Dennis Oliver uses archive photos and extensively researched color illustrations to examine the Panther battalions that fought to hold back the Soviet advance. A key section of his book displays available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined, providing everything the modeler needs to recreate an accurate representation of these historic tanks.

**Modelling the Early Panzerkampfwagen IV** Tom Cockle,2012-02-20 The Panzerkampfwagen IV has often been referred to as the 'workhorse' of the German Army in World War II. This important weapon went through several upgrades and improvements and was the only German tank to have been produced continuously throughout the entire war. This book specifically deals with the short-barrelled Panzer IV, built until February 1942, which saw service from the invasion of Poland, through the fall of Western

Europe and the campaigns of North Africa to the steppes of the Soviet Union. This book takes on a series of increasingly complex construction projects covering all the major Panzer IV types, including the rare multi-turreted Neubau-Panzerkampfwagen IV.

*German Medium Tank Panzerkampfwagen IV* Michal Kuchciak,2021-03-23 The Hungarian Army made serious efforts to build up an independent, national war industry, which was able to supply the Army with modern armaments and equipment during the war.

**Panzer IV** Kevin Hjermstad,2000

**Panzer IV** Thomas Anderson,2021-02-09 The Panzer IV programme was started in the very early days of German tank development in 1934. Due to the restrictions of the Treaty of Versailles the new type was 'disguised' as an escort vehicle) but this subterfuge was dropped in 1935 and the type became known as the Panzerkampfwagen (PzKpfw) IV. This new tank along with the PzKpfw II and PzKpfw III was used to equip the schnellen Truppen, the force that was to become the Panzerwaffe.

**Air Power at the Battlefront** Dr Ian Gooderson,2013-05-13 Ian Gooderson presents a study of close air support in World War II, with the analysis focusing on the use of tactical air power by British and American forces during the campaigns in Italy and northwestern Europe between 1943 and 1945.

Panther vs Sherman Steven J. Zaloga,2011-03-15 In this book Steven J Zaloga offers a fascinating comparison between the two most important tanks involved in the crucial fighting of 1944, the American Sherman and the German Panther. Placing the reader in the heart of this battle between quality and quantity Zaloga uses a compelling account of the ferocious fighting during the Battle of the Bulge to explain the successes and failures of each tank, highlighting the fact that a tank can only be as good as its crew, weighing up the impact of low morale, high cost and mediocre crew training on the Panther's superiority. With full-colour battlescenes, technical drawings, photographs, digital gunsight views, extracts from crew training manuals and real combat reports, this book brings the titanic battles between the Panther and Sherman to life.

*Armored Champion* Steven Zaloga,2015-05-15 Armor expert Zaloga enters the battle over the best tanks of World War II with this heavy-caliber blast of a book armed with more than forty years of research. • Provocative but fact-based rankings of the tanks that fought the Second World War • Breaks the war into eight periods and declares Tanker's Choice and Commander's Choice for each • Champions include the German Panzer IV and Tiger, Soviet T-34, American Pershing, and a few surprises • Compares tanks' firepower, armor protection, and mobility as well as dependability, affordability, tactics, training, and overall combat performance • Relies on extensive documentation from archives, government studies, and published sources—much of which has never been published in English before • Supported by dozens of charts and diagrams and hundreds of photos

**T-34/76 & T-34/85** Rodrigo Hernández Cabos,John Prigent,2001-06-27 The T-34/76 was a major step forward in tank design and its appearance on the battlefield during the German invasion of Russia shocked the Germans into developing new AFVs such as the Panzer V Panther. Produced in huge numbers, its later variant the T-34/85 would see extended postwar service with Communist-supplied countries around the world - such as the Arab countries, the North Korea, North Vietnam and China. With detailed step-by-step model photography, specially commissioned walkround photography, scale drawings and wartime shots, these books will provide all the details needed to model the main T-34 version - the Model 1943 - and its variants. There is a full roundup of the models available on the market, details of where you can see the real thing, a select bibliography, and survey of websites of interest.

**The American Industrial Complex** William C. Foster,1960

The Panzer IV Anthony Tucker-Jones,2017-04-30 This pictorial history of the infamous Nazi tank presents a full account—in words and photographs—of Hitler's most fearsome and versatile war machine. Throughout the Second World War, the Panzerkampfwagen Mk IV proved to be the one constant in Hitler's Panzerwaffe. It was the German equivalent of the American Sherman and the Soviet T-34. In this pictorial history, military expert Anthony Tucker-Jones provides a concise account of the Mk IV's design, development and performance in combat. The Mk IV served on every major front: in France, the Balkans, North Africa, the Soviet Union and, at the end of the war, in Germany itself. It was a key weapon in the blitzkrieg attacks and in the later desperate defense of the Reich. Using more than 150 rare wartime photographs, plus a selection of specially commissioned color images, Tucker-Jones illustrates how the initial design of the Mk IV was refined throughout the war to counter the design advances in Allied tanks and anti-tank guns. While the Mk IV was never produced in the same numbers as the leading Allied tanks, it was one of the most important armored vehicles of the Second World War.

Panzer III Michael Hayton,Dick Taylor,2017-02-15 When Hitler unleashed Operation Barbarossa against the Soviet Union in June 1941, the 23-tonne Panzer III was in the vanguard of the German assault. The German Panzer III tank (official designation Panzerkampfwagen III, Sd Kfz 141, abbreviated to PzKpfw III) saw widespread use during the Second World War campaigns in Poland, France, the Soviet Union and the Balkans, and in North Africa with the famous Afrika Korps. A small number were still in use in Normandy (1944), at Anzio (1943), in Norway and Finland and in Operation Market Garden (1944). Some 5,774 were built between 1937 and 1943. Although the Panzer III was conceived to operate alongside the infantry-supporting Panzer IV to fight other tanks and armoured fighting vehicles, the roles were reversed when the German Army came up against the formidable Soviet T-34 tank. A tank with a more powerful anti-tank gun was needed so the Panzer IV with its larger turret ring and long-barrelled 7.5cm KwK 40 gun was used in tank-versus-tank battles, with the Panzer III being redeployed in the infantry support role. Production of the Panzer III ended in 1943, although its dependable chassis provided hulls for the Sturmgeschütz III (StuG III) assault gun, one of the most successful of the war, until the end of the war. Centrepiece of the Haynes Panzer III Tank Manual is the Bovington Tank Museum's PzKpfw III Ausf L, which has been restored to running condition. This tank belonged to the same battalion as the museum's famous Tiger I (the 501st (Heavy) Panzer Abteilung) and is an early production Ausf L, modified for tropical service. It was shipped via Naples to Benghazi in Libya in July 1942 and was issued to the 8th Panzer Regiment, part of the 15th Panzer Division and probably fought in the Battle of Alam Halfa. It was subsequently captured by the British Army and shipped to the UK.The Tank Museum has restored the tank to running order, has repainted it in its original camouflage and markings and is currently replacing many of the ancillary tools and equipment that it carried.

Normandy 1944 Niklas Zetterling,2019-12-19 A revised and updated single-source reference book accurately detailing the German field forces employed in Normandy in

1944 and their losses. In this book, military historian Dr. Niklas Zetterling provides a sobering analysis of the subject matter and debunks a number of popular myths concerning the Normandy campaign—the effectiveness of Allied air power; the preferential treatment of Waffen-SS formations in comparison to their army counterparts; etc. He supports his text with exhaustive footnoting and provides an organizational chart for most of the formations covered in the book. Also included are numerous organizational diagrams, charts, tables, and graphs. “A valuable reference for anyone seriously interested in the battle for Normandy.” –The NYMAS Review
