**Tiger I** Dennis Oliver,2018-04-30 A fully illustrated guide to the German Tiger I tank and its operations in the field by the renowned expert on WWII armored vehicles. At Hitler's insistence, the first Tiger I tanks drove into action in Tunisia in December 1942. Despite their lack of reliability and the small number deployed, they quickly gained a fierce reputation. With its heavy armor and 88mm gun, the Tiger I outclassed all the Allied tanks then in service. Beyond their deployment in North Africa, they also operated in Sicily and Italy between 1943 and 1945. In his second volume in the TankCraft series on the Tiger, Dennis Oliver uses archive photos and extensively researched color illustrations to examine the Tiger tank and the German army units that first took them into combat. Perfect for model enthusiasts, Tiger I showcases available model kits and aftermarket products. It also includes a gallery of beautifully constructed and painted models in various scales. Technical details, as well as modifications introduced during production and in the field, are also examined providing everything the modeler needs to recreate an accurate representation of the tanks.

**Pz. Kpfw IV Family** Marek Jaszczolt,Jacek Pasieczny,2013-01-17 \*Illustrated color reference guide to the Pz.Kpfw. VI Tiger Tiger I is the common name of a German heavy tank developed in 1942 and used in World War II. The final official German designation was Panzerkampfwagen Tiger Ausf. E, often shortened to Tiger. It was an answer to the unexpectedly formidable Soviet armor encountered in the initial months of the Axis invasion of the Soviet Union, particularly the T-34 and the KV-1. The Tiger I design gave the Wehrmacht its first tank mounting the 88 mm gun, in its initial armored fighting vehicle-dedicated version, which in its Flak version had previously demonstrated its effectiveness against both air and ground targets. During the course of the war, the Tiger I saw combat on all German battlefronts. It was usually deployed in independent tank battalions, which proved to be quite formidable. While the Tiger I was feared by many of its opponents, it was over-engineered, used expensive and labor intensive materials and production methods, and was time-consuming to produce. Only 1,347 were built between August 1942 and August 1944. The Tiger was prone to certain types of track failures and immobilizations, and limited in range by its huge fuel consumption. It was, however, generally mechanically reliable but expensive to maintain. It was also complicated to transport, and vulnerable to immobilization when mud, ice and snow froze between its overlapping and interleaved road wheels in winter weather conditions, often jamming them solid. In 1944, production was phased out in favor of the Tiger II. A big decal sheet with 1:72, 1:48 and 1:35 individual and national markings for 16 Pz.Kpfw. VI Tiger tanks. The decal sheet was printed by Cartograf. Each painting scheme is depicted on beautifully drawn color profile and described in the guidebook with English and Polish text.

Tiger I, German Army Heavy Tank Dennis Oliver,2021-12-30 This illustrated guide examines the famous WWII German tank and its operations in the Eastern Front, with extensive resources for modeling enthusiasts. The Tiger I tank might have been a break-through—and even war-winning—weapon if Germany had produced it in sufficient numbers and introduced it earlier on the Eastern Front. Instead, the Tiger played a mainly defensive role as the Wehrmacht struggled to withstand the advances of the Red Army. In his third book on the Tiger in the TankCraft series, Dennis Oliver focuses on this fascinating period in the tank's short history. Oliver uses archive photos and extensively researched color illustrations to examine the tanks and units of the German army's heavy panzer battalions. A large part of the book showcases available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined providing everything the modeler needs to recreate an accurate representation of the Tigers of 1943.

Tiger I & Tiger II Tanks Dennis Oliver,2020-08-31 "Will be of great interest to modelers that plan to build a Tiger tank and to military historians alike." —AMPS Indianapolis By the first weeks of 1945, the Eastern Front had been pushed back to the Carpathian mountain passes in the south and Warsaw on the Vistula River in the center, while in the north, the German army was fighting in East Prussia. The Wehrmacht's armored and mobile formations were now employed exclusively as fire brigades, rushed from one crisis to the next as the Red Army pushed inexorably westward. Critical to the German defense were the army's heavy Panzer battalions, whose Tiger tanks, with their 8.8 cm guns, were almost invincible on the open plains of central Europe. In his latest book in the TankCraft series, Dennis Oliver uses archive photos and extensively researched color illustrations to examine the Tiger tanks and units of the German Army and Waffen-SS heavy Panzer battalions that struggled to resist the onslaught of Soviet armor during the last days of the conflict that culminated in the battle for Berlin. A key section of this book displays available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined, providing everything the modeler needs to create an accurate representation of these historic tanks.

**Modelling a Tiger I Gruppe Fehrman, Germany 1945** Darren Thompson,2012-04-20 Probably the most famous tank of World War II, the Tiger I was originally conceived in 1941 in response to the German Army's experience in fighting British tanks and anti-tank guns in Western Europe and the North African desert. Following the invasion of Russia, the appearance of the Soviet T-34 and KW tanks lent a further impetus to the programme and 1,350 Tigers were produced between August 1942 and August 1944. The Tiger has proved to be one of the most popular modelling subjects of all time, with a vast and ever-increasing range of kits, aftermarket products and references available. This title is a detailed modelling guide on the 'F05', Gruppe Fehrmann, Germany 1945 in 1/35 scale. This guide forms part of Osprey Modelling 37 Modelling the Tiger I also available as an ebook.

Tiger I and Tiger II Tanks Dennis Oliver,2019-02-28 An in-depth overview of these fearsome heavy tanks, including photos, illustrations, and modeling information. Tiger tanks were among the most-feared fighting vehicles of the Second World War. They gained almost legendary status—yet they never fulfilled their potential, because they were not produced in sufficient numbers and the tide of the war had turned against the German army by the time they were introduced. Often they were deployed in difficult circumstances and in defensive battles, struggling against the odds. Nowhere was this truer than in western Europe during the Allied advance across France and into Germany, and it is the Tigers of this phase of the war that Dennis Oliver portrays in his third volume on the Tiger in the TankCraft series. Using archive photos and extensively researched color illustrations, he examines the Tiger tanks and units of the German Army and Waffen-SS heavy panzer battalions that struggled to resist the onslaught of Allied armor and air attacks during the last days of the conflict. A key section of his book displays available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined, providing everything the modeler needs to recreate an accurate representation of these historic tanks.

*Panzerkampfwagen Tiger Ausf.B: Construction and Development* Alexander Volgin,2018-09-19

**Panzerkampfwagen VI Tiger** Slawomir Zajaczkowski,2019-09-19 The German heavy tank Panzerkampfwagen VI Tiger is a vehicle known even to laymen. It was heavily armored and armed with a deadly 88 mm gun. Despite their legend, the Tigers were plagued by several technical problems, especially with propulsion, which often did not allow them to fully use their combat potential. The main motivator for designing the Pz.Kpfw. VI was eager to install a Flak 36 anti-aircraft gun 36 caliber 88 in the turret. It was a weapon that could destroy Soviet tanks on long distances. In addition, it was necessary to build a tank able to withstand fire from the T-34/76 guns, which effectively eliminated the German medium tanks Pz.Kpfw. III and IV. A competition for a tank that fulfills these requirements was set, and in April 1942 the prototypes of Porsche and Henschel went for the final duel. After a series of tests, the tank developed by Henschel proved to be better. It received the designation Sd.Kfz. 181 Pz.Kpfw. VI Tiger Ausf. H1 and went into production at the plants in Kassel-Mittelfeld and Wegmann AG. The tank was plagued by many teething problems, and as a result, many subsequent construction changes were introduced in the course of production. Considering the periods of their implementation, it is possible to extract Tigers of early production series, vehicles after modification and vehicles of late production series.

**Swinging The Sledgehammer: The Combat Effectiveness Of German Heavy Tank Battalions In World War II** Major Christopher W. Wilbeck,2014-08-15 This thesis is a historical analysis of the combat effectiveness of the German schwere Panzer-Abteilung or Heavy Tank Battalions during World War II. During the course of World War II, the German Army developed heavy tank battalions to fulfill the concept of breaking through enemy defenses so faster, lighter mechanized forces could exploit the rupture. These heavy tank battalions had several different tables of organization, but were always centered around either the Tiger or the Tiger II tank. They fought in virtually every theater of Europe against every enemy of Germany. Ultimately, the German military created eleven Army and three Waffen-SS heavy tank battalions. Of the Army battalions, the German command fielded ten as independent battalions, which were allocated to Army Groups as needed. The German Army assigned the last heavy tank battalion as an organic unit of the elite Panzer Grenadier Division Grossdeutschland. The Waffen-SS allocated all of their battalions to a different Waffen-SS Corps. Because these units were not fielded until late in 1942, they did not participate in Germany's major offensive operations that dominated the early part of World War II. Germany's strategic situation after mid-1943 forced their military onto the defensive. Consequently, there are very few instances when heavy tank battalions attacked as a breakthrough force. During the latter part of the war, they were used in many different ways to provide defensive assistance along very wide frontages. This study assesses the German heavy tank battalions as generally effective, primarily because of the high kill ratio they achieved. However, based upon observations from a wide variety of examples, this study also outlines several areas where changes may have increased their effectiveness.

**Tiger Tanks at War** Michael Green,James D. Brown,2008-02-15 The first prototype for the Tiger tank was set to be ready for Hitler's birthday on April 20, 1942. The Henschel Company, competing with Porsche, produced the superior model, and by August of that year the formidable Tiger--or Panzerkampfwagen VI Tiger Ausf. H.--was in full production. This book takes us behind the scenes with the Tiger tank, reviewing the full history, the design and mechanics, and the mixed record of this machine, which was designed to outgun its Russian counterparts. Military writer Michael Green offers a close-up account--accompanied by photographs, diagrams, and maps--of how the Tiger tank operated, how it was armed, and where it succeeded brilliantly, as well as where it failed miserably. His book fills a fascinating niche in the history of military technology, and of the impact of technology on history itself.

[Air Power at the Battlefield](#) Dr Ian Gooderson,2013-05-13 Ian Gooderson presents a study of close air support in World War II, with the analysis focusing on the use of tactical air power by British and American forces during the campaigns in Italy and northwestern Europe between 1943 and 1945.

**Tiger I & Tiger II** Anthony Tucker-Jones,2013-07-17 A pictorial history and analysis of the infamous World War II German tanks. The German Tiger I and Tiger II (known to the Allies as the King Tiger or Royal Tiger) were the most famous and formidable heavy tanks of the Second World War. In their day, their awesome reputation inspired such apprehension among Allied soldiers that the weaknesses of these brilliant but flawed designs tended to be overlooked. Anthony Tucker-Jones, in this illustrated history, tells the story of their conception and development and reconsiders their operational history, and he dispels the myths that have grown up around them. The Tigers were over-engineered, required raw materials that were in short supply, and were time-consuming to manufacture and difficult to recover from the battlefield. Only around 1,300 of the Tiger I and fewer than 500 of the Tiger II were produced, so they were never going to make anything more than a local impact on the outcome of the fighting on the Western and Eastern fronts. Yet the myth of the Tigers, with their 88mm guns, thick armor, and brutal profiles, has grown over time to the extent that they are regarded as the deadliest tanks of the Second World War. Anthony Tucker-Jones's expert account of these remarkable fighting vehicles is accompanied by a series of color plates showing the main variants of the designs and the common ancillary equipment and unit markings. His book is an essential work of reference for enthusiasts.

**Kursk 1943** Anders Frankson,Niklas Zetterling,2016-12-05 The battle at Kursk in 1943 is often referred to as the greatest tank battle in the history of warfare. This volume makes extensive use of German archival documents as well as various Russian books and articles. As well as an account of the battle, it addresses methodological issues.

*Sledgehammers* Christopher W. Wilbeck,2004 Although much is available about Tiger tanks' technical details and some of the most famous soldiers and units that employed them, until now, there has been little concerning the organization and tactical use of heavy tank battalions across the theaters in which they were employed. [Wilbeck] provides an in-depth look at heavy tank battalions' organizations and tactics, including the tactical doctrine by which these elite units were supposed to fight and case studies to illustrate how they were actually employed on the battlefield--Page 4 of cover.

*Tigers in the Mud* Otto Carius,2020-02-01 WWII began with a metallic roar as the German Blitzkrieg raced across Europe, spearheaded by the most dreaded weapon of the 20th century: the Panzer. No German tank better represents that thundering power than the infamous Tiger, and Otto Carius was one of the most successful commanders to ever take a Tiger into battle, destroying well over 150 enemy tanks during his incredible career.

[Germany's Panther Tank](#) Thomas L. Jentz,1995 Over 20 years of research went into the creation of this history of the development, characteristics, and capabilities of the Panther.

*T-34 In Action* Artem Drabkin,Oleg Sheremet,2006-04-01 The Soviet T-34 medium tank was one of the most famous and effective fighting vehicles of the Second World War. Along with the German Tiger and the American Sherman, it was a milestone in tank design that changed the course of the conflict. Much has been written about the technical history of the tank and the vital part it played in the huge tank battles on the Eastern Front, but less has been said about the men who went to war in the T-34 and lived, fought and sometimes died in these remarkable machines. This pioneering book, which is based on extensive interviews with tank crews, records their experiences and offers a compelling inside view of armored warfare in the mid-twentieth century.

**Normandy 1944** Niklas Zetterling,2019-12-19 A revised and updated single-source reference book accurately detailing the German field forces employed in Normandy in 1944 and their losses.

In this book, military historian Dr. Niklas Zetterling provides a sobering analysis of the subject matter and debunks a number of popular myths concerning the Normandy campaign—the effectiveness of Allied air power; the preferential treatment of Waffen-SS formations in comparison to their army counterparts; etc. He supports his text with exhaustive footnoting and provides an organizational chart for most of the formations covered in the book. Also included are numerous organizational diagrams, charts, tables, and graphs. “A valuable reference for anyone seriously interested in the battle for Normandy.” —The NYMAS Review
