Republic P-47 Thunderbolt Tomasz Szlagor, Leszek Wieliczko, 2010-01-05 * Free 1:48 and 1:72 decals and masking foil The last, fourth part of a monograph on P-47 Thunderbolt discusses its combat use as fighter-bomber in Western Europe during the last few months of WW2. The air battles over Southern Europe in 1944-1945 are also thoroughly described. Another chapter is devoted to Thunderbolt's service in the RAF, the Free French AF, the Brazilian AF, the Mexican AF and the Chinese AF together with other foreign operators. The author uncovers the fates of particular fighter units as well as individual pilots who fought in them. The book includes technical data and lists of units operating the P-47. Free 1:48 and 1:72 decals for 3 schemes: P-47D-30-RA (s/n 44-33721) of Escuadron Aereo de Pelea 201, July 1945. P-47D-30-RE of the Columbian Air Force. P-47D-40-RA (s/n 45-49506) of Grupo de Aviacion 11, Chile. About the Series Monographs focuses on an individual type of aircraft. Each monograph contains descriptions of the aircraft's origin, its variants and combat history. Each volume includes several hundred archive photographs, technical scale drawings and color profile artwork. Each book also has free extras for modelers, with decals and masking foil.

Modelling the P-47 Thunderbolt Brett Green, 2012-04-20 The P-47 Thunderbolt, affectionately nicknamed the 'Jug', was one of the most famous fighter aircraft of World War II. Used as both a high-altitude escort fighter and a low-level fighter-bomber, it quickly gained a reputation for being tough and resilient. Many different air forces operated this plane, and it sported a wide range of camouflage schemes, finishes and markings, including stunning nose art. Modellers have been well served with Thunderbolt kits over the years, right up to the latest highly accurate releases. This book takes a step-by-step approach to modelling a wide variety of P-47 types in 1/48-scale, from 'Razorbacks' in USAAF colours to RAF T-bolts in the Far East. It provides expert advice on conversions (including a Bubbletop to a P-47M), adding aftermarket items, detailing, and ways to achieve top quality weathering and finishes.

Thunderbolt Roger Anthony Freeman, 1979 One of the most famous single-seat warplanes of World War II, built in larger numbers than any other American fighter, the Republic P-47 was the heaviest single-engine fighter to reach large-scale service.

Fighter Planes of World War II Nancy Robinson Masters, 1998 Introduces various kinds of fighter planes used by the Army Air Force and by the Navy and Marines during World War Two, their missions, and the weapons employed. Also includes information on the German and Japanese fighters used in World War 2.

Thunderbolt Roger Anthony Freeman, 1978

Republic P-47 Thunderbolt Maciej Noszczak, 2018-04-19 The P-47D was the most produced version of the Thunderbolt fighter. From overall number of 15 683 P-47s built the 12 609 of them were the version D. The first trial P-47D left the factory in September 1942. The first serial version of the P-47D was the D-1-RE variant, which can be easily distinguished from the P-47C by its additional blinds on lower part of the engine cowling. The important change was also the additional cockpit armor. The most important variant of the early P-47Ds was the P-47D-5

version. It received the installation which injected the water and methanol mixture to the R-2800-21 engine's cylinders. During the autumn of year 1943 another variant of the P-47D was developed - P-47D-10 with new R-2800-63 engine. In next version - P-47D-11 - the usage of the water & methanol mixture was automatic. The injection was triggered by the maximum push of the throttle lever. The plane also received the gun camera. In another version - P-47D-15 - the capacity of the front fuel tank was enlarged, so the maximum range of the P-47 increased too. The D-15 variant was equipped with two B-10 racks under the wings which allowed to make different configurations of the payload (bombs and fuel tanks). Another innovation was the detachable canopy in case of emergency. Also the shape of two lower blinds was modified. The P-47D-20 received the new engine - R-2800-59 - which had a different ignition system. The D-20 variant also received the higher tail wheel fork and redesigned racks under the wings. The most important change of the construction took place between spring and summer of the year 1944, when the production of the P-47D-22 and D-23 has started. The D-22 version built in Farmingdale factory received the Hamilton Standard Hydromatic 24E50-65 propeller with 4,01 m in diameter. The planes produced in Evansville (D-23) had Curtiss Electric C542S-A114 propeller with 3,96 m in diameter. The new propellers considerably improved the climbing rate of the P-47s.

Republic P-47 Thunderbolt Jerry Scutts,1998 The distinctive, rugged lines of this heavyweight single-seater earned it the nickname the jug. But what the Thunderbolt lacked in elegance, it more than made up for in firepower. Of the 15,683 Thunderbolts built, only 54 airframes are known to exist today. This book provides a generously illustrated and thoroughly researched tribute to the aircraft.

Republic P-47 Thunderbolt Mantelli - Brown - Kittel - Graf,2015-04-16 The Republic P-47 Thunderbolt, nicknamed Jug was an American fighter-bomber used during the Second World War. Because of its more than seven tons of weight and of considerable size, is considered the single-engine car largest and heaviest ever built before and during the conflict. It was equipped with an extremely powerful engine, 2,000 HP or more, and it was fast, especially at high altitudes. It was also heavily armed with eight 12.7 mm machine guns and its robustness allow him to return to base even if very damaged. Since the early months of 1943 was used intensively on all fronts, contributing significantly to consolidate the supremacy ally in the last two years of war. It was built at a total of 15,678 copies (at a cost of \$ 83,000 each of the time) with winning colors USAAF the remarkable total of 3,752 victories in combat against the loss of 824 machines and, after the war, he served in the air forces of fifteen countries, including Italy.

P-47 Thunderbolt with the USAAF Tomasz Szlagor,2013-03-19 A visual history of the P-47 Thunderbolt. Contains more than 120 black and white photographs - all accompanied by informative captions, 12 color photos, 8 pages of color profiles. Also includes bonus decals representing the unique markings of featured aircraft in 1/72, 1/48 and 1/32 scale.

Thunderbolts of the U.S. 8th Army Air Force Tomasz Szlagor,2011-05-01 The P-47 Thunderbolt, also known as the

Jug, was the largest, heaviest, and most expensive fighter aircraft in history to be powered by a single reciprocating engine. It was one of the main United States Army Air Forces fighters of World War II, and served with other Allied air forces. The P-47 was very effective in air combat but proved especially adept at ground attack. Richly illustrated with contemporary photographs and color profiles as well as maps, *Thunderbolts Of The U.S. 8th Army Air Force* describes the use of P-47 Thunderbolt fighters in many air operations over Europe between March 1944 and May 1945. About the Series Air Battles is a series of books focusing on World War II air battles of specific aircraft and units. Each volume contains information on the planes involved, lists of scores, pilot reports and portraits, color profile artwork and maps.

P47 Thunderbolt David Doyle, 2019-06-28 Among the iconic aircraft of World War II, the Republic P-47 Thunderbolt not only was physically the biggest single-engine fighter, it also had an enormous impact on history. In terms of its combat effectiveness, P-47 fliers destroyed 7,067 hostile aircraft, with about half of those kills recorded during aerial combat. Thunderbolt pilots reported destroying 6,000 enemy tanks, 68,000 trucks, 86,000 railway cars, and 9,000 locomotives. For a single-engine fighter, such a tally is definitely one for the history books. The history of this iconic aircraft is presented through carefully researched archival photos, as well as photographs of preserved examples, thereby illustrating not only the combat use of the Thunderbolt, but also the details of its design and construction. Large, clear photos, coupled with descriptive and informative captions, put the reader on the airfield and in the sky with this historic aircraft. Part of the Legends of Warfare series.

Republic's P-47 Thunderbolt Warren M. Bodie, 1994-08 REPUB P-47 TBOLTBODIE, W

Thunderbolt! Robert S. Johnson, 1999*

America's Hundred Thousand Francis H. Dean, 1997 *America's Hundred Thousand* covers in detail the eleven U.S. fighter aircraft types produced just before and during World War II - with a combined production total of just over 100,000 aircraft. Covered are the Army Lockheed P-38 Lightning, P-39 Airacobra, Curtiss P-40 Tomahawk/Kittyhawk/Warhawk, P-47 Thunderbolt, North American P-51 Mustang, Northrop P-61 Black Widow, and the Navy F2A - Buffalo, F4F - Wildcat, F4U - Corsair, and F6F - Hellcat fighters. The text is supplemented by more than 650 photographs, and 200 tables and graphs. Fighter production figures are also included. After an introduction of each type, a heavily illustrated overview of earlier inter-war production from 1920-on, along with a discussion and illustration of wartime experimental types, is provided. A lengthy section considering several technical factors affecting fighter performance follows. These include engine models, supercharger types, propellers, aerodynamic thrust, lift and drag, aircraft weight, balance, stability and control, and armament. *America's Hundred Thousand* also provides details of each U.S. World War II production fighter in terms of models and changes, numbers produced, and major engine and aircraft performance aspects - in tabular and graphical form - details of weights, discussion of handling qualities and general comments, along with detailed descriptions containing many illustrations of aircraft structures and systems showing the technology of that time. In addition a comprehensive week-to-week and month-to-month chronology of development and wartime combat operational life for

each fighter is provided, including many photos. This study concludes with comparisons of the eleven types in terms of program milestones, aircraft drag, power available at various altitudes, speed, climb, rolling and turning, acceleration, and diving performance, as well as general evaluations by World War II pilots.

P-47 Thunderbolt in Action Larry Davis,Don Greer,Kevin Wornkey,1984 Captioned photos, illustrations, and brief text describe the design, development, and uses of the American designed fighter plane.

Thunderbolt William N. Hess,Robert S. Johnson,1983-11-01 The highest scoring ace from the European Theater describes his view of the war.

P-47 Thunderbolt with the USAAF in the MTO, Asia and Pacific Tomasz Szlagor,2013 P-47 Thunderbolt's service outside western Europe, in three other major theaters of World War II - the Mediterranean, Asia and Pacific - although perhaps not as publicized, was no less colorful and varied, which makes it an excellent subject for a photo-story. During the long campaign in Italy, Thunderbolt was the best air interdiction aircraft the Allies had; pitted against German and Italian fighters, it proved more than a match. In the Pacific, Thunderbolt easily held its own against Japanese fighters over New Guinea, and later over Japan's Home Islands. Armed with 'fire bombs', bazookas and other ordnance, it earned distinction as close air support aircraft during the invasion of Marianas. Also in China-Burma-India theater the P-47 excelled both as fighter and fighter-bomber, with the renowned Air Commandos, among other units.
