Modelling a Sturmgeschütz III Sturmgeschütz IIIG early version (December 1942 production) Gary Edmundson,2012-06-20 The Sturmgeschütz III proved to be one of the more significant German AFVs of World War II, with over 9,000 being produced up until April 1945. Originally designed in the late 1930s as a self-propelled infantry support gun, its role became more diverse throughout the war and it served as a tank hunter and in front-line Panzer companies. This title provides a detailed, step-by-step guide to modelling a 1/35-scale StuG III. It also provides a comprehensive list of available aftermarket products and kits of all scales. Key aspects such as finishing techniques, including painting and displaying your model are also covered. This guide forms part of Osprey Modelling 22 Modelling the Sturmgeschütz III ebook.

Modelling US World War II Armoured Fighting Vehicles Tom Cole,2022-03-21 Aimed at military model makers and wargamers who are interested in the armoured fighting vehicles of the United States as used throughout World War II, this book follows on from *Modelling British World War II Armoured Vehicles* by the same author. The book places its emphasis on US Army and US Marine Corps AFVs modelled mainly in 1/72 and 1/48 scales, in a deliberate departure from the more popular 1/35 scale, to encourage and inspire model makers who are new to or less familiar with these scales. Illustrated with over 270 colour photos this book features every major US AFV used in World War II, with many models shown in various stages of construction and paintings. It presents step-by-step guides demonstrating the painting techniques appropriate for different scales and includes an additional section showing how to paint wargames models. There is also a review of how the USA developed tanks and other armoured vehicles from the interwar period through to the end of World War II. This fascinating story will help model makers and wargamers give the vehicles they build an historical context.

Axis Armoured Fighting Vehicles of the Second World War Michael Green,2018-03-30 During the Second World War the Axis powers, most prolifically the Germans, deployed a vast array of armored fighting vehicles to support their tanks and infantry. These included tank destroyers, reconnaissance vehicles, flame-thrower vehicles, and self-propelled artillery pieces. Armored tank destroyers, such as the Marder series, the Nashorn, Jagdpanther, Jagdtiger and the turretless German Stu III series (based on the Panzer III medium tank), helped the Nazis overcome their shortage of tanks. Copying the Stu III series the Italians created the turretless Semovente da 75/18 assault gun and the Hungarians the turretless Zrinyi. In the role of self-propelled artillery the German fielded the Hummel, the Wespe and the Grille while the Brummbär and the Sturmtiger performed in the dedicated assault gun role. For armored reconnaissance German industry came up with a series of capable armored cars; examples were the eight-wheel Puma and the full-tracked Luchs reconnaissance tank. The Italians developed the impressive four-wheel Autoblinda armored cars. Specialized anti-aircraft tanks such as the Möbelwagen, Wirbelwind and the Ostwind gave some protection against the ever more powerful Allied air forces. This fine book covers all these variants and many more besides in words and rare images and will delight readers, collectors, model-makers and war-gamers.

Panzer III-German Army Light Tank Dennis Oliver,2020-08-31 "Concentrates on the Panzer III as operated during the invasion of the Soviet Union . . . a mixture of history, camouflage and models . . . well done."
—ModelingMadness.com The PzKpfw III tank was the mainstay of the Panzer divisions during the Blitzkrieg era, which could fairly be said to have ended with the Germans' failure to take Moscow in the winter of 1941. Although less heavily armored than many of its opponents and somewhat outgunned by the latest Soviet types, the PzKpfw III was at the forefront of the advances made over almost impossible distances during the summer and autumn and provided the core of the armored reserve that fought the defensive battles of the winter months. In Dennis Oliver's latest

volume in the TankCraft series he uses archive photos and extensively researched color illustrations to examine the PzKpfw III and the units that operated this deservedly famous armored vehicle along a 1,000-mile front during the battles of Operation Barbarossa, the German invasion of the Soviet Union. A key section of his book displays available model kits and after-market products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined, providing everything the modeler needs to recreate an accurate representation of these historic tanks. "This book will prove invaluable for model makers and military historians interested in this often overlooked but important AFV. This is another great addition to the TankCraft series and is highly recommended to all." –Miniature Armoured Fighting Vehicles Association

STUG III Sturmgeschütz III Ausführung A to G (SdKfz 142) Enthusiasts' Manual Mark Healy, 2019-12-17 The German Sturmgeschütz series of assault guns was a successful and cost-effective range of armoured fighting vehicles; of which some 10,000 were built during the Second World War. Based on the chassis of the Panzer III tank; the turret was replaced by an armoured fixed superstructure fitted with a more powerful 7.5cm StuK 40 L/48 gun. Originally intended as a mobile assault weapon for infantry support; the StuG was constantly modified and saw extensive use on all battlefronts as an assault gun and tank destroyer. Its fixed superstructure with limited-traverse mounting for the main armament was simpler and cheaper to build than the turret of the battle tank; plus its low height meant it was easy to camouflage and conceal. Towards the end of the war; more StuGs were built than tanks. StuGs also saw combat when used by several Axis allies; notably Romania and Finland. They were also exported to Bulgaria, Hungary, Italy, and Spain. The Soviet Union gave some of their captured German vehicles to Syria in the 1950s, which continued to use them up until the War over Water against Israel in the mid-1960s. By the time of the Arab-Israeli Six-Day War in 1967; all of them had been either destroyed, stripped for spare parts, or placed on the Golan Heights as static pillboxes.

Modelling the Sturmgeschütz III Gary Edmundson, 2006-09-26 The concept of the Sturmgeschütz III started well before the war when the German army announced the need for a self-propelled 75mm gun to be used for infantry support. By 1938, several '0-Serie' prototype vehicles were produced on earlier style Panzer IIIB chassis by Daimler-Benz. The manufacture of the first 30 production vehicles (StuG III Ausf. A) that went into combat in the invasion of France were made at the Alkett factory in Berlin. As the war progressed, the StuG III was continuously improved with variants A through E, and then given a longer, more powerful gun starting with the Ausf. F. The role of the AFV became more diverse, and duties as a tank hunter increased. Some StuG III were allotted to Panzer companies to supplement their losses. Significant changes to the hull were made with the introduction of the Ausf. G, with the later variant of the G being produced right up until April of 1945. The StuG III chassis was also used to house the 10.5 cm Sturmhaubitze 42 L/28 howitzer, of which over 1,200 were produced by Alkett. With the low silhouette and strongly armoured hull, the StuG III proved to be one of the more significant weapons of the German forces of World War II. The book details the construction of four models in 1/35 scale, and includes a gallery

feature covering all variants of the StuG III. Aftermarket products are added to the basic kits to produce accurate replicas. References are extensive on this particular vehicle, and are clearly presented as each correction or enhancement to the kits is explained.

World War Two Armoured Fighting Vehicles George Forty, 1995-05-01 The Armoured Fighting Vehicle (AFV) played a major role in World War II. The artillery found it necessary to mechanise some of its field pieces. Armoured cars were called upon to carry out tasks in addition to reconnaissance. Tank destroyers were designed to seek, and destroy enemy armour. Add to this fascinating array such oddities as speedy oversnow Aerosans (armoured, fast sledges) deployed by the Red Army, to enormous siege guns weighing over 100 tons, to small remotely controlled and tracked demolition vehicles, only six feet in length, to the massive and powerfully equipped armoured trains deployed by the Soviet Union and Germany.

Stug III and Stug IV Dennis Oliver, 2019-06 In the last years of the Second World War the Sturmgeschütz III (StuG III) and Sturmgeschütz IV (StuG IV) played a vital role as assault guns during the German army's struggle to block the Allied advance on the Western Front. As the Wehrmacht's tank forces declined, these armored vehicles were thrown into every defensive operation. They are not as well known as the Tigers and Panthers, but German resistance would have been much weaker without them. They were also among the most frequently encountered German armored vehicles on the battlefields, which is why they are such a fascinating subject for Dennis Oliver in this volume in the TankCraft series. He uses archive photos and extensively researched color illustrations to examine the StuG III and StuG IV deployed by the German army and the Waffen-SS during these doomed campaigns. A key section of his book displays available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined providing everything the modeler needs to recreate an accurate representation of these historic armored vehicles.

Sturmgeschütz III Peter Müller, 2010-01-19 The first volume of Assault Gun III - Backbone of the German Infantry puts the weapon into its historical context and provides information about the production and use of the Sturmgeschütz III in combat. Volume II provides information for identification of variants and their production months. Both volumes together will give the readers a full survey of the technical development of the Assault Guns and Assault Howitzers. This second volume of Assault Gun III - Backbone of the German Infantry enables readers - to identify the date of photographs, - to restore vehicles to factory conditions - to build exact models. The necessary information is broken down into 90 identifiable characteristics - all illustrated by photographs and presented in an easy approach. The usual troop modifications are discussed as well. Additionally, there are many photographs of all variants, placed in chronological order as accepted by the Armament Office: 4-sided drawings in modeler scale 1:35 of all variants, Ausf G shown in four steps, fact tables and photographs. The drawings may be acquired in other scales via History Facts. The book supplement, a poster of 135 x 75 cm, presents all 90

characteristics in a tabulated overview. The documentation contains about 550 photographs, some of them previously unpublished, and about 100 drawings, most of them in modeler scale 1:35.

Tigers in Combat Vol 1 Wolfgang SCHNEIDER,2020-05 -Scores of unique photos of Tiger tanks -Intricate and richly colored drawings, with special focus on markings and insignia -Accompanying text lists units' combat strengths, equipment, commanders, and engagements By the end of World War II, the dreaded Tiger tank had achieved mythical, almost mystical status. In this much-sought-after volume on the Wehrmacht's numbered Tiger units, Wolfgang Schneider tells--in pictures--the story of these renowned tanks. Hundreds of photos depict Tigers in all situations and terrain, and a section of painstakingly detailed drawings brings the tanks to life in the metallic grays, snow whites, desert tans, and forest greens and browns that colored them. Modelers and buffs alike will delight in this impressive collection.

Tigers in Combat Wolfgang Schneider,2020-09-01 • Hundreds of photos--many of them rare--of Tiger tanks and their crews • Color illustrations by Jean Restayn focus on markings, camouflage, and insignia • Inventories and timelines for each unit In this follow-up to *Tigers in Combat I* (0-8117-3171-5), Wolfgang Schneider turns his attention to the Tiger tanks of the Waffen-SS and the Wehrmacht's named units, such as the Großdeutschland Division, Company Hummel, and Tiger Group Meyer. Based on combat diaries, the text tells the history of each unit, but most of the book is devoted to photos of the tanks and the men who manned them. It offers as unique and comprehensive a look at these lethal machines as is possible decades after World War II.

Secret Wartime Britain Colin Philpott,2018-11-30 The secret military facilities hidden across Great Britain are revealed and investigated in this fascinating WWII history. During the Second World War, thousands of facilities across Britain were requisitioned to support the war efforts. Beyond that, countless others were built from scratch. Often the purpose of these locations was a closely guarded secret, even from those living close by. In *Secret Wartime Britain*, Colin Philpott has compiled a fascinating collection of sites that still exist in some form today. They include underground factories, storage sites and headquarters; spy and communication centers; interrogation and POW camps; dummy sites; research facilities such as the sinister Porton Down; treasure stores in stately homes and even royal retreats in the event of invasion, such as Madresfield Court. Where were these sites and why were they needed? How successfully were they kept secret? What has happened to them since? Were they returned to their owners? Answers to these and other questions make *Secret Wartime Britain* a riveting and revealing read.
