Japanese Tanks 1939-45 Steven J. Zaloga, 2011-12-20 The Japanese Army used tanks to great effect in the build-up to World War II. Inspired by European designs, in the 1920s and 1930s an innovative Japanese tank program facilitated their campaigns in China prior to the Pacific War. During the ensuing war against the Allies tanks were deployed imaginatively in jungle terrain previously thought impassable by such vehicles, being integral in Malaya and the capture of Singapore. Steven J Zaloga uses detailed and colorful artwork and photographs to explore these designs, explaining their neglect in favor of the naval priorities that left Japanese tanks outmoded by Western designs.

M4 Sherman vs Type 97 Chi-Ha Steven J. Zaloga, 2012-05-20 Although US and Japanese tank forces first clashed in 1941, it was on in 1944 that tank-vs-tank action became more common as both sides poured larger numbers of tanks into the combat zone. These battles were a means of demonstrating each side's latest tank technology. For the US, the pinnacle of their tank machinery came in the form of the M4 Sherman and for the Japanese, their most notable feat of engineering was the smaller, yet still effective Type 97 Chi-Ha. The last two campaigns of the war - Iwo Jima and Okinawa - saw tanks used by both sides, the Japanese finally concluding that "the fight against the US Army is a fight against his M4 tanks". The illustrations follow the usual Duel pattern with profile illustrations of the Type 97-kai Shinhoto Chi-ha and the M4A3, views showing the ammunition of both types, interior illustrations showing the turret layout in both types, and a battlescene showing the Type 97-kai in combat against US armour.

World War II Japanese Tank Tactics Gordon L.

Rottman, Akira Takizawa, 2011-03-15 In this book, expert author and tactician Gordon L Rottman provides the first English-language study of Japanese Army and Navy tank units, their tactics and how they were deployed in action. The Japanese army made extensive use of its tanks in the campaigns in China in the 1930s, and it was in these early successes that the Japanese began to develop their own unique style of tank tactics. From the steam-rolling success of the Japanese as they invaded Manchuria until the eventual Japanese defeat, Rottman provides a battle history of the Japanese tank units as they faced the Chinese, the Russians, the British and the Americans.

Japanese Tanks and Armoured Warfare 1932-1945 David

McCormack , 2021-03-13 The popular image of the Japanese tanks which faced the markedly superior tanks fielded by the Allies during the Second World War is one of poorly armed and armoured Lilliputian tin cans which failed to make any impression upon the battlefield. In this absorbing new history, David McCormack looks beyond widely held and unchallenged misconceptions to create a new narrative in which Japan's rightful place as a leading innovator in tank design and doctrine is restored. Why did Japan produce tanks in such limited numbers? What contribution did Japanese tanks make to the war effort? Why did it take Japan so long to develop heavier tanks capable of meeting the Allies on more equal terms? Drawing from primary and secondary sources, the author's meticulous research provides the reader with an objective appraisal of both the successes and failures of the Empire of the Sun's tank forces.

Where Heroes Trained Roger M. Baty, Eddie L. Maddox, 2004
Where Heroes Trained deals with a secretive and highly unusual Army project in World War II. Not a Manhattan Project, but taken nearly as seriously, this was a most interesting sidelight of armored warfare. Caught up in the project were many unwitting GIs who found themselves whisked off to mysterious training bases, introduced to the most powerful tank in the American arsenal, and drilled in one of the war's most imaginative battle tactics. This is oral history as it ought to be done: a truly unusual project with lots of photos, maps and illustrations and best of all interviews that have been well edited. Baty and Maddox make even the most commonplace memories of home and camp into absorbing reading. The result is a fascinating look at ordinary American GIs caught up in a strange environment, enmeshed in events they barely understand, and determined to carry it through. Best of all, this is no BS -Ray Puffer, Historian, Edwards AFB

Tanks on Iwo Jima 1945 Romain Cansière, 2024-06-20 An award-winning US Marine Corps armor historian's account of the role of US and Japanese tanks on Iwo Jima. The battle of Iwo Jima is iconic and known for its brutality: this was the only battle in which the number of US casualties outnumbered those of the Japanese. But as is often the case with the Pacific campaigns, the tank action on the island has generally been overshadowed by that of infantry. The tank, however, played an important role as a support weapon - especially on the US side - despite the rough terrain and unconventional enemy tactics. Using unpublished official records and veterans' accounts, award-winning USMC armor specialist Romain Cansière sheds new light on Japanese and USMC armored operations on the island. This book offers new information on the battle in a complete, concise, and accessible format, and its illustrations include unpublished photographs from private collections and meticulously researched new color profiles, highlighting the tanks' modifications and their

diverse camouflage and markings.

The Pacific Theater Daniel Siskind, 2016-11-24 Instructions to build some of the most iconic fighting machines from World War II in the Pacific, using LEGO® (or compatible) building bricks. Models covered include the M4 Sherman Tank, M2A4 Stuart Tank, LVT-4 (Landing Vehicle, Tracked), P-40 Warhawk, A6M Zero, Type 97 Medium Tank, Type 95 Light Tank and more. M3 Lee Grant David Doyle, 2020-08-05 This volume is the most detailed study yet presented of the M3 Lee/Grant tanks, illustrating and describing the development, production, and use of these iconic vehicles by US, Commonwealth, and Russian forces during WWII. The tanks, their power plants, and production techniques used by each manufacturer are shown from assembly line to front line through this profusely illustrated book, including numerous never before published vintage photos.

It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. -

Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Combat at Close Quarters Edward J. Marolda,R. Blake Dunnavent,Naval History & Heritage Command (U S),Navy Dept (U S),2015 This work describes riverine combat during the Vietnam War, emphasizing the operations of the U.S. Navy's River Patrol Force, which conducted Operation Game Warden; the U.S. Army-Navy Mobile Riverine Force, the formation that General William Westmoreland said "saved the Mekong Delta" during the Tet Offensive of 1968; and the Vietnam Navy. An important section details the SEALORDS combined campaign, a determined effort by U.S. Navy, South Vietnamese Navy, and allied ground forces to cut enemy supply lines from Cambodia and disrupt operations at base areas deep in the delta. The author also covers details on the combat vessels, helicopters, weapons, and equipment employed in the Mekong Delta as well as the Vietnamese combatants (on both sides) and American troops who fought to secure Vietnam's waterways. Special features focus on the ubiquitous river patrol boats (PBRs) and the Swift boats (PCFs), river warfare training, Vice Admiral Elmo R. Zumwalt Jr., the Black Ponies aircraft squadron, and Navy SEALs. This publication may be of interest to history scholars, veterans, students in advanced placement history classes, and military enthusiasts given the continuing impact of riverine warfare on U.S. naval and military operations in the 21st century.
