Jane's World War II Tanks and Fighting Vehicles

Leland S. Ness, 2002 This is the land equivalent of Jane's Battleships, a comprehensive encyclopaedia of all the combat vehicles of World War II from Somaliland to Japan. A nation-by-nation overview of each country's development of tanks and their involvement in World War II is before providing an A-Z of each army's tanks and fighting vehicles including armoured cars, personnel carriers, amphibious craft and mortar carriers. Quirlier profiles of vehicles such as the German TKS tankette are given.

M4 Sherman vs Type 97 Chi-Ha Steven J.

Zaloga, 2012-05-22 While the Pacific campaign is not well known as a theater for tank combat, the US Army deployed nearly a third of its tank battalions to the Pacific, and Japan was among the top five tank manufacturers during the war. The obscurity of Pacific tank battles largely hinged on the tactics used in the Pacific theater due to terrain. Tanks were generally used as infantry support weapons, and the terrain precluded the use of tanks in maneuver warfare that might have led to large scale tank-vs.-tank battles. This book begins by surveying the early tank battles in the Pacific between US and Japanese forces, starting with the first encounters in the Philippines in 1941 between US M3 Stuart light tanks and Japanese Type 95 tanks. Tank-vs.-tank action became more common in 1944 as both sides poured larger numbers of tanks into the combat zone. The largest Japanese tank attack of war took place in July 1944 on Saipan, but there were frequent tank encounters in the ensuing months on Guam, and Peleliu. The Philippines saw the largest Japanese tank deployment of the war, with the Japanese sending a tank division to Luzon in 1944. This led to extensive clashes with US army forces, sometimes pitting tank vs. tank, but often a mixture of tanks, infantry

anti-tank weapons, and even self-propelled guns. The last two campaigns of the war on Iwo Jima and Okinawa saw tank use on the part of both sides, the Japanese finally concluding that the fight against the US Army is a fight against his M4 tanks. This book will take a look at the two best tanks of the Pacific campaign. On the American side, the M4A3 Sherman medium tank was used by both the US Army and US Marine Corps. On the Japanese side, the Type 97-kai Shinhoto Chi-Ha was the best tank to see combat. This was a very uneven contest, which is the main reason that in 1944 on Luzon, the Japanese were so reluctant to deploy the Chi-ha against the Sherman and preferred to use them as dug-in pillboxes. The book illustrations will follow the usual Duel pattern with profile illustrations of the Type 97-kai Shinhoto Chi-ha and M4A3, views showing the ammunition of both types, interior illustrations showing the turret layout in both types, and a Battlescene showing the Type 97-kai in combat against US armor.

The Imperial Japanese Navy in the Pacific War

Mark Stille, 2014-11-20 An highly illustrated examination of the key ships, tactics and operations of the Imperial Japanese Navy in the War in the Pacific in World War II. The Imperial Japanese Navy (IJN) was the third most powerful navy in the world at the start of World War II, and came to dominate the Pacific in the early months of the war. This was a remarkable turnaround for a navy that only began to modernize in 1868, although defeats inflicted on the Russians and Chinese in successive wars at the turn of the century gave a sense of the threat the IJN was to pose. Bringing together for the first time material previously published in Osprey series books, and with the addition of new writing making use of the most recent research, this book details the Japanese ships which fought in the Pacific

and examines the principles on which they were designed, how they were armed, when and where they were deployed and how effective they were in battle. The Imperial Japanese Navy in the Pacific War provides a history of the IJN's deployment and engagements, analysis of the evolution of strategy and tactics, and finally addresses the question of whether it truly was a modern navy, fully prepared for the rigors of combat in the Pacific. Illustrated throughout with photographs and detailed colour artworks, this is a valuable reference source for Pacific War enthusiasts and historians alike.

Dirty Little Secrets of World War II James F.

Dunnigan, 1996-03-14 Dirty Little Secrets of World War II exposes the dark, irreverent, misunderstood, and often tragicomic aspects of military operations during World War II, many of them virtually unknown even to military buffs. Like its successful predecessor, Dirty Little Secrets, Dunnigan and Nofi's new book vividly brings to life all theaters and participants of the war. Revelations include: - The real death count for the war, and why it has never been previously released. - The new age general who refused to smoke or drink, who lived on a vitamin-enriched diet, who opposed animal experimentation, and who regularly consulted his astrologer. - How equipment developed for the war led to such modern high-tech innovations as smart bombs, electronic warfare, and nuclear missiles. - The lackadaisical relationship between Germany and Japan throughout the war. - Tricky bits of information about the lingering effects of the war -- like the thousands of live shells and mines that are still buried in Europe and off the East Coast of America.

The Great Tank Scandal: British armour in the Second World War David Fletcher,1989

The Imperial Arm Beth Mikell,2015-04-21 Darrius of Blackstone, emissary to King Henry III, is sent to northern England to snuff out an enemy of the crown. Everything spirals out of control when the scales of justice tip and the controlled warrior unleashes his heart upon a woman suffering from neglect. He knows the risks, but he needs her light in his dark world. Abused by her power-greedy father all her life, Lady Brenna of Carthmore despises her pawn like status and the arranged marriage hanging over her head. Yet her new husband confounds her at every turn. She stumbles upon his secret, tipping the scale of the heart until betrayal vilifies a new day. The Imperial Arm and his Elite are confronted by all sides of misery and everyone must reveal their deepest soul before blood runs.

Hirohito's War Francis Pike,2016-09-08 Named one of Foreign Affairs' Best Books of 2016 In his magisterial 1,208 page narrative of the Pacific War, Francis Pike's Hirohito's War offers an original interpretation, balancing the existing Western-centric view with attention to the Japanese perspective on the conflict. As well as giving a 'blow-by-blow' account of campaigns and battles, Francis Pike offers many challenges to the standard interpretations with regards to the causes of the war; Emperor Hirohito's war guilt; the inevitability of US Victory; the abilities of General MacArthur and Admiral Yamamoto; the role of China, Great Britain and Australia; military and naval technology; and the need for the fire-bombing of Japan and the eventual use of the atom bomb on Hiroshima and Nagasaki. Hirohito's War is accompanied by additional online resources, including more details on logistics, economics, POWs, submarines and kamikaze, as well as a

1930-1945 timeline and over 200 maps.

Tiger Tank David Fletcher, David Willey, 2020-02-18 The German Tiger I was the most feared battle tank of the Second World War. Its invincibility lay in its main 8.8cm gun and heavy defensive armour. Tiger Tank gives a rare insight into acquiring, owning and operating one of these awesome fighting machines, using the UK's Tank Museum's Tiger 131 - the only Tiger I in the world that has been restored to full running order. In addition to offering unique insights into maintenance and driving the Tiger, the book includes vivid personal recollections from wartime German tank crewmen and reveals what it was like to operate this 57-ton giant in combat. It was written by a team of experts from the Tank Museum who were closely involved with the strip-down and rebuild of the Tiger I. David Fletcher is a historian, a prolific author and a world expert on tanks. David Willey is a curator, and Mike Hayton is workshop manager. Other members of the writing team include volunteers Darren Hayton and Steven Vase, Mike Gibb of the SdKfz Military Vehicle Foundation and David Schofield, a specialist in forensic science.

Sledgehammers Christopher W. Wilbeck, 2004 Although much is available about Tiger tanks' technical details and some of the most famous soldiers and units that employed them, until now, there has been little concerning the organization and tactical use of heavy tank battalions across the theaters in which they were employed. [Wilbeck] provides an in-depth look at heavy tank battalions' organizations and tactics, including the tactical doctrine by which these elite units were supposed to fight and case studies to illustrate how they were actually employed on the battlefield--Page 4 of cover.

Another River, Another Town John P. Irwin, 2013-03-27 Many narrative accounts of men in

combat during World War II have conveyed the horrors and emotions of warfare. However, not many reveal in such an intimate way the struggle of innocent youth to adapt to the primitive code of "kill or be killed," to transform from lads into combat soldiers. *Another River, Another Town* is the story of John P. Irwin, a teenage tank gunner whose idealistic desire to achieve heroism is shattered by the incredibly different view of life the world of combat demands. He comes to the realization that the realm of warfare has almost nothing in common with the civilian life from which he has come. The interminable fighting, dirt, fatigue, and hunger make the war seem endless. In addition to the killing and destruction on the battlefield, Irwin and his crew are caught up in the unbelievable depravity they encounter at Nordhausen Camp, where slave laborers are compelled to work themselves to death manufacturing the infamous V-rockets that have been causing so much destruction in London, and that are expected one day to devastate Washington, D.C. At the end of the war, the sense of victory is, for these men, overshadowed by the intense joy and relief they experience in knowing that the fighting is at last over.

The Rolls-Royce Armoured Car David

Fletcher, 2012-04-20 The first Rolls-Royce armoured car was a privately owned vehicle fitted with a machine-gun and a limited amount of armour plate, used by the Royal Naval Air Service in Flanders in 1914. By 1915, nearly 100 had been built and turned over to the Army. From then on, as Sir Albert Stern said 'They searched the world for war', operating as far apart as the northwest frontier of India, the Middle East and southern Africa. The cars were fast, quiet and reliable but above all powerful. 'A Rolls in the desert is above rubies,' said Lawrence of Arabia. After World War I, the War Office continued to produce the

Rolls-Royce while tinkering with the design. These further cars served all across the Empire, including in Ireland and even later Shanghai, returning for a final brief appearance in the early stages of World War II. This book tells the complete story of the Rolls-Royce Armoured Car, following its design and development as it fought from theatre to theatre during World War I and the turbulent inter-war years.

Ivan's War Catherine Merridale, 2007-01-23 A powerful, groundbreaking narrative of the ordinary Russian soldier's experience of the worst war in history, based on newly revealed sources Of the thirty million who fought in the eastern front of World War II, eight million died, driven forward in suicidal charges, shattered by German shells and tanks. They were the men and women of the Red Army, a ragtag mass of soldiers who confronted Europe's most lethal fighting force and by 1945 had defeated it. Sixty years have passed since their epic triumph, but the heart and mind of Ivan -- as the ordinary Russian soldier was called -- remain a mystery. We know something about how the soldiers died, but nearly nothing about how they lived, how they saw the world, or why they fought. Drawing on previously closed military and secret police archives, interviews with veterans, and private letters and diaries, Catherine Merridale presents the first comprehensive history of the Soviet Union Army rank and file. She follows the soldiers from the shock of the German invasion to their costly triumph in Stalingrad, where life expectancy was often a mere twenty-four hours. Through the soldiers' eyes, we witness their victorious arrival in Berlin, where their rage and suffering exact an awful toll, and accompany them as they return home full of hope, only to be denied the new life they had been fighting to secure. A tour de force of original research and a gripping history,

Ivan's War reveals the singular mixture of courage, patriotism, anger, and fear that made it possible for these underfed, badly led troops to defeat the Nazi army. In the process Merridale restores to history the invisible millions who sacrificed the most to win the war.

My Hitch in Hell Lester I. Tenney, 2018-10-01
Captured by the Japanese after the fall of Bataan, Lester I. Tenney was one of the very few who would survive the legendary Death March and three and a half years in Japanese prison camps. With an understanding of human nature, a sense of humor, sharp thinking, and fierce determination, Tenney endured the rest of the war as a slave laborer in Japanese prison camps. *My Hitch in Hell* is an inspiring survivor's epic about the triumph of human will despite unimaginable suffering.
