**Building the P-51 Mustang** Michael O'Leary, 2011-12 The P-51 Mustang holds a fascination unlike any other World War II aircraft, and countless books have been written about nearly every aspect of the Mustang's colorful history. However, the story of manufacturing the airplane itself is usually contained only in the opening chapters of these books. Now, for the first time, here is a major work devoted strictly to telling the story of how this legendary airplane was designed and built using rare original factory photographs, documents, and unique engineering information. The author uses 397 original photos culled from his personal archive of official North American and USAAF images, many of which have never before been seen in any publication whatsoever. This paperback book will provide a vital missing link in the saga of this famed World War II aircraft, and is sure to become a valued addition to the libraries of P-51 modelers, historians, enthusiasts, and pilots in both the United States and England.

**Marshal of Victory** Georgy Zhukov, 2014-01-13 The complete and unredacted autobiography by Stalin's star general, chronicling his many campaigns throughout WWII. At Moscow, Leningrad, Stalingrad, Kursk and Berlin—as well as virtually all the principal battles on the Eastern Front during the Second World War—Georgy Zhukov played a major role. He was Stalin's pre-eminent general throughout the conflict, and he chronicled his brilliant career as he saw it in this essential text. Here, Zhukov reveals intriguing insights into who he was, both as a man and as a commander. He also delves into the military thinking and decision-making at the highest level of the Soviet command—making this volume essential reading for anyone studying the conflict in the east. This edition of the memoirs, which were first published in heavily censored form, features an introduction by Professor Geoffrey Roberts in which he summarizes the additional material omitted from previous editions. He also provides, in an appendix, a translation of Zhukov's account of the 1953-7 period as well as an interview with Zhukov that has previously not been available in English.

**Twelve Years a Slave** Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C., where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C.

and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

**Impact and Explosion** M. Y. H. Bangash, 1993-07-15 Impact and Explosion: Structural Analysis and Design presents a comprehensive study of the structural dynamics of impact and explosion by providing a survey of types of aircraft, missiles, bombs, and detonators. Impact dynamics, including empirical models developed for different materials, water surfaces, and soil/rock mediums, is discussed. Other topics include load time history; explosion dynamics related to material damage capabilities; dynamic finite elements with provisions for impact and explosions; a discussion of solution procedures, acceleration, and convergence criteria; methods for designing structures resistant to impact and explosions; and how damage results due to impact or explosions. Case histories, comparative studies, numerous examples, appendices, and extensive references reinforce information presented in this important book for engineers and researchers working in government and private industry laboratories concerned with blast or impact loading effects on structures. Small firms that deal with impact loading (e.g., automobile collisions) will also find this book valuable.
